

STATE OF NEVADA

Comprehensive

Annual

Financial

Report

**for the Fiscal Year
Ended June 30, 2016**

**Ron Knecht, MS, JD, PE(CA)
State Controller**

RON KNECHT, MS, JD & PE(CA) STATE CONTROLLER

Ron Knecht, an economist, financial and policy analyst, Professional Mechanical Engineer (registered in California), and law-school graduate, became Controller January 5, 2015. As Controller, he also serves on Nevada's Board of Finance, Executive Branch Audit Committee and Department of Transportation Board of Directors.

In his first full fiscal year as Controller, Ron and his management team saved taxpayers 13% of the funds that had been appropriated to the Controller's Office by the Legislature and Governor, based on requests by his predecessor. While returning over \$1 million to the State Treasury, Ron and his staff have improved state services to Nevadans, especially in the area of accountability information.

Before being elected Controller, he divided 44 working years between public service and entrepreneurial small business, all in managerial and senior professional positions. He's been a founder, executive or director for 12 firms, charities, community-service and public-interest groups.

In previous jobs, he testified extensively as an expert witness. In 2012-14, 1986-2001 and 1976-78, he was a consultant and business executive. In 2001-12, he was a senior economist at Nevada's Public Utilities Commission. He held principal economics, finance, technology and policy positions in 1978-86 at California's Energy and Public Utilities Commissions. In 2009-13 he co-taught about ten two-day seminars for SNL Financial on utility finance, cost of capital, and economic and policy issues for regulators, professionals, managers, executives and securities analysts. In 1973-77, he was a Research Associate and Research Engineer at the University of Illinois. In 1972-73 he was Assistant City Engineer in Urbana, Illinois.

Ron was elected to the Board of Regents of the Nevada System of Higher Education in 2006 and re-elected in 2012. For two years, he chaired the Budget & Finance Committee and was Vice-chair another year; he chaired the Audit Committee for two years; and for seven years he was very active on the Investment and Major Projects Committee, which oversees \$1-billion of endowment and operating funds. He served on four other committees and on institutional presidential selection and performance-review committees, chairing two of them. Ron was elected to the Nevada Assembly for 2002-04, representing Carson City and Washoe City.

With some scholarship support, he worked his way through undergraduate and early graduate studies at the University of Illinois (BA, Liberal Arts & Sciences; mathematics major; physics & chemistry minor; 1971). Spending most of his working career in San Francisco and Silicon Valley, he paid his way at Stanford University (MS, Engineering Economic Systems; 1989) and the University of San Francisco (JD; 1995) by working full time. He's been a columnist for various print and on-line papers, and has taught part-time at two colleges.

The most important things in Ron's life are his wife, Kathy, their teenage daughter Karyn, and Ron and Kathy's mothers and families. Raised in a small Midwestern town, he was always active in a wide range of athletics and outdoor activities -- a competitive distance runner in high school and college. He enjoys ballet, modern dance, symphony, opera, rock & roll, country & western, theater and film, and he collects baseball cards and pursues other hobbies.

RON KNECHT,
MS, JD, PE(CA)
State Controller

STATE OF NEVADA

JAMES W. SMACK
Chief Deputy Controller

GEOFFREY LAWRENCE
Assistant Controller

**OFFICE OF THE
STATE CONTROLLER**

December 21, 2016

To the Citizens, Governor and Legislators of the State of Nevada:

In accordance with Nevada Revised Statutes (NRS) 227.110 and the State Accounting Procedures Law (NRS 353.291 through 353.3245), I am pleased to present the State of Nevada Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2016. The objective of this Report is to provide a clear picture of the government as a single, unified entity, in addition to traditional fund-based financial statements.

Introduction to the Report

Responsibility: The Controller's Office prepares the State of Nevada CAFR and is responsible for the accuracy, completeness, and fairness of the presentation, including disclosures. To the best of our knowledge and belief, the information contained in the State of Nevada CAFR is accurate in all material respects and is reported in a manner that fairly presents the financial position and results of operations of the State's primary government and the component units for which it is financially accountable. Additionally, this report includes all disclosures necessary to enable the reader to gain a reasonable understanding of Nevada's financial activities.

Generally Accepted Accounting Principles: As required by State Accounting Procedures Law, this report has been prepared in accordance with generally accepted accounting principles (GAAP), applicable to State and Local Governments as established by the Governmental Accounting Standards Board (GASB). The State also voluntarily follows the recommendations of the Government Finance Officers Association (GFOA) for the contents of government financial reports and participates in the GFOA's review program for the Certificate of Achievement for Excellence in Financial Reporting.

Internal Control Structure: The State of Nevada has established a comprehensive internal control framework designed to both safeguard the government's assets against loss from unauthorized use or theft, and to properly record and adequately document transactions. As a result, the transactions can be compiled into the presentation of the State's financial statements in conformity with GAAP. Since the cost of internal controls should not outweigh their benefits, the State's comprehensive framework of internal controls has been designed to provide reasonable, rather than absolute, assurance that the financial statements will be free from material misstatement.

Many of our essential control features are decentralized. Hence, the State relies upon the controls in place within its various departments and agencies. NRS 353A.025 requires the heads of agencies to review their internal controls on a periodic basis to determine if the agency is in compliance with the Uniform System of Internal Accounting and Administrative Controls adopted pursuant to NRS 353A.020. On or prior to fiscal year end of even-numbered years, agencies are required to report the status of their internal controls to the Department of Administration.

Independent Auditors: The independent accounting firm of Eide Bailly LLP has audited the accompanying financial statements in accordance with generally accepted governmental auditing standards. Their opinion appears in the Financial Section of this publication. The goal of the independent audit is to provide reasonable assurance that the financial statements of the State of Nevada are free of material misstatement. We received an unqualified opinion on the basic financial statements for this fiscal year. The independent audit of the financial statements of the

State of Nevada is part of a broader, federally mandated Single Audit designed to meet the special needs of federal grantor agencies. The standards governing Single Audit engagements require the independent auditor to report not only on the fair presentation of the financial statements, but also on the audited government's internal controls and compliance with legal requirements, with special emphasis on internal controls and legal requirements involving the financial statements. This report can be found in the Compliance Section of the CAFR, and in the State of Nevada's separately issued Single Audit Report.

Management's Discussion and Analysis: GAAP requires management to provide a narrative introduction, overview and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. However, as is the normal course of business, the audit by Eide Bailly LLP does not extend to or cover this transmittal letter or its addendum.

Profile of Government

Background: The Nevada Territory was carved out of the Utah Territory by Congress in 1861 and its boundaries were subsequently expanded eastward in 1862 and eastward and southward in 1866. In 1864, Nevada was granted statehood after transmitting its newly ratified constitution to Congress in the longest and costliest transmission by telegraph in history. This allowed statehood to be conferred on October 31, just days ahead of the November 8 presidential election at a time President Lincoln thought he might need Nevada's electoral votes to secure reelection.

The Great Basin Desert dominates the Nevada landscape, with the Sierra Nevada Mountains to the west and the Rocky Mountains to the east. Federal agencies own and control more than 80 percent of Nevada's 70,264,320 acres, meaning most of Nevada's land area is restricted from use and development by private citizens. Local governments are also unable to collect property taxes on these lands to sustain vital public services, although they do receive less valuable Payments in Lieu of Taxes from the federal government. Due greatly to the shortage of land available for citizens, more than 90% of our 2.8 million residents are squeezed into one of two distinct population centers: the Reno/Sparks/Carson City area near Lake Tahoe and Clark County at the southeast tip, separated by 450 miles.

Nevadans enjoy the absence of a personal income tax but labor under a variety of indirect taxes that are assessed on businesses and thus passed onto consumers in the form of higher prices and to workers in the form of suppressed wage and employment growth. Nevada has offered a continuous legal market for gaming since 1935, allowing that industry to thrive in the state while also financing a significant share of public services. The State operates under a constitution that provides for a full range of services, including education, health and social services, highway maintenance and construction, law enforcement, public safety, business regulation, and resource development.

Reporting Entity: The State of Nevada, as the reporting entity, conforms to the requirements of GASB Statement No. 14 and No. 34 as amended by GASB Statement No. 61. The accounting and reporting principles reflected in these statements are based primarily upon the fundamental concept that publicly elected officials are accountable to their constituents, and to distinguish between the primary government and its component units. The State's legally separate component units include the Nevada System of Higher Education, Colorado River Commission, and Nevada Capital Investment Corporation. In addition, the Nevada Real Property Corporation is reported as a blended component unit. The State also includes the presentation of its trust and agency funds. The State Legislature sets statutorily the parameters within which all these entities operate.

Financial Information

Debt Management: The State Constitution limits the aggregate principal amount of the general obligation debt to two percent of the total reported assessed property value of the State. Additional disclosures regarding the State's long-term obligations are provided in the notes to the basic financial statements.

Long-Term Financial Planning and Financial Policies: State law (NRS 353.205) requires a balanced budget. The Governor must submit a proposed budget for the Executive Branch to the State Legislature before each regular session, which convenes every odd-numbered year. Spending levels under this Executive Budget proposal may not

exceed the amounts that existed during the biennial budget period that began July 1, 1975, adjusted for population growth and inflation. However, the Legislature enacts the budget through passage of the General Appropriations Act and the Authorized Expenditures Act and the legislatively approved budget is not constrained by this growth limitation. Once passed and signed, the budget becomes the State's financial plan for the next two fiscal years.

In accordance with State statute, The Economic Forum, comprised of private economic and financial experts appointed by the Legislature and the Governor, sets the General Fund revenue forecasts which are binding on the budget. If revenues fall below those originally anticipated during the course of the fiscal year, the Governor must revise the budget to ensure that State appropriations do not exceed revenues. If the revisions exceed thresholds specified in NRS 353.220, they must be submitted to the Legislative Interim Finance Committee for approval.

Major State Initiatives

Nevada is beginning work on major transportation projects expected to be completed in coming years, including the massive Project Neon in Las Vegas and the USA Parkway in northwestern Nevada. These will be followed by the I-11 corridor developments between these two areas, and the state is developing a comprehensive freight plan. NDOT project schedules are contingent on the availability of funding, which is likely to be aided significantly by recent passage of the federal FAST Act. In addition, Nevada has awarded substantial packages of cash grants, tax abatements, and other incentives to a few select private firms, including Amazon, Tesla Motors, Faraday Future, and the Oakland Raiders.

Awards and Acknowledgments

GFOA Certificate of Achievement: The GFOA awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Nevada for its CAFR for the fiscal year ended June 30, 2015. To be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized CAFR that satisfies both GAAP and applicable legal requirements. A copy of the GFOA Certificate of Achievement is included in the Introductory Section of the CAFR. A Certificate of Achievement is valid for only a one-year period. We believe that this current CAFR continues to meet the requirements of Certificate of Achievement Program, and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgments and Conclusion: This report would not have been possible without the hard work, dedication and professionalism of my staff and the cooperation and assistance from all State agencies, Executive, Legislature and Judiciary. I sincerely appreciate the efforts of all the individuals involved, especially the Controller's Office staff. We are committed to advancing accountability, continuity and efficiency in the State's financial operations.

In the following 23 pages, we present the Controller's Analysis and Economic Outlook addendum to this Transmittal Letter to provide additional and essential context for users of these statements. It provides a detailed overview of Nevada's performance in specific functional areas, a summary of financial results for the past year and an Economic Outlook for the foreseeable future.

Sincerely,

Ronald L. Knecht, MS, JD & PE(CA)
Nevada State Controller

Controller's Analysis and Economic Outlook

HIGHLIGHTS AND TABLE OF CONTENTS

- I. **State Spending** (pages v-vi) – Over the long term, state spending has grown faster than Nevada's economy, thus imposing an ever larger real burden on Nevada families and businesses, whose incomes have fallen significantly over the last decade. Rapid increases in spending on Health and Social Services (HSS) and K-12 education are driving state spending growth. HSS and education (K-12 and higher) accounted for 82% of total state spending of \$10.9 billion in FY16 while all other state spending in total declined significantly in real and nominal terms over the past decade.
- II. **State Revenues** (pages vii-ix) – Non-tax revenues - grants and contributions to the State, charges for services and contract revenues, have grown very rapidly (48% faster than the growth of Nevada's economy) to comprise 56% of total state FY16 revenues of \$12.5 billion. Total tax revenues grew with the state economy, and they provide the other 44%. Gaming tax revenues fell sharply in real terms while taxes on other businesses (including unemployment assessments) rose greatly. Ignoring the pass-through effects of increases in business taxes, the burden carried directly by consumers and residents almost tracked their incomes.
- III. **Health and Social Services** (pages ix-xi) – A large amount of non-tax revenues result from federal HSS grants that are restricted for spending for those purposes and thus cannot be redirected to other areas. HSS spending is not only the largest category of state spending, but it has grown fastest, driven mainly by federal mandates. Medicaid accounts for 63% of the HSS total and has accelerated recently due to Nevada's decision to embrace provisions of the federal Affordable Cost Act of 2010; Nevada Medicaid spending will balloon in coming years and its future is uncertain, even as it delivers poor health care results. The doubling in the last 25 years of the fraction of national income that goes into health care spending is due to the increasing socialization of health care and insurance.
- IV. **Education** (pages xi-xii) – State funding of K-12 has increased rapidly over the long term and last year, especially due to the unprecedented spending increases authorized by the 2015 legislature. Research has continuously demonstrated little correlation between student achievement and spending; so, it is unsurprising that the quality of Nevada education has remained low despite these increases, and it is likely that the massive 2015 spending increases will also yield little improvement.
- V. **Public Employee Compensation PERS** (pages xiii-xiv) – Total compensation of state employees is overall at market levels but is higher for lower-level positions and lower for top-end jobs. Nevada local government compensation is among the highest in the nation and continues to require increases in taxes that are already very high. PERS contributions required of state employees and taxpayers continue to rise in real terms. PERS coverage of local government employees is almost completely paid by taxpayers and is metastasizing to unsustainable levels. PERS relies on very high estimates of future investment returns to hide a growing under-funding problem that threatens financial disaster for Nevada. We propose a correct level, 5%, based on expected returns. By contrast, PERS is leading the nation in managing its investment portfolio, having moved to full indexing in all areas that can be indexed.
- VI. **Economic Outlook** (pages xiv-xxvi) – We identify four secular trends that have suppressed the US economic growth rate the last decade - thus explaining the “new normal” of long-term slow economic growth. The first trend is the continuing growth of government relative to the economy – reflected in public spending, taxes, deficits, debt, regulation of all kinds, and other government interventions. Until the new millennium, this growing deadweight loss was offset by three growth-inducing factors: 1) demographic and other trends that improved labor-force participation; 2) the growth of financial leveraging (debt); and 3) rapid growth in emerging economies, plus globalization of firms, increasing trade and foreign direct investment. Turnarounds in recent years in all three trends mean they too now create an ever greater drag on the economy and produce slow real economic

growth of 2% or less annually (1% per-person). We also address innovation, technological progress and productivity; cost disease; income and wealth distribution; and the fact that state-specific data show Nevada is not an exception to national trends.

VII. **Policy Prescriptions** (page xxvi) – Public policy should serve the wellbeing of the people of Nevada and the broad public interest. This means maximizing economic growth, because growth determines aggregate human wellbeing and the policies that maximize it are also those that are fair to all. Thus, for a long time to come, Nevada needs to rein in the size, scope and reach of government to get it back within optimal levels. We also need to adopt policies that help reverse the other three long-term adverse secular trends and that move Nevada away from cronyism toward true entrepreneurship and economic dynamism.

This analysis is designed to provide Nevada citizens, officials and others a short summary of key facts, data, analysis and issues on the State’s fiscal condition and challenges. The State Controller has a statutory charge to recommend plans for support of public credit, promoting frugality and economy, and better management and understanding of the fiscal affairs of the State. This addendum first summarizes and analyzes state spending and revenue sources over the last decade. Then it presents the economic outlook for Nevada, focusing especially on the long term, which for reasons explained below, is necessarily based mainly on the national outlook. It ends with some policy prescriptions for better serving the public interest.

I. STATE SPENDING: How Does Nevada Spend Your Tax and Fee Dollars?

Table 1 below analyzes Nevada state spending by category. Key conclusions follow.

Table 1: Nevada State Spending Analysis

State Spending by Category	FY2016 \$ Figures in Millions (1)	FY2006 \$ Figures in Millions (1)	Percent of FY16 Spending	Growth Rate % 2006-16	2006-16 Real Per Person % Growth	% Growth in Tax & Fee Payers' Real Burdens (2)
Health and Social Services	\$ 5,111	\$ 2,199	47	132	66	83
K-12 Education	2,146	1,240	19	73	18	36
Law, Justice and Public Safety	710	578	6	23	-12	-3
Higher Education (3)	579	706	6	-18	-41	-35

General Government	206	371	2	-44	-60	-56
Transportation	180	508	2	-65	-75	-72
Subtotal	9,758	6,347	89	54	10	21
Discretely Reported Component Units						
Higher Education, Net of Payments from State of NV	1,134	594	10	91	37	51
Other Discretely Reported Component Units	51	125	1	-59	-71	-68
Discretely Reported Component Units Total	1,185	719	11	65	18	30
State Total Spending (Gov., Bus., Disc.)	\$ 10,943	\$ 7,066	100	55	11	22
Subcomponents and Statistics of Interest						
All Other Gov't. (Except HSS, K12 & NSHE)	\$ 2,500	\$ 2,909	18	-14	-39	-32
Nevada Economy: Personal Income (FY) (\$M)	\$ 123,939	\$ 97,669	NA	27	-9	NA
Nevada Economy: Gross State Prod. (FY) (\$M)	\$ 142,319	\$ 121,448	NA	17	-16	NA
Inflation (BLS West-Urban CPI-U Index, FY)	245	203	NA	21	NA	NA

(1) Data are taken from CAFR and CAFR workpapers. For consistency, Cultural Affairs spending is reported both years under General Government, where it is now classified; before 2014, the CAFR included it under Education. Also, for consistency, Nutritional Education Programs are classified both years under K-12, as they were before 2014, although they are now classified as Regulation of Business for CAFR reporting.

(2) These percentage changes are not due to inflation, population growth, increase in student or HSS client head counts, etc. They are the changes in the Nevada tax- and fee-payers' burdens in addition to increases in those burdens to cover inflation, population, etc. These percentages are computed based on personal income; if they were computed based on GSP, the increase in burden would be greater because GSP grew slower over the 2006-16 decade than personal income (17% versus 27%).

(3) Real Per-person Growth Rates computed based on state population figures for all categories except K-12 and Higher Education, which are based on student head-counts.

1. Health and Social Services (HSS) and education accounted for 83% of State Total Spending of \$10.9 billion in FY 2016. Their growth also exceeds growth in State Total Spending from 2006 to 2016. In 2016, HSS consumed 47% (\$5.1 billion), with Primary and Secondary (K-12) Education taking 19% (\$2.1 billion) and Higher Education another 16% (\$1.7 billion). All other activities – Law, Justice and Public Safety, Transportation, Unemployment Insurance, General Government, Regulation, etc. – total merely 18% (\$1.9 billion), as shown in the All Other Government line.

2. HSS and K-12 spending grew rapidly while All Other Government spending, the Nevada economy and the wellbeing of Nevadans declined significantly. Chart 1 below displays the annual state spending growth by major category in real per-capita terms over the last decade. Table 1 shows the ten-year totals: increases in HSS (66%) and K-12 (18%) drove up State Total Spending (11%), despite a small decrease in Higher Education (-5%) and a large decrease in All Other Government spending (-39%). Meanwhile, Personal Income of Nevadans (-9%) and Gross State Product (-16%) also contracted substantially.

3. Most importantly, the burden of state spending on Nevada families and businesses, driven by HSS and education, was 24% higher relative to their incomes in 2016 than in 2006. The right-hand column of Table 1 shows the growth in spending on each category as compared to incomes of Nevadans. The growth in burden from HSS spending was 83%. For K-12, it was 36% and for higher education, 4%. As shown in the All Other State line, the total of All Other State spending grew 32% slower than incomes. These burden figures mean that, besides covering spending increases due to inflation and growth in HSS client and student headcounts, rising HSS and K-12 spending required families and businesses to pay taxes and fees 22% higher in 2016 than in 2006.

The following points also are noteworthy:

- More than \$3.2 billion (63%) of HSS monies was spent on Nevada Medicaid. This spending will likely continue to rise in coming years due to the state’s decision to expand eligibility pursuant to the federal Affordable Care Act (Obamacare). However, federal contributions toward this spending will decrease beginning in 2017, requiring additional state dollars.
- Nearly \$1.5 billion (70%) of K-12 monies was paid from the Distributive School Account to local school districts to supplement their local revenues. By various measures, Nevada K-12 education continues to deliver poor results, despite rapid increases over the last decade in state K-12 spending. Despite the well-known lack of statistically significant correlation between spending and student achievement, in 2015 the Legislature and Governor increased K-12 budgets by hundreds of millions of dollars for the current biennium.
- Total Higher Education Spending rose 32% over the decade, but the state-funded portion fell 18%. Large increases in tuition and fees, grants and contracts, and self-supporting operations (meal plans, housing, ticket sales, etc.) shifted significant portions of the cost burden from taxpayers to students and their families, who get most of the benefit of the services.
- Transportation spending rose from \$509 million in 2006 to \$802 million in 2012 before falling a net 65% to \$180 million in 2016.
- Unemployment Insurance costs rose nearly ten-fold from \$239 million in 2006 to \$2.233 billion in 2012, before falling to \$342 million in 2016. The 43% growth rate in spending in 2006-2016 for UI is only a small part of the state growth total, and it was driven mainly by the Great Recession, poor recovery and federal UI policy.

II. STATE REVENUES: Where Did the State Get the Money?

Table 2 below presents the State's comprehensive revenue analysis. Revenues are classified either as Program Revenues, which include charges for services and grants and contributions received by the State, or as General Revenues, which include mainly taxes and also smaller miscellaneous items.

Both Program and General Revenues come from governmental activities, business-type activities of the State, and three entities that file separate accounting reports in addition to the state reports covering primary government spending. These entities are called Discretely Presented Component Units, and the Nevada System of Higher Education (NSHE) accounts for essentially all of their total.

Table 2: Nevada State Revenue Analysis

State Revenues by Category	FY2016	FY2006	Percent	Growth	2006-16	% Growth in
	\$ Figures in Millions (1)	\$ Figures in Millions (1)	of FY2016 Revenues	Rate % 2006-16	Real Per Person % Growth	Tax & Fee Payers' Real Burdens (2)
Program Revenues						
Governmental Charges for Services	\$ 886	\$ 769	7	15	-18	-9
Governmental Grants & Contributions (Op'g & Cap.)	4,804	1,875	38	156	83	102
Business-type Charges for services	120	99	1	22	-13	-4
Business-type Grants & Contributions (Op'g only)	59	103	-	-43	-59	-55

Less: Payments from State of Nevada (Primary Gov)	(579)	(706)	-	-	-	-
Net, Discretely Presented Units	18	108	-	-83	-88	-87
Total General Revenues (Gov., Bus., Disc.)	5,438	4,057	44	34	-4	6
Total Program & General Revenues	\$ 12,519	\$ 7,812	100	60	14	26

(1) Data are taken from CAFR and CAFR workpapers. Data for Discretely Presented Units covers NSHE, (by far the largest component) CRC and NCIC.

(2) These percentage changes are not due to inflation, population growth, increase in student or HSS client head counts, etc. They are the changes in the Nevada tax- and fee-payers' burdens in addition to increases in those burdens to cover inflation, population, etc. These percentages are computed based on personal income; if they were computed based on GSP, the increase in burden would be greater because GSP grew slower over the 2006-16 decade than personal income (17% versus 27%).

The following points emerge from Table 2 nearby.

1. Government Grants and Contributions account for 38% of total state revenues of \$12.5 billion in 2016, and they grew much faster than other revenues in 2006-2016. Program revenues from government grants and contributions (operating and capital) totaled \$4.8 billion in 2016. This revenue increased more than \$2.9 billion from 2006, and it accounted for 62% of growth in total state revenues. These revenues are mainly comprised of federal government funding for Medicaid, Supplemental Nutritional Assistance (food stamps) and Temporary Assistance for Needy Families (TANF), and they are the revenue side of much of the increase in state HSS spending discussed above. That is, much of this spending is driven by federal mandate and also funded by the federal government and its taxpayers. A notable risk is that federal funding is sometimes diminished, but federal mandates rarely are. In coming years, Nevada faces just such a problem with Medicaid revenues and spending.

2. Charges for services and grants and contracts for higher education comprise 10% of total state revenues, and they also grew rapidly. Program revenues totaled \$1.2 billion for NSHE in 2016, an increase of 33% (\$0.3 billion) over the last decade.

3. Other program revenues amount to 8.5% of total state revenues, and they grew very slowly. Other program revenues of \$1.1 billion grew only 10% (\$0.1 billion) since 2006, much less than the 27% nominal growth in incomes.

4. In sum, increases in program revenues, driven mainly by HSS and, to a lesser extent by higher education receipts, grew rapidly while tax revenues grew only moderately. In 2006, most state revenues came from taxes. But over the last decade, program revenues grew 89%, becoming 57% (\$7.1 billion) of total state revenues. General revenues, which mostly consist of taxes grew only 34% (\$1.4 billion) and now account for only 43% (\$5.4 billion) of the state total (\$12.5 billion). Although past spending growth was supported mainly by increasing grants and contributions, the 2015 tax increases will place much of the burden of future spending growth on taxpaying families and businesses.

Table 3 presents analysis of state taxes by source. There is no definitive source for the right level of taxes relative to incomes and the economy. However, as discussed in the section below on the economic outlook, the overall level of state and local taxes in the US is already well above public-interest levels, yet still rising. In Nevada, local-government taxes are the really big problem (due to high spending and pay), and state taxes have been a lesser problem. Turning to trends, Table 3 shows the points stated below:

Table 3: Nevada State Tax Analysis

	FY2016	FY2006	Percent of	Growth	2006-16	% Growth in
	\$ Figures in	\$ Figures in	FY2016 Gen.	Rate %	Real Per	Tax & Fee

Total Taxes	\$ 5,135	\$ 3,975	100	29	-8	2

(1) Data are taken from CAFR and CAFR workpapers.

(2) These percentage changes are not due to inflation, population growth, increase in student or HSS client head counts, etc. They are the changes in the Nevada tax- and fee-payers' burdens in addition to increases in those burdens to cover inflation, population, etc. These percentages are computed based on personal income; if they were computed based on GSP, the increase in burden would be greater because GSP grew slower over the 2006-16 decade than personal income (17% versus 27%).

(3) Modified business taxes were increased significantly in 2010 and new motor vehicle and short-term-vehicle rental and transient-lodging taxes were also added in that year. These changes affect growth and burden rates.

1. The burdens on consumption and on persons of state taxes declined in the last decade. Revenues from the following key taxes fell significantly relative to the growth in incomes: sales and use, gaming, property, motor and special fuels, liquor and tobacco, and other minor items. The incidence of these declining tax revenues lies greatly with consumption, not with savings, investment and employment; and on persons, not businesses.

2. To compensate for this decline, the State added new levies and increased taxes mainly on savings, investment and employment and on business. It did so via the modified business tax (that mainly taxes employment) and unemployment assessments; and also partly via levies on auto leasing, lodging and motor vehicles. The largest rise, which was for unemployment assessments, was driven mostly by federal mandate. The upshot is that the growth of total tax burden is trending down, but that trend masks a shift of burden from consumption to savings, investment and employment; and from persons to business.

3. The shift in tax burden from consumption to investment and employment and from persons to business diminishes tax neutrality. Neutrality is important because maximizing economic growth and fairness requires that taxes influence as little as possible the spending-versus-savings, investment and employment choices people and firms would make without them. The choices they would make in markets without taxes would maximize economic growth and also maximize aggregate human wellbeing and fairness, the fundamental public policy goals. Since individuals overwhelmingly use their dollars for consumption versus savings and investment, and businesses also spend much of their revenue on goods and services, taxes should fall mainly on consumption of goods and services, and less on savings, investment and employment.

4. The shift in tax burden from consumption to investment and employment and from persons to business also diminishes transparency. Transparency is fostered by taxing people, not business; as economists note, businesses don't so much pay taxes in the sense of actually absorbing their economic burden as they collect them for the government from consumers and from employees by lower employment and compensation. Hence, taxing people directly increases transparency, accountability and economic growth by reducing distortions, economic inefficiency and reductions in investment and employment caused by using businesses as the tax middlemen.

5. With eleven taxes accounting for 3% to 24% of general revenues in Table 3 and considering their incidence mainly on persons and consumption, Nevada's tax base can be called reasonably well diversified. Such diversity is important for the optimal balance between stability of public revenues and the revenue constraints that government needs to make it operate efficiently and not grow unduly large. Diversity also keeps rates generally low and the base broad, but in Nevada that benefit is offset by limiting the range of goods and services to which the largest tax revenue source, sales and use taxes, applies. So, no strong conclusion can be pronounced on this criterion.

III. HEALTH AND SOCIAL SERVICES

Health and social services has been the fastest growing category of expenditures over the past ten years in Nevada, and this growth continued in FY2016. In total, Nevada spent \$5,111 million on these services in 2016, up from \$2,199 million in 2006. Much of this spending is financed through federal grants to support programs like Medicaid, food stamps and other welfare programs. At present, as Nevada spends money on these programs, the state becomes entitled to reimbursement from their federal sponsors. However, federal reimbursements do not compensate Nevada fully for all expenditures, and certain programs such as Medicaid require a matching state commitment.

1. Medicaid is Nevada's largest single expenditure for health and social services, and accounts for 63% of the categorical total. Federal operating grants to support this program fluctuate each year according to a formula based on the per capita income in each state. States with lower incomes are entitled to have a larger proportion of Medicaid costs reimbursed, but in no case does the federal reimbursement rate fall below 50% of eligible costs. For 2016, the reimbursement rate to Nevada was 65%, up from 54% percent in 2006. A prolonged decline in Nevada per capita incomes relative to the nation drove this increase in federal Medicaid financing. However, this also means that any prospective recovery in Nevada incomes will cause state taxpayer spending for Medicaid to rise even more rapidly.

2. The long-term rise in Medicaid spending has been accentuated by a rapid escalation within the past few years due to the expansion of eligibility parameters. Historically, states that elected to participate in Medicaid were required to cover only certain highly vulnerable populations including the elderly, disabled and children below the poverty level. The federal Affordable Care Act of 2010 (ACA), however, encouraged states to expand eligibility rules to cover all individuals with incomes up to 138% of the federal poverty level including single, childless, working-age adults with no disabilities. The ACA offered full reimbursement of eligible state expenditures for this expansion population through 2016. Federal reimbursements then fall to 95% in 2017, 94% in 2018, 93% in 2019 and 90% by 2020 and beyond. There remains some question as to whether these enhanced reimbursement rates will continue under a Republican Congress and president, especially given the long-running projections of federal deficits.

Gov. Brian Sandoval and Nevada lawmakers chose to expand Medicaid eligibility along the guidelines outlined in the ACA during the 2013 Legislature. Since that time, Nevada's Medicaid enrollment has nearly doubled, growing from 350,234 at the beginning of 2014 to 650,213 at the close of 2016. A portion of this increase is attributable to growth of the legacy population, which grew by 85,837 persons over the period. Although many of these individuals had been previously eligible, new federal tax penalties for failing to acquire nominal health insurance prompted enrollment, which they had previously spurned. This legacy population is subject to the standard federal reimbursement rate, whereas the 241,142 persons who enrolled as part of the expansion population are subject to the enhanced rate.

3. Expanded availability of publicly funded health care benefits has occurred alongside a decline in rates of private insurance coverage and other private spending. In 2008, 68.6% of Nevadans held private insurance coverage. That rate remained steady through the end of the Great Recession in 2009 but fell to just 61.5% by 2012 before rebounding partially to 64.5% in 2015. One explanation is that the mandates included in the ACA led to the closure of many private insurance plans and temporarily left policyholders without coverage until some purchased new, ACA-compliant plans. But the concurrent enrollment growth in Medicaid and other public health plans suggest that greater availability of these plans has displaced many consumers who previously could afford private insurance. In 2015, 33.5% of Nevadans were enrolled in some form of public health plan, up from just 20.6% in 2008.

4. There is evidence to suggest that expanding Medicaid to additional populations does not improve objective health outcomes and only further endangers the most vulnerable populations. Medical reviews reveal that outcomes are better for holders of private insurance policies than for beneficiaries of public health plans. Mortality rates for surgical procedures are nearly three times higher for Medicaid beneficiaries than for private insurance holders and even higher than for uninsured individuals.

Policymakers have historically squeezed provider reimbursement rates as a cost-control method for Medicaid, while expanding Medicaid eligibility rules. One outcome of this approach is that many health care providers, including the most talented, refuse to accept Medicaid patients. The result is growing demand for Medicaid services as eligibility rules have widened while the supply of providers within the network contracts. This shortage of supply has fueled widespread reports of Nevadans who nominally have coverage through Medicaid but who cannot get care. Thus, the increased competition for care wrought by eligibility expansion harms the most vulnerable populations who were previously eligible and who now face reduced access to care.

5. Whether public or private, most health care plans today are more accurately described as third-party payer plans than insurance. Insurance implies a pooling of risks to hedge against unforeseen events, but public and private health care plans offer payment for routine and foreseeable treatment, as distinguished from risk outcomes. These arrangements encourage individual participants to seek superfluous amounts of care because the cost of additional care is socialized among the group. This perverse incentive, called "moral hazard" by economists, leads to rapidly escalating premiums for private plans and taxes to finance public plans.

Decades ago, a majority of personal health expenditures were financed out-of-pocket by individuals in lieu of any third-party payer arrangement. Wage controls imposed nationally during World War II inspired employers to offer non-wage benefits, including all-inclusive health care packages to attract talented workers. As this system of employer-sponsored third-party payers has grown alongside public health programs, the costs of health care have skyrocketed. The chart below reveals the near-perfect inverse relationship between the percentage of care financed by individuals' out-of-pocket spending and the nationwide cost of health care per capita.

IV. Primary, Secondary and Higher Education

Primary and secondary education programs have been the second fastest growing category of state expenditures over the past decade, growing from \$1.26 billion in 2006 to \$2.15 billion in 2016. On a per-student basis, and without considering local funding, state spending for K-12 education increased from \$3,227 to \$4,531 over this period. Meanwhile, Nevada's ranking against other states in terms of student achievement has failed to improve significantly. In 2007, Nevada eighth graders ranked 44th nationally in their performance on the federally administered National Assessment of Educational Progress reading and math evaluations. By 2015, those rankings remained at 43rd in reading and 41st in math.

These diverging trends make clear that Nevada has failed to translate higher spending for education into improved results. That's also true for the rest of the nation. Among member countries to the Organization for Economic Cooperation and Development (OECD), the United States spends the fourth highest levels per student but has below average academic performance. South Korea, the highest achieving nation, spends only 59.5% as much as the US per child.

**Table 1: Per-pupil Spending and Student Achievement -- Data Available for Developed Countries
Results of the OECD's Programme for International Student Assessment (PISA, 2012)**

Rank by Total Score	Country	Expenditures per Pupil from Age 6 to 15, in US Dollars	Mean PISA Maths Score	Mean PISA Reading Score	Mean PISA Science Score	Mean PISA Total Score	Mean PISA \$/Point, Total Score	Ratio, Total to OECD Mean	Rank by Per-pupil Spending
1	Korea	\$69,037	554	536	538	1627	\$42.42	0.76	25
2	Japan	\$89,724	536	538	547	1621	\$55.34	0.99	19
3	Finland	\$86,233	519	524	545	1588	\$54.30	0.97	20
4	Estonia	\$55,520	521	516	541	1578	\$35.18	0.63	30
5	Canada	\$80,397	518	523	525	1567	\$51.32	0.92	22
20	OECD average	\$83,382	494	496	501	1492	\$55.90	1.00	17
22	United States	\$115,961	481	498	497	1476	\$78.55	1.41	4

1. To improve the effectiveness of its education spending, Nevada must allocate that spending toward programs that have been demonstrated to boost student achievement. Factors beyond the direct influence of education policies, including the household income levels of students, can greatly influence student achievement. But these factors are largely beyond the ability of schools to change and must be addressed through economic policies that encourage growth, entrepreneurship and dynamism. Education policy must focus on the school-controlled variables that lead to improvements in student achievement in a cost-effective manner.

The academic literature shows no school-controlled variable has a greater influence on student achievement than the quality of the teacher. Peer-reviewed statistical studies show that students lucky enough to have a top teacher make 1.5 times as much testable progress in a school year as those with average teachers. Harvard scholars have found that the best teachers are able to deliver effective instruction regardless of class size. Therefore, Nevada's educational priority should remain the recruitment and retention of highly talented educators. Nevada must relax its current restrictions on who can receive a teaching license so that schools can recruit from a wider array of professionals. Schools must also be freed to offer attractive compensation packages to attract the most talented professionals. Strict, formulaic salary schedules, especially those that reward job longevity instead of excellence, give insufficient flexibility to administrators looking to recruit top talent. Current pay arrangements for teachers also award a disproportionate share of compensation as benefits, as opposed to salary, even though many teachers would prefer greater salary to benefits. So, these strictures must also be relaxed.

2. Families are the consumers of public education and each individual family is most familiar with its specific needs. Therefore, the allocation of education dollars among many alternatives, all subject to economic scarcity, is most efficient when consuming families are free to exercise choices over various educational offerings in the marketplace, just as with other consumer goods and services. Schools of choice, including both private and public charter schools, frequently operate at lower cost than traditional public schools and produce higher student achievement. Of the 12 random-assignment studies to date on school choice, six have determined that all student groups benefit from participation in choice programs, five have found some groups benefit and one found no visible impact. No study has found that choice negatively impacts student performance.

Nevada took a major step toward introducing consumer choice into the education marketplace when the 2015 Legislature created a system of universal Education Savings Accounts. These publicly funded, but privately held accounts promised to separate the public responsibility of financing education from the physical administration of schools. There is near universal agreement that the public should provide basic education to citizens. However, this can be accomplished through means other than government administration of regional school monopolies, and experience has shown this arrangement leads to curricular politicization and fiscal bloat. Unfortunately, the Nevada Supreme Court has upheld an injunction on the program until the legislature can approve an alternative financing mechanism that does not divert funds first appropriated to the state Distributive School Account.

3. Strong evidence exists that technology-assisted learning leads to better student outcomes while also easing the workload on classroom teachers so they can more easily manage larger classes. A major 2010 study by the US Department of Education found that "on average, students in online learning conditions performed better than those receiving face-to-face instruction." Students enrolled in online classes tend to spend more time on task and are able to move at their own pace, improving the effectiveness of class time. Further, online learning can lower the facilities and transportation costs faced by schools and parents and bring more students from remote locations into contact with the best educators from across the globe.

A major initiative by the 2015 legislature sought to modernize Nevada public schools by appropriating \$48 million to provide electronic devices for students. However, the initiative failed to recognize the cost reductions and productivity enhancements that should result from technology-assisted learning. Instead, the initiative was a single component of a larger package that continued to increase spending on the same cost items for which digital devices should reduce needs.

4. The 2015 Legislature was hailed by leaders as "The Education Session," but only a subset of the new programs enacted are associated in the academic literature with improved student performance. The others appear designed to instead appease special-interest political constituencies, by spending hundreds of millions of dollars to create new positions at existing public schools. Those programs most clearly supported by academic research include Education Savings Accounts, the creation of an Achievement School District to transform failing public schools into successful charter schools and a Charter School Harbor Master Fund to attract highly successful charter school operators into the state. Others, including the provision of digital devices to students and a policy that students be literate before exiting third grade, were implemented in ways that ignored their cost-saving potential, while still more new initiatives needlessly inflated the costs of the public education bureaucracy.

5. Nevada has significantly increased revenues extracted from higher education students and their families to reduce general revenue spending for higher education in real terms. It has also greatly favored the universities over community colleges. As does all of US higher education, it suffers from administrative bloat and excessive salaries and preoccupation with trivia such as micro-aggressions and safe spaces. Future Controller's Office reports will address these issues.

V. EMPLOYEE COMPENSATION AND BENEFITS

Previous sections of this letter have addressed Nevada spending by its purposes, but here we address the overall level of public-employee compensation, and especially the portion of that compensation managed by the Public Employee Retirement System (PERS). Both total compensation and retirement funding have long presented serious challenges to governments around the world, particularly for US state and local governments. The good news is that, while Nevada also faces these challenges, it is doing some key things right and is in a better position than most states to meet its challenges.

1. Current Compensation Levels: Annual compensation, excluding benefits, for Nevada state employees is comparable to private-sector levels in our state and well below average for public-employee compensation of other states as a group. Public employee compensation, excluding benefits, paid by Nevada local governments is greatly higher than that for Nevada state employees and employees in the private sector. In fact, Nevada local government compensation is among the highest in the nation, especially when benefits are recognized, because the benefits are also extremely generous. This analysis does not address local-government fiscal matters, but we note that the extreme practices of local governments redound to the disbenefit of the State and to state employees and taxpayers. So, reforms would not only be more fair to state employees and taxpayers, but also help the State manage its fiscal problems. The state payscale is also flatter than those in private enterprise, with entry-level jobs paying more and executive upper-level professional jobs paying less; however, while reform may be in order, it is not clear that it would have net fiscal impacts.

2. Nevada Public Employee Retirement System: Nevada PERS runs various defined-benefit (DB) retirement funding programs, which we address as a group here to get at the key fiscal issues for the State. There are a number of other problems raised by the various aggregating practices of PERS that we simply can't address in this limited review.

In a retirement program, people put some of their current income into a fund that is invested for maximum risk-adjusted growth of the principal so that after their working/contributing years, they may draw retirement income from it. Under defined-contribution (DC) plans, the retirement draw of plan participants is determined by the growth of the fund, which is determined mainly by how well the investments have fared. So, DC plans are inherently fair because all the fruits of saving and investment are returned ultimately to participants, and outside parties do not have any opportunity to divert the funds, nor are they required in any way to subsidize the participants. Under DB plans, participants and the agents who govern the plan are allowed to socialize the risks of their investment decisions to taxpayers and to future generations of participants who have no role in managing those investment risks and thus no opportunity to be fairly protected.

So, DB retirement programs inherently raise the following serious public-policy questions:

- What investment management policies and practices are followed?
- What expected rate of return on future investments – or discount rate (DR) for future liabilities – is used in setting contribution and draw levels? The DR is one of the most important issues for retirement programs.
- What lengths of working and thus contributory participation time are assumed and what lengths of retirement-draw time are assumed, in addition to the other estimates used? The DR and these other parameters are key in determining the Annual Contribution Rates (ARCs) for currently working plan participants. Unduly high DRs used in the past have contributed significantly to raising taxpayer and current employees' required contribution rates, and they may also raise future taxpayer and employee contributions.

A. Investment Management Policies and Practices: Nevada PERS leads the nation and is doing all the important things right in this area. Modern investment theory counsels that in efficient markets, such as investments, one cannot expect to beat the market by consistently reaping higher-than-market-average returns – and one can lose a lot by trying. Hence, one should seek essentially to buy a slice of the whole market (or a representative portfolio) and thereby come as close as possible to reaping market-average returns by keeping investment-management costs as low as possible. This is known as index-oriented (or passive) management, and the alternative is active management. We haven't space to rehearse here the details, but Nevada PERS has done the best job of implementing index-oriented management on reasonable asset allocations and has realized greater returns than notable actively managed funds elsewhere. (See more detail on the Controller's web site.)

B. The Discount Rate (DR): Determining the DR is highly controversial, especially in deciding the purpose of discounting, and thus what standards shall be used to set the rate. One view is that the purpose is to absolutely assure that plan resources from past contributions and investment returns will always be sufficient to cover all

benefits and other claims the system may face, without having to raise additional funds in the future. This approach dictates use of a very low, so-called “riskless” rate – e.g., 2%. One problem with this view is that retirement plans already have a long history of making adjustments to raise funds to cover liabilities incurred in the past because the past contributions and earnings were insufficient to cover the benefit levels granted to retirees. Another problem is that it is literally impossible to assure the desired sufficiency because it is possible at any time for the plan to lose money unless it uses investment strategies that do not seek to maximize risk-adjusted returns; so this approach almost requires suboptimal investment management practices. A final problem is that if sound investment management practices are followed, the expected value of plan resources will always exceed the liabilities, and this means that contribution rates and benefit levels for future employees will be subsidized by today’s plan participants and taxpayers. Because economic growth means that future generations will be wealthier than today’s generation, this implies a regressive intergenerational wealth transfer.

So, the proper fiduciary method for setting the DR is to soberly assess the expected net returns on the investments; then, probabilistic analyses (such as Monte Carlo simulations, etc.) should be conducted using return distributions that have as their expected value return the DR chosen. These simulations will tell the probabilities that the fund will be able to cover various future payout levels, and contribution requirements and benefit levels can be determined to satisfy the level of certainty chosen by the board overseeing the plan. Thus, the real DR question is simply: What are the reasonably expected returns? For decades, public-sector plans have assumed returns around 8%, although some plans have adjusted downward slightly in recent years. Our analysis in the following Economic Outlook section shows economic growth and thus investment returns are highly likely to be much lower than historic levels for the foreseeable future.

Our conclusion is that a DR of 5% net of fees and costs is the most reasonable expectation. On the Controller’s web site, we provide further support for this position. For example, using a 60% equity and 40% debt portfolio with a debt return (yield) of 3.5%, and an expected equity return of 6%, gives exactly a 5% portfolio ROR; something slightly higher would be needed to cover fees and costs, even at the very low rates incurred by Nevada PERS. The 6% equity return can be supported by an average of: 1) a risk-premium analysis that adds a 5.5% equity risk premium to a 2.5% riskless rate to get 8%; and 2) a discounted cash flow analysis that adds a 3% current dividend yield to a 1% per-person expected economic growth rate for a 4% equity return. So, we strongly recommend PERS adopt a 5% DR.

- C. Reference Working Lives and Retirement Periods:** Expected life length has been climbing in the US for decades, and health status has been improving at every age, but these factors have not been reasonably reflected in the reference working lives and retirement terms assumed by pension funds, Social Security, etc. In short, today most working lives assumed in pension plans, including PERS, mean that retirement benefits maximum levels are reached after 30 years of employment or only slightly longer and often available at a mid-fifties age. Thus, many public employees, including Nevada State employees, get market-level pay for 30 years of service, followed by retirement draws that may run as long as 40 years and are noticeably better than the retirement draws generally available in private employment. Even expanding on these issues at the Controller’s web site, we cannot do full justice to this issue. Our purpose in raising it here is to initiate a broad and sustained conversation among all parties to properly plan for and finance the retirement of public employees.
- D. Duty to the public interest, voters, taxpayers and future plan participants:** The basic duty owed by all public officials – from governors, controllers and legislators to all public employees in policy-related positions is a duty to the voters, taxpayers and broad public interest. People involved in governing retirement funds tend to see a duty to plan participants, and statute and regulation often supports such additional duties. As public choice theory illustrates, the real problem is that officials generally begin to regard their primary duty as residing with current plan participants and they forget to view all their decisions from the viewpoint of the voters, taxpayers and broad public interest. In particular, taxpayers – and in retirement matters, future plan participants – begin to be viewed as mainly deep pockets to allow the politicians and bureaucrats to better serve the interests of current pan participants. We therefore urge that all discussions of these issues begin with explicit recognition of the duties to voters, taxpayers and the broad public interest, and all proposals should be evaluated almost exclusively on that basis.

VI. ECONOMIC OUTLOOK: INTRODUCTION AND OVERVIEW

A year ago in Nevada’s first Popular Annual Financial Report, we proffered an unusual economic outlook, one focused on the intermediate and long term. We identified four long-term secular trends that we believe have suppressed the US economic growth rate the last decade -- thus explaining the “new normal” -- and by their nature will continue to do so for the foreseeable future absent significant changes in public policy. These developments

obviate short-term forecasts because they swamp out business-cycle effects and may even change business-cycle frequency. They also make sectoral forecasts uncertain. And they do the same to regional forecasts; nonetheless, we examined certain long-term Nevada trends to see if there was any basis for modifying the national forecast for our state. (There was not.)

Long-term Growth of Government Over-reach: The first trend is the continuing growth of government relative to the economy – reflected in public spending, taxes, deficits, debt, regulation of all kinds, and other government interventions (e.g., retirement programs, health care and insurance, etc.). The empirical economic literature indicates that government size, scope and reach has for over 55 years been excessive relative to levels that maximize growth and thus human wellbeing. Yet government has continued to grow, especially in the last decade, thus ever more retarding growth. Until the turn of the century, this growing deadweight loss was offset by three growth-inducing factors: 1) demographic and other increasing labor-force participation trends; 2) increasing debt levels of all kinds relative to GDP (government, financial debt, non-financial business debt, home mortgages and all other consumer debt); and 3) rapid growth in emerging economies, plus globalization of firms, increasing trade and foreign direct investment.

Changes in Three Other Long-term Secular Trends: Not only has government over-reach soared to new levels in the last ten years, but labor-force trends that were a major offset to that excess have turned around, driven by both policy and demographics since the turn of the century. Since the Great Recession, rapid growth in debt has waned for policy reasons and simply because the growth rates were unsustainable. Thirdly, world economic growth is slowing and will continue to slow because other countries have done an even worse job than the United States on growth policy; further, our increasing integration with the rest of world has slowed since the recession, mainly due to poor policy. So, for both reasons, the rest-of-the-world sector also has changed from an engine to a drag.

The upshot of these trend changes is that ten-year US growth, which peaked in the 1960s and then was roughly constant through 2007, except for a downward excursion in the early 1980s, collapsed after 2007 to half its historical rate, where it has stayed. Last year, we forecasted 2% or lower long-term annual growth, with half of it coming from population growth and half from real per-person economic growth – both of which may well decline going forward. We emphasize per-person growth because it determines the extent to which human wellbeing and human flourishing increase, and thus is the real measure of success in public policy. The difference between the 1% figure of the last decade that we project to continue for the foreseeable future and previous growth in the 2%-2.5% range is hugely significant in economic, social and human terms, as we showed.

New Normal Persists: Slow Long-term Growth: While 2% growth had been the rule since the recession, almost nobody had been projecting continuation of it. So, our projection (which Knecht has made since 2011 based on such analyses), was an unorthodox if not radical view. Over the last year, many people have begun to accept the idea that such slow growth really is the new normal and will persist – and many have given reasons similar to ours to support such forecasts. In fact, the Congressional Budget Office – which has a long record of optimistic forecasts that were not realized – just recently adopted the 2% long-term growth estimate. While we're not averse to the mainstream coming around to our views, we nonetheless continually critically re-examine our analysis and results. So, beginning on the next page, we revisit the four trends, plus our Nevada-specific factors, and their effects. We find that last year's analysis of these trends is essentially unchanged. Our conclusion remains that economic growth will be slow and that uncertainty has increased.

Innovation, Technological Change and Productivity: Although our basic analysis are still sound, the last year has highlighted some competing theories, concerns and new data; so, we examine them too. First, major works published the last two years suggest endogenous (organic) factors explain the growth over the last 150 years (or longer) in terms of specific inventions, innovations, technological progress and developments that led to unusual productivity gains and thus rapid growth for periods from a decade to a century. Proponents of these analyses seem mostly to ignore effects of the four trends we presented, and more importantly they claim that past rapid growth was a one-off phenomenon and so we have now returned to a basal economic metabolism of slow growth. We believe that our factor analysis explains much of the growth in innovation, technological progress and productivity they have correctly observed. Therefore, we need not wallow in pining for a lost golden age, but instead need to reform policies to reinstitute it.

Cost Disease: An important aspect of this debate concerns structural changes in our economy as our total economic output has shifted more to services from goods. Baumol’s “cost disease” is the economist’s explanation of the problem, but we believe it errs by failing to consider alternates and substitutes continually proliferating in the basket of consumer and business purchases. We give an example to show that the traditional description of cost disease fails to capture the full range of efficiency gains realized by new developments. While cost disease may characterize general government and the three sectors most entangled with it (education, health care and aging services), innovation by producers and consumer sovereignty overwhelm cost disease in the market economy. Once again, public policy is the key to reform and growth by directly changing the budget processes of the public sector and moving education, health care and aging services greatly forward to market structures.

Market Capitalism and Income Inequality: Finally, recent years have also seen increased concern about the distribution of economic growth, especially as the slowly rising tide fails to lift all boats as the historic tidal surge did. Further, a group of academics have rolled out new versions of classic Marxian doctrines that search for major structural flaws in real capitalism, with the prime one even titled as a knock-off of *Das Kapital*. It claims that over time market systems systematically make the rich richer and leave the poor and middle classes behind, although this claim has been thoroughly refuted on its own terms by serious academic and professional analyses (and it has been greatly qualified as a result by the author). We show that increases in economic inequality have been directly correlated with public-sector over-reach with which our analysis began, and explain that cronyism, which is the inevitable result of government excess, benefits the political classes at the expense of the masses. Market competition enables social mobility and favors the many, while the political allocation of resources (high public spending, taxes, regulation, etc. – in short, politics and cronyism) favors the privileged political few.

The Solution: Broad Public Policy Reform: In sum, as we detail below, our analysis of the four factors we previously identified as resulting mainly from unsound public policy explains the source and solution of our problems. To serve the broad public interest and the people of Nevada, our state and local governments need to do their part, and our federal representatives need to push the national government to do its part. A new federal administration aligned with a cooperative and reform-oriented Congress have an opportunity to turn things around. Additional discussion of many matters addressed here is posted on the web site controller.nv.gov.

1. Government Overreach: The size, scope and reach of American government – including spending, taxing, borrowing, statutory mandates, regulation, monetary and credit-allocation policy, and other intervention – long ago exceeded levels that promote the public interest in maximum economic growth and fairness. These excesses at federal, state and local levels have increasingly slowed growth and diminished fairness, and they will continue to do so unless they are reined in. Economists now understand that economic growth and thus aggregate human well-being levels are determined more by the economic, political and social institutions, practices and policies of a society than by geographic, infrastructure, resources and other earlier development-theory factors. The rule of law, limited government with separation of powers, personal liberty and individual rights, strong property rights and high levels of economic freedom are essential for growth.

As detailed on the Controller’s web site, empirical literature – research based on real economic data – supports and quantifies theory suggesting that there’s an optimal range of government spending that maximizes economic growth. There are classically defined public goods that are most efficiently provided by government and there are market failures that justify regulation and other intervention. However, excess spending, scope and reach of the public sector diverts efficient private investment and consumption, and it slows growth. While there are uncertainties and debate about the levels of public spending relative to the economy that maximize growth, the best evidence shows that the US passed those levels by the 1960s and has increased government excess to the present time.

The chart below of public spending over time as a percentage of the US economy vividly illustrates this point. The excess growth has not been limited to the federal government; state and local spending have grown even faster in relative terms. Nevada’s local-government and total public-sector spending have grown particularly fast. Nationally, increasing government interventions into health care have accelerated greatly driven up its cost. As the public sector continues to consume resources beyond economically efficient levels, private investment and growth is elsewhere deterred, and overall growth of our economy slows.

While public spending is the measure of government overreach easiest to quantify, analyze and understand as a growth determinant, other measures also drive and reflect the excess. Taxes and public debt are directly driven by public spending, and public debt has now reached its highest level relative to the gross domestic product (GDP) since the early 1950s, when the debt from World War II was being worked off. Government regulation in a wide range of economic, environmental, public health and safety areas, plus intervention including monetary stimulus and credit allocation and federalization of health insurance and education have all increased to unprecedented levels and metastasized in the last decade. The net effect has been to raise the barriers to business formation and success, retarding growth; with the overreach at record levels and still increasing, the drag may even get worse. Regulatory restrictions accumulate at an increasing rate each year, with more than 1 million restrictions issued in 2014 alone. For entrepreneurs, however, it is the cumulative effect of these restrictions that burdens business formation, expansion and job growth. Since 1970, nearly 34 million unique federal restrictions have been issued, as shown in the graph below.

2. Demographics and Work-force Participation: Demographic changes driven by public policy and non-policy factors are reducing the fraction of the population doing productive work in market settings, while increasing numbers consuming but not producing. These changes include falling birth rates, increasing longevity, more public subsidy for retirement and of persons not working, and changing social and economic roles of men and women. These changes are slowing growth and may precipitate generational conflict.

The 1970s movement of Baby Boomers into working age, plus the movement then and later of women into paid work drove labor-force participation to a record level of 67.1% in 2001. The aging of Boomers into retirement years, plus declining birth rates in younger cohorts, the slippage of female workforce participation and the tepid recovery from the Great Recession have all dropped participation to 62.7%, the lowest level since 1977. Falling labor-force participation in the 16-54 age range more than offsets recent participation increases for the 55+ group, netting a continued decline in total employment ratios. Low unemployment rates are due to counting “discouraged workers” out of the labor force and to increases in “under-employed” part-timers – both driven by the non-recovery and the palliative effects of increases in benefits to people not working. As shown in the graph nearby comparing population and employment, through 2002, demographic and workforce participation factors gave a huge boost to economic growth countering public-sector overreach, and the employment/population ratio rose more than 56% in 42 years (from 0.30 to 0.47).

However, since 2002, demographic and other labor-force-participation trend reversals have reinforced the increasing drag from government excess that depresses growth. The movement of the large Boomer cohort into retirement began in 2011 and will accelerate and then continue for 20 more years. Because retirement age and support policies were set when longevity was lower and health of people over 60 was less robust, US dependent/producer ratios will continue to rise relative to what they would be under market incentives. So, total-factor productivity and thus the economy will continue to grow slowly. The burden on productive cohorts will increase, especially with slow income growth, leading perhaps to generational conflict. Slow economic growth and resulting low interest rates and other rates of return on investment will challenge retirement funding and exacerbate all these problems.

3. Debt in All Sectors and Net Savings and Investment: Total debt levels relative to the US economy increased hugely until the financial crash and Great Recession of 2007-09. As shown in the graph nearby of total American debt as a percentage of the economy, they have retrenched only mildly since then, leaving an excess-leverage overhang that may not be receding. All debt sectors are involved: government at all levels; business (financial and nonfinancial); and households (mortgage, auto, student and consumer loans, etc.). Credit-allocation policy such as the Community Reinvestment Act amendments of the 1990s drove much of the excess, especially in the decade ending 2008, providing artificial and unsustainable temporary stimulus to growth but also produced mal-investment. Monetary policy – the Federal Reserve keeping interest rates low in 2002-05– also contributed to these problems.

Total US debt/GDP ratios in 2015 were still twice their 1984 levels, despite retrenchment following the financial crash and Great Recession. Consumer debt growth was driven mainly by the federal mortgage lending policies that caused the housing bubble and subsequent collapse. Business debt grew in finance and large corporate stock buybacks, mergers and acquisitions, meaning there is now perhaps an equity bubble. Federal government total debt/GDP ratios have more than doubled, driven by fiscal policy such as the stimulus spending of the \$831-billion American Recovery and Reinvestment Act of 2009 and the continued growth of “entitlements” spending (Social Security, Medicare and Medicaid). Monetary policy – the copious increases to the Federal Reserve balance sheet due to massive purchases of Treasury securities and government agency debt – has also been used to ameliorate the negative growth effects of a wide range of regulatory, tax and other public policies. Further retrenchment from current debt levels is needed to restore the economy, so demand for capital and interest rates and investment returns will all remain low, as will economic growth. The resulting sustained low interest rates have destroyed much economic wealth and damaged institutional, retirement and endowments investors and savers.

4. International Economic Growth, Trade and Foreign Direct Investment: Until the Great Recession, long-term growth of the world and developing economies, led by China, was more rapid than growth in the US and other advanced nations. Driven by and contributing to increasing 1) globalization of corporate operations (not political globalization), 2) international trade and 3) foreign direct investment in the US, this growth increased US economic growth by lowering costs to American consumers and businesses and spurring more efficient investment and production by domestic and foreign businesses.

Since 2007, trade increases have lagged world economic growth. Growth in China and other developing nations has slowed, further depressing American growth. The three factors above that now retard US economic growth are even worse in other major economies, advanced and developing. While this makes our economy the “cleanest dirty shirt in the laundry pile” for investors, it also means the global-trade-and-investment cavalry will not be riding to rescue us from anemic economic growth rates. The world economy will no longer spur US growth to the degree it did before the Great Recession.

The problems of excess and still growing size, reach and scope of government are worse in every other major economy than in the US, as shown in the chart below. So are demographic problems of low birth rates and labor force participation, plus increased aging. Europe (the only other comparably-sized economy) and Japan continue to struggle as they long have done with very low growth. China has grown hugely into the second-largest national economy, but the command-and-control methods that remain even after its liberalization have yielded massive mal-investment and debt growth. Due to mal-investment, persistent low consumer demand and the recently eased one-child policy, a monumental policy mistake that is spawning great human tragedy, China is headed for ever lower and possibly negative growth. All other economies are too small to make a significant difference to US growth.

Total debt worldwide is now about 5.6 times what it was 20 years ago, while the world economy is only 2.8 times its prior size, meaning debt/GDP ratios have doubled in only two decades. That increase is likely unsustainable especially with slowing world growth and globalization, leading to future retrenchment. Europe is now following Japan and the US into monetary and credit-allocation overreach, and Italy and others (possibly including Japan and China) soon may face Reinhart/Rogoff excess debt levels (debt above 90% of GDP leading to financial collapse). Birth rates being an inverse function of women’s education and wealth levels explains much of the world demographic problem, but in India and Africa birth rates are dropping even faster than education and income indicate. Slow population growth will slow their growth.

5. Upshot: Continued Slow Economic Growth: All four mutually reinforcing problems discussed above have already produced the poorest recession recovery on record, with real growth of about 2% annually – or, adjusting for population increase, real per-person growth of about 1%. With none of these problems abating (and perhaps increasing), the most reasonable outlook is economic and productivity growth at recent anemic rates or even lower, plus great uncertainty going forward. The chart below of rolling ten-year growth rates shows that US economic growth has long been declining due to these factors and has collapsed to record sustained low levels since 2008. Growth at 1% per person per year sounds only slightly lower than historic 2.0% to 2.5% levels, but the compounding impact is huge: Namely, average human wellbeing growing only 42% every 35 years instead of doubling, the social norm for 250 years. So, instead of average family incomes doubling from \$50,000 yearly to \$100,000 (at 2.5%), they will grow only to \$71,000 (at 1%). Restoring the economic growth legacy left by previous generations, an essential public policy need, requires government to grow slower than the economy for decades.

Down-side risks may even make things worse. As discussed in the next section, some economists claim that invention, innovation, technological progress and thus productivity growth have slowed from levels of recent decades, meaning that this key driver of growth will have a diminished effect and economic growth will fall toward zero. A related issue is that recent slow growth has occurred despite falling energy and other commodity prices that, all other things remaining equal, should have spurred growth. Possible returns of these prices to historical levels could dampen growth even further, but some economists believe that persistence of low prices could precipitate worldwide deflation and negative economic growth consequences. Two other factors are likely to further compound these problems: 1) slow economic growth produces low investment returns, which in turn tend to keep growth lower in a negative feedback loop; and 2) our current recovery, anemic as it has been, is now longer than the average cyclical upturn and we may be due for a contraction. We see no salient upside factors in the US outlook.

Percent Annual Change in Real U.S. GDP Using Ten-Year Trailing-Average GDP

6. Innovation, Technological Change and Productivity: Two recent economic history books have addressed the slow-down of the American economy in the last half century, and there have also been a number of analyses of the role of innovation, technological progress and productivity growth. The two books are *The Rise and Fall of American Growth* by Robert Gordon and *An Extraordinary Time* by Marc Levinson.

Gordon focuses on the historically unprecedented growth in the US in “the special century” of 1870-1970 and the much less spectacular record since 1970. He breaks down the determinants of growth between 1) capital deepening (the ever accumulating stock of capital to serve the economy and foster growth) and 2) the effective education levels of the populace (which makes people more economically productive and can be viewed as the deepening of the human capital stock), plus 3) total factor productivity (TFP), which covers all productivity gains not explained by the other two factors. He finds that the combination of capital deepening and education has contributed roughly a nearly constant 1% per year in real terms to average annual growth rates of output per work hour since 1890.

However, TFP was a mere 0.5% in 1890-1920 before soaring to 1.8% in 1920-1970 and settling back to 0.7% in 1970-2014. Gordon does address briefly the demographic and labor-force participation trends we have cited, but not the other three factors. Instead he sees TFP as endogenous and even *sui generis* – more a (richly deserved and well told) humanistic celebration of some remarkable technological and economic history than an analysis useful for forecasting and policy. While he sees no basis to believe TFP will rebound to previous levels, he does analyze the last 44 years to conclude that the proliferation of information and communications technologies during that time produced only a ten-year serious bump in TFP to 1.03% in 1995-2004 and he finds the 2004-2014 rate to be the lowest since 1890 at 0.4%.

Levinson analyzes the progress of major western economies, including the US, in the 1948-1973 quarter-century to also find historically unprecedented growth (“the golden age”) followed by a collapse to much lower levels since then. His analysis is also well told, but lacks even more than Gordon’s in quantitative detail and support; in over 300 pages, one finds not a single table, chart, graph or equation (a remarkable feat for a former finance and economics editor of *The Economist*, which has always specialized in illuminating graphics.) He states, “Scholars have spent the past fifty years struggling to understand what went wrong and how to set it right.” So, he joins Gordon in concluding that the present is normal and that the golden age was a unique non-recurring set of many fortunate circumstances.

Both books overlook our explanation above that modest growth until the Great Recession, followed by the distressingly low growth since 2007, is explained by the powerful effect of increasing government over-reach, first offset and then reinforced by the demographic/labor-force, debt and rest-of-the-world trends. But Levinson embraces a particular error in this regard as he writes:

“Our inability to restore the world economy to its peak condition has had long-lasting consequences. It radically changed social attitudes, engendering a skepticism about government that has dominated political life well into

the twenty-first century. *With that change came a shift away from collective responsibility for social wellbeing; as state institutions were allowed to wither, individuals were asked to assume more of the costs and risks of their health care, their education and their old age.*”

The first sentence is certainly true, and arguably the second one too. However, the third sentence, for which we have supplied the emphasis, is categorically false and runs expressly counter to the objective facts-- even though it has become a common talking point for some politicians and media outlets. We show above that public-sector spending has remained above reasonable (optimal) levels for decades and has continued to increase in both nominal and real terms and consumes an increasing proportion of household incomes, burdening economic growth. Moreover, we show that this public-sector metastasis has been driven especially by spending on health care, education and old-age -- the exact three areas for which Levinson erroneously claims public-sector retrenchment. And that the burden and problems from excess spending have been exacerbated by wanton regulatory and other governmental intervention in everything, especially those three areas.

Invention, innovation and technological progress – plus the benefits of capital deepening and education – all together produce productivity gains, which are the source of real economic growth and improvements in human wellbeing. It is helpful to break out capital deepening and education as Gordon does, but more breakout and causal analysis related to his TFP residual is needed. To sum up the recent total productivity growth in the last century: the golden age rate was 2.8% through about 1973; followed by 1.3% in 1973-1995; then a jump to 2.5% in 1995-2004; and concluding with 1% in 2004-2015. The long sustained low rate of the last dozen years included a jump to 2% in 2007-2010 that was mainly a temporary lurch caused by the Great Recession and businesses’ response to it. The sustained rate in 2010-2015 has been about 0.3%, with as much evidence that it is falling as rising.

On the other hand, our 10-year US rolling economic growth computation – which includes about 1% per year for population growth (a figure that is now declining) – shows a boom ending about 1973, followed by a flat and modestly good sustained rate of 3% or slightly more in 1973-2007, then followed by a troublesome and declining 2% in 2007-2015. Our four-part causal analysis of continually growing government excess for 55 years, first offset and then in this century reinforced by the other three factors (demographics and labor force; debt; and rest-of-the-world sector) is fully consistent with the facts and numbers of US economic growth history. Moreover, while we do not have a detailed explanation correlating progress in these four factors with the capital deepening, education and TFP estimates by Gordon, we submit that the two data series are reasonably compatible and consistent. And they provide a direction for future research to understand our growth history and prospects. To initiate that further research, we also note economists have raised a number of productivity measurement issues, as well as questions about achievement trends and the incremental economic effectiveness of education. Also, many have emphasized the metastasis in regulation in the last decade.

7. Cost Disease: Over the long run, the mix of goods and services produced by the US and world economies has shifted toward more services and fewer goods. Half a century ago, William Baumol (who later won a Nobel prize in economics) diagnosed a problem in providing many services that came to be known as Baumol’s cost disease. He noted that the means of providing many services are constant over time and not subject to innovation and technological change that yield productivity gains. Hence, some have suggested that as the economy shifts toward services, effective economy-wide innovation, technological change and thus economic growth rates will slow from historic levels. As discussed here, we believe this view is unproven and likely offset when services productivity is viewed in a larger context.

Baumol observed that, economically, delivering the services of a Mozart quartet today has not changed since Mozart composed it. It still takes four musicians, their instruments and a venue that cannot be much larger (for more listeners) now than it was then. Put in these terms, it is easy to understand the argument and to extend it to a range of other services such as education, where a class of students still requires a teacher, classroom, desks, books, etc., just as it did a century ago. Thus, economy-wide, we may expect diminishing returns to innovation, etc. as services increase relative to goods. Baumol pointed out that when a sector such as classical music experiences productivity gains slower than those for the economy as a whole, the rising productivity of the economy nonetheless means that greater rewards accrue to firms and individuals in that sector over time – albeit not as fast as they grow in sectors with rapid technological change and productivity gains.

Given the constant labor input per unit of output (i.e., a concert), he was concerned that business models for performing arts firms and performers may have trouble delivering income that would keep them economically viable. He did admit they might survive by developing new sources of revenue (e.g., charitable contributions), not just ticket sales. A recent Wall Street Journal article notes that in fact symphony budgets and the pay of their musicians has actually increased relative to the economy, instead of diminishing – although it also questioned whether

the increasing real costs can find revenues to sustain the enterprise and artists. Public subsidies, plus contributions, play a role too. However, contra Baumol's belief that alternate revenue sources such as recording sales would apparently not provide a solution, we believe they do. Further, when the service of providing music is viewed in a larger context, there is no reason to believe that services are inherently subject to slower technological change and productivity gains than goods.

A good way to see our point is via the 1980 movie *Fame*. For his audition at a performing arts high school, a student uses three sets of keyboards and other electronic instruments to play, all by himself, a full synthetic orchestration of the third movement of Beethoven's Fifth Symphony. The music teacher (following Baumol approach to music) is appalled, thus setting up a running argument between them about what it means to make music. The student asserts that if Mozart were alive today, he'd use modern electronic methods – but he is also convinced finally to master classical instruments.

The point is that new inventions, innovations and technological change can in fact hugely increase the productivity of musicians. One musician can play multiple parts. But more important, via recordings and broadcast the performance that could be heard in Mozart's time only by the limited number of people present when it was rendered can now be enjoyed by literally millions of people – and as often as they like. So, with modern communications and data technology, the productivity of musicians and their instruments is multiplied by many orders of magnitude. And consumers realize much greater value from the performance by hearing the third movement of Beethoven's Fifth Symphony on a long auto drive. That is, considering services productivity from the perspective of consumer utility and total output of various kinds by suppliers, there are synergies that offset any cost disease limits and increase productivity hugely.

Moreover, this observation extends to education and increasingly to nearly all services. Alternative means of delivery of education are proliferating in higher education: Students and many people benefit today from recorded and broadcast lectures by the best teachers in any area and at any location, not just at a brick-and-mortar institution. Primary and secondary students also have access to a range of options for their instruction, from traditional classrooms to on-line home-schooling. And instead of having to find an encyclopedia at the library during its hours, in the middle of the night, we Google a subject and follow the search results wherever and for as long as we want. With the synergies proliferating everywhere, we see no reason to believe that Baumol's cost disease is anything other than a rare phenomenon or the product of a limited analytic paradigm.

8. Market Capitalism and Income Equality: An economic outlook analysis is by nature focused on growth. But, we believe that economic growth should also be the primary goal of public policy. When aggregate output increases, there are more resources on average for each person. In addition, increasing total output gives society greater resources to take care of people who through no fault on their part are unable to reasonably provide for themselves. Increases in resources promote human flourishing via education, improved health care, better diets and living conditions, and greater opportunities for use of leisure time. In short, economic growth is the key to human wellbeing.

Moreover, as the analyses in this addendum show, the public policies that promote growth are also those that promote fairness or equity – which is generally accepted as another fundamental goal of public policy. In a mainly market-based economy, people get income and accumulate wealth roughly in proportion to the value they deliver to others. This value is the “consumer surplus” reaped by people who do business with them, and it does not depend on how hard the producers work or how charitable or otherwise virtuous they are; even if they are simply avaricious, in market systems their rewards depend on the contributions they make to society. Further, the value they deliver to others is as much a contribution to society when it results from investing their capital as when it flows from their labor; value is value, and there is no more virtue inherent in labor than in managing capital.

The economic freedom and protection of private property that foster aggregate economic growth also are fair to those who produce by letting them retain the fruits of their labor and investment risk-taking. And those same economic freedoms and property rights promote among everyone the virtuous behaviors society needs of delivering value to others. On the other hand, in any political allocation of resources, income and wealth depend on political behavior, aggressiveness and many other factors that do not serve the public interest in growth and equity, but only the self-interest of the people engaging in them.

Nonetheless, people have always been concerned about how their wellbeing compares to that of others and more generally about the distribution of income within society. With the slow growth and flagging human wellbeing of the last decade, concerns about income distribution and inequality have risen. These concerns often merge with some classic critiques of market capitalism, as reflected in the 2014 book *Capital in the Twenty-first Century* by

Thomas Piketty. So, we review here the arguments and claims about distribution, inequality and alleged structural problems of market capitalism. Then we present data that show that the extensive public-sector interventions urged by these critics not only suppress growth but have also contributed to unequal income distributions and lagging wellbeing of middle- and lower-income households.

Piketty covers much ground in his 700-page tome, but two points stand out here – as summarized from *Problems with Piketty: The Flaws and Fallacies in Capital in the Twenty-first Century* by Mark Hendrickson. First, incomes and wealth are distributed very unequally, both within and among countries. Second, based on the fact that the rate of return on capital investment is generally greater than the growth rate of the economy, Piketty hypothesizes that capital will come to comprise an ever larger fraction of each economy, thus leading him to conclude that inevitably the rich get richer and the poor and middle classes get left behind – until this unsustainable trend erupts in economic breakdown and chaos. So, Piketty calls for confiscatory tax rates on wealth and income (e.g., 80%) to avert this supposed tendency.

However, like most analysts who obsess over income distribution, Piketty ignores the huge effects that income taxes and transfer payments already play. His calculations are based on pre-tax income, which is not the amount anyone has to spend. Piketty further overlooks employer-provided benefits like health insurance and non-taxable capital gains and he fails to adjust for household size, so his assertions have little basis in reality. There are also transcription errors and incorrect formulas in his spreadsheets and some data does not cite original sources. These problems led him to retract his data for the US

Further, the obsessive focus on income distribution is misplaced in principle. As we noted, in market systems (but not in explicitly political allocations of resources), income and wealth generally flow to people in proportion to the value they deliver to others – i.e., the economic value they create for society. Since individuals’ contributions vary greatly, often by many orders of magnitude, the resulting distribution of income not only reasonably rewards people who create value, but it also provides the appropriate value-creation incentives for everyone. Further, people’s wealth is split among their heirs and according to their charitable contributions, and this effect in the real world tends to spread wealth, instead of allowing ever narrower accumulations of it. Thus, lists of individuals’ fortunes increasingly include self-made entrepreneurial successes and ever fewer legacy fortunes. Also, not all capital reaps the average rate of return, and thus some fortunes grow slower than the economy or even disappear altogether in financial losses. And the fact that a loss of X% requires subsequent gains greater than X% to restore the original corpus also works toward wealth spreading.

Another major flaw is that, for Piketty, the value, virtue and efficacy of government spending is never questioned; more is always better by assumption, despite demonstrations by Nobel laureate Friedrich Hayek that rational economic planning is impossible outside competitive markets. Ultimately, his obsession (and that of other progressives) with income and wealth distribution not only completely distorts the real record on these trends but also overlooks the real public interest – namely, economic growth and thus human wellbeing. Capital formation is essential to this goal. He does, however, concede that “the return of high capital/income ratios over the past few decades can be explained in large part by the return to a regime of relatively slow growth.”

Indeed, the table nearby demonstrates broadly this point for the US. It shows that the difference between GDP growth rates in the US and the increases in income inequality have produced much slower total gains for the middle and lower classes in the Bush 41, Bush 43 and Obama administrations than was the case in the Nixon/Ford, Reagan and Clinton administrations. In short, as income growth has slowed – especially during the last decade inequality has risen.

Administration	Annual Growth, Real GDP Per Person	Annual Increase in Income Inequality	GDP Growth Less Income Inequality Increase
Nixon/Ford	1.87%	0.33%	1.55%
Carter	1.67%	0.67%	1.00%
Reagan	2.70%	1.04%	1.66%
Bush 41	0.69%	0.32%	0.37%
Clinton	2.48%	0.84%	1.64%
Bush 43	0.70%	0.25%	0.45%
Obama	1.44%	1.23%	0.20%

9. Nevada Prospects Are Similar to US Prospects: Nevada’s overall tax levels lie toward the middle among the states. The state has long practiced onerous regulation of professions and occupations and has intervened in housing finance in ways adverse to growth. In assisting destructive federal policies in health care, education and energy, state policy further retards growth. Nevada’s demographic and workforce outlook is no better than the national picture, especially due to modest workforce education levels. Further, there is no reason to believe Nevada will do better than other states on non-state debt levels, or on trade and foreign direct investment. Historically, Nevada and the Southwest populations have grown much faster than the US, but their net in-migration has slowed greatly. So, despite faster growth currently than most states, the most prudent forecast for Nevada is growth at the anemic national rates. Moreover, the dominance of the outlook by long-term secular trends obviates fine-tuned state cyclical growth estimates. A notable bright spot is that Nevada has managed conservatively its debt load; so, maintaining its creditworthiness will be assured by continued prudence.

Between 2011 and 2015, Nevada’s state gross domestic product grew meagerly from \$119.3 billion to \$126.2 billion (in constant 2009 dollars). Per capita, that’s a growth rate of -0.15%, ranking 44th among the states in that period. This continued negative growth comes on the heels of an economic recession in which Nevada saw the largest per-capita decline in GDP of any state. Between 2007 and 2010, per-capita GDP shrank by an average of 5.76% annually versus a national shrinkage of 1.26%.

Further, entrepreneurial activity in Nevada remains at historically low levels. As shown in the graph below, startup density, measured by the number of business starts per 100,000 persons, fell roughly 30% between the mid-1990s and recent years, according to Bureau of Labor Statistics data. Non-governmental data sources, providing a longer time series, indicate that startup density has fallen 61% since 1977. This long-run decline in entrepreneurial activity portends a less dynamic state economy. Studies indicate that nearly all net new US job growth is attributable to startups, so future Nevada economic growth prospects may be significantly diminished if entrepreneurial activity does not rebound to historic levels.

10. Economic Outlook In Sum: Government at all levels has long been so big, yet still growing relative to our economy, that it increasingly consumes our time, energy and productivity; crowds out private entrepreneurship and business spending and investment; and thereby stifles economic growth. Until 2002, falling birth rates plus Baby Boomers and women entering the workforce greatly mitigated this problem. Sustained low birth rates leading to small working-age population cohorts, plus somewhat falling rates of workforce participation by women and by men ages 16-54, have lately decreased the fraction of the population working and the producer/dependent ratios that fed earlier growth.

Increasing debt levels relative to the economy, which were mainly driven by policy far into unsustainable territory, promoted growth until the financial crash. Mild retrenchment during the non-recovery has not worked off the overhang; so, slow growth of non-government debt demand will add to the drag on economic growth. Rapid growth of developing economies, plus faster growth of trade and foreign domestic investment also helped greatly until 2009. Growth in most countries has slowed since then because the government overreach, and demographic and work-force participation and debt problems are worse in other major economies. And trade is now growing slower than the world economy. The most reasonable expectation is that these world trends will continue, not improve, despite (or even due to) low commodity and energy prices.

Hence, all four fundamental factors are now driving US economic growth down from the current 2% annual real levels (1% per person), and so human wellbeing will grow much slower in the future than in the last 250 years. The increasing time since the Great Recession also suggests cyclical factors may stunt growth in coming years. Nevada is not exempt from this unfortunate outlook: As detailed above in the section on spending, its public-sector metastasis has been greater and it continues. Other demographic, debt and international trade and investment factors do not portend improvement from the national economic outlook. Nevada's creditworthiness is a single bright spot. However, low economic growth will yield low expected investment returns, greatly challenging management of state retirement and endowment funds.

VII. POLICY PRESCRIPTIONS

Some people have claimed that Nevada has a revenue problem. Some argue that Nevada spends insufficiently on K-12 education and on HSS, although they have not said how much would be "enough" in either case. The analyses herein show that total state spending has increased much faster than the incomes of Nevada families and businesses and that state revenues increased even faster than spending. Hence, with state revenues and spending growing faster than the state economy, Nevada has a spending problem, not a revenue problem.

K-12 spending has increased much faster than incomes and all other state spending except that for HSS, especially with the massive K-12 increases adopted in 2015. The empirical literature is clear that spending increases from current Nevada levels have had little or no effect on student achievement. The increases in HSS spending have been driven by state decisions and federal mandates and financed substantially by federal grants and contributions. Federal support for these programs may be diminished greatly in coming years. So, Nevada faces another major spending problem as it seeks either to rein in spending to reasonable levels determined by its revenues instead of increasing taxes again from unduly high levels.

Nevada's PERS system is managing its investments better than any comparable system, but it has not yet adopted reasonable discount rates for future liabilities for planning and determining contribution rates. It should adopt a rate of 5%, reflecting the realistic total net return assumptions for its investments. PERS also needs to reset working- and retirement-years assumptions to levels that reflect current and prospective demographics to correct a long history of burdening future taxpayers and plan participants with subsidies to retired government employees. The unvarnished good news is that Nevada's credit situation is very sound.

As discussed in the economic outlook section, growth in public spending is a prime reason economic growth in our nation and state has slowed and will continue to be anemic. Further, claims that budgets have been cut are misleading when actual spending and tax/feepayer burden have increased as they have. Public-sector excess is a drag on the economy and it diminishes human wellbeing and fairness in our society. It, not some alleged failure to adequately fund HSS and K-12, is the principal threat to our prosperity and children's welfare. For a long time to come, government in Nevada needs to grow slower than our economy.

Nevada must also work to revitalize the dynamism of its economy and promote genuine entrepreneurship as the path to sustained growth and economic development. Occupational and other licensing laws that are here more onerous than in other states place artificial barriers for enterprising individuals, damage their aspirations, and limiting their earning potential. Cash grants and targeted tax incentives for particular firms with political influence signal official state support for those firms, distort the pattern of investment and discourage genuine entrepreneurship. Nevada must restore hope for its future generations by abandoning these practices and embracing market capitalism and the social mobility it enables.

CPAs & BUSINESS ADVISORS

Independent Auditor's Report

The Honorable Ronald Knecht, MS, JD & PE
State Controller
Carson City, Nevada

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Nevada, as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the State of Nevada's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the following:

- the financial statements of the Housing Division, which is a major fund and 32.33 percent of the assets and deferred outflows of resources, 16.85 percent of net position, and 4.10 percent of the revenues of the business-type activities;
- the financial statements of the Nevada System of Higher Education and the Colorado River Commission, both of which are discretely presented component units and represent more than 99 percent of assets and deferred outflows of resources, net position, and revenues of the discretely presented component units;
- the financial statements of the Self Insurance and Insurance Premiums Internal Service Funds which, in the aggregate, represent less than one percent of the assets and deferred outflows of resources and the net position, and 3.99 percent of the revenues of the aggregate remaining fund information;
- the financial statements of the Pension Trust Funds and the Other Employee Benefit Trust Fund – State Retirees' Fund, which in the aggregate represent 63.70 percent of the assets and deferred outflows of resources, 65.05 percent of the net position and 28.13 percent of the revenues of the aggregate remaining fund information;

- the financial statements of the Nevada College Savings Plan – Private Purpose Trust Fund, which represent 30.87 percent of the assets and deferred outflows of resources, 31.98 percent of the net position and 47.54 percent of the revenues of the aggregate remaining fund information;
- the financial statements of the Retirement Benefits Investment Fund – Investment Trust Fund, which represent less than one percent of the assets and deferred outflows of resources, net position and revenues of the aggregate remaining fund information;
- the financial statements of the Division of Museums and History Dedicated Trust Fund, which represent less than one percent of the assets and deferred outflows of resources, fund balance and revenues of the aggregate remaining fund information.

Those statements were audited by other auditors whose reports have been furnished to us, and our opinion, insofar as it relates to the amounts included for the above-mentioned funds and entities, is based solely on the reports of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The financial statements of the Division of Museums and History Dedicated Trust Fund, the Pension Trust Funds, the Insurance Premiums Internal Service Fund and the Retirement Benefits Investment Fund were not audited in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained, and the reports of other auditors, is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Nevada, as of June 30, 2016, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Correction of Errors

As discussed in Note 18 to the financial statements, the State of Nevada converted from the straight line method of amortizing bond premiums and discounts to the interest method. The change to the interest method resulted in a restatement of net position as of July 1, 2015. In addition, as discussed in Note 18 to the financial statements, the State of Nevada corrected a prior year allocation of an investment loss in the Highway Fund, which resulted in a restatement of net position as of July 1, 2015 in the Highway Fund and the General Fund. Our opinions are not modified with respect to these matters.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 6 through 16, the budgetary comparison information, the notes to required supplementary information-budgetary reporting, the schedule of funding progress, the schedule of infrastructure condition and maintenance data, and the pension plan information collectively presented on pages 90 through 96 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We and the other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State of Nevada's basic financial statements. The introductory section, combining statements and schedules, and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining statements and schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and other auditors. In our opinion, based on our audit, the procedures performed as described above, and the reports of the other auditors, the combining statements and schedules are fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory section (including the transmittal letter and the Controller's analysis and economic outlook) and the statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated December 21, 2016, on our consideration of the State of Nevada's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State of Nevada's internal control over financial reporting and compliance.

MANAGEMENT'S DISCUSSION AND ANALYSIS

State of Nevada management provides this discussion and analysis of the State of Nevada's Comprehensive Annual Financial Report (CAFR) for readers of the State's financial statements. This narrative overview and analysis of the financial activities of the State of Nevada is for the fiscal year ended June 30, 2016. Readers should consider this information in conjunction with the additional information furnished in the letter of transmittal.

HIGHLIGHTS

Government-wide:

- Total assets and deferred outflows of resources of the State exceeded liabilities and deferred inflows of resources by \$6.0 billion (reported as *net position*). Of this amount, \$5.6 billion is net investment in capital assets and \$2.3 billion is restricted for specific uses, neither of which are available to meet the State's general obligations, and a negative \$1.9 billion is reported as an unrestricted deficit, which indicates no funds are available for discretionary purposes.
- The State's total net position increased by \$1.5 billion or 34.5% over the prior year. Net position of governmental activities increased by \$1.1 billion or 30.4%. Net position of business-type activities increased by \$410.9 million or 54.4%.

Fund-level:

- The State's governmental funds reported combined ending fund balances of \$1,864.2 million, an increase of \$301.2 million from the prior year. Of the ending fund balance, \$477.3 million is nonspendable, \$815.0 million is restricted, \$698.3 million is committed and a negative \$126.4 million is unassigned.
- The State's enterprise funds reported combined ending net position of \$1,166.3 million, an increase of \$410.5 million from the prior year. Of the ending net position, \$4.3 million is net investment in capital assets, \$1,153.0 million is restricted, and \$9.0 million is unrestricted.

Capital Assets and Long-term Debt:

- The State's capital assets, net of depreciation, increased by \$667.4 million or 10.7%.
- The State's total bonds payable and certificates of participation payable decreased by \$323.9 million or 9.3%.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is an introduction to the State of Nevada's basic financial statements which are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. The Comprehensive Annual Financial Report also contains other supplementary information in addition to the basic financial statements.

Government-wide Financial Statements:

The *government-wide financial statements* are designed to provide readers with a broad overview of the State of Nevada's finances in a manner similar to the private sector. They take into account all revenues and expenses connected with the fiscal year regardless of when cash is received or paid. The government-wide financial statements include the following two statements:

The *statement of net position* presents *all* of the State's assets, liabilities, and deferred outflows/inflows of resources with the difference being reported as "net position." The statement combines and consolidates all of the State's current financial resources with capital assets and long-term obligations. Over time, increases and decreases in net position measure whether the State's financial position is improving or deteriorating.

The *statement of activities* presents information showing how the State's net position changed during the most recent fiscal year. The statement reveals how much it costs the State to provide its various services, and whether the services cover their own costs through user fees, charges, grants, or are financed with taxes and other general revenues. All changes in net position are reported as soon as the underlying event occurs, regardless of the timing of cash flows. Therefore, some revenue and expenses reported in this statement will not result in cash flows until future fiscal periods (e.g., uncollected taxes earned and unused leave).

Both government-wide statements above report three types of activities:

Governmental Activities – Taxes and intergovernmental revenues primarily support these activities. Most services normally associated with State government fall into this category, including general government, health and social services, education, law, justice and public safety, regulation of business, transportation, recreation and resource development, interest on long-term debt and unallocated depreciation.

Business-type Activities – These activities are intended to recover all, or a significant portion, of the costs of the activities by charging fees to customers. The Housing Division and Unemployment Compensation are examples of the State’s business-type activities.

Discretely Presented Component Units – Discrete component units are legally separate organizations for which their relationship with the primary government meets selected criteria. The State has three discretely presented component units – the Nevada System of Higher Education, the Colorado River Commission and the Nevada Capital Investment Corporation. Complete financial statements of the individual component units can be obtained from their respective administrative offices.

Fund Financial Statements:

A fund is an accounting entity consisting of a set of self-balancing accounts to track funding sources and spending for a particular purpose. The State’s funds are broken down into three types:

Governmental funds – Most of the State’s basic services are reported in governmental funds. These funds focus on short-term outflows and inflows of expendable resources as well as balances left at the end of the fiscal year available to finance future activities. These funds are reported using the flow of current financial resources measurement focus and the modified accrual basis of accounting.

The governmental fund financial statements focus on major funds and provide additional information that is not provided in the government-wide financial statements. It is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government’s near-term financing decisions. A reconciliation is provided between the governmental fund statements and the governmental activities in the government-wide financial statements.

Proprietary funds – When the State charges customers for the services it provides, whether to outside customers (enterprise funds) or to other State agencies (internal service funds), the services are generally reported in the proprietary funds. Proprietary funds apply the accrual basis of accounting utilized by private sector businesses, and there is a reconciliation between the government-wide financial statement business-type activities and the enterprise fund financial statements. Because internal service fund operations primarily benefit governmental funds, they are included with the governmental activities in the government-wide financial statements.

Fiduciary funds – These funds are used to account for resources held for the benefit of parties outside the state government. For instance, the State acts as a trustee or fiduciary for its employee pension plans, and it is also responsible for other assets that, because of a trust arrangement, can be used only for the trust beneficiaries. Fiduciary funds are reported using the accrual basis of accounting. The government-wide statements exclude fiduciary fund activities and balances because these assets are restricted in purpose and do not represent discretionary assets of the State to finance its operations.

Notes to the Financial Statements:

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in both the government-wide and fund financial statements.

Required Supplementary Information:

The required supplementary information includes budgetary comparison schedules for the General Fund and major special revenue funds, along with notes and a reconciliation of the statutory and U.S. generally accepted accounting principles (GAAP) fund balances at fiscal year-end. This section also includes a schedule of pension plan information and a schedule of infrastructure condition and maintenance data.

Other Supplementary Information:

Other supplementary information includes combining financial statements for non-major governmental, non-major enterprise, all internal service and all fiduciary funds. The non-major funds are added together, by fund type, and presented in single columns in the basic financial statements. Other supplementary information contains budgetary schedules of total uses for the General Fund and special revenue fund budgets, as well as a schedule of sources for non-major special revenue fund budgets.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

The State's overall financial position and operations for the fiscal years ended June 30, 2016 and 2015 for the primary government are summarized in the following statements based on the information included in the government-wide financial statements.

State of Nevada's Net Position-Primary Government							
<i>(expressed in thousands)</i>							
	Governmental Activities		Business-type Activities		Total		Total Change
	2016	2015*	2016	2015*	2016	2015*	2016-2015
Assets							
Current and other assets	\$ 4,123,954	\$ 3,637,061	\$ 2,379,222	\$ 2,163,799	\$ 6,503,176	\$ 5,800,860	\$ 702,316

Restricted	1,105,037	976,650	1,153,048	761,710	2,258,085	1,738,360	519,725
Unrestricted (deficit)	(1,888,144)	(2,223,609)	8,873	(21,594)	(1,879,271)	(2,245,203)	365,932
Total net position	\$ 4,804,920	\$ 3,648,254	\$ 1,166,231	\$ 743,907	\$ 5,971,151	\$ 4,392,161	\$ 1,578,990

* The 2015 amounts have not been restated for the change in the method used to amortize bond discounts and premiums; the 2015 restricted and unrestricted net position of business-type activities has been revised to properly reflect the Unemployment Compensation Fund net position as restricted.

Net Position:

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. The State reported net position of \$6.0 billion at the end of 2016, compared with \$4.4 billion at the end of the previous year.

The largest portion of the State's net position (\$5.6 billion or 93.7%) reflects its investment in capital assets such as land, buildings, improvements other than buildings, equipment, software costs, construction in progress, infrastructure and rights-of-way, less any related debt still outstanding that was used to acquire those assets. The State uses these capital assets to provide services to its citizens; consequently, these assets are not available for future spending. Although the State's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the State's net position (\$2.3 billion or 37.8%) represents resources that are subject to external restrictions on how they may be used. At the close of the fiscal year, the State reported an unrestricted net position deficit of \$1.9 billion or (31.5%) as compared to a \$2.2 billion deficit in the prior year. The governmental activities and business-type activities components of the unrestricted net position deficit are discussed below.

The unrestricted net position deficit in governmental activities decreased by \$335.5 million; from a deficit of \$2.2 billion to a total deficit of \$1.9 billion. Changes in governmental activities were a result of several factors, including an increase in the unrestricted fund balance of the General Fund of \$174.9 million and an increase of \$16.7 million in deferred inflows of resources for unrestricted and unavailable revenue recognized as revenue in the government-wide statement of net activities. Of the \$16.7 million increase in deferred inflows of resources for unrestricted and unavailable revenue, approximately \$17.7 million is from rebates for health services and a decrease of \$.9 million in unrestricted tax revenue. In business-type activities the unrestricted net position increased by \$30.5 million from a deficit of \$21.6 million to a net position of \$8.9 million. The increase is primarily due to an increase in the unrestricted net position of the Housing Division fund in the amount of \$9.7 million and an increase in unrestricted net position of the Workers Compensation fund of \$21.4 million.

* The 2015 amounts have been revised to disaggregate expenses for health and social services and education K-12.

Changes in Net Position:

Total government-wide revenues increased by \$1.0 billion during the current year. The increase in revenues is a result of several factors, including increases of \$437.2 million in federal funding, \$149.1 million in modified business taxes, \$143.5 million in commerce taxes, \$60.3 million in cigarette taxes and \$58.2 million in sales and use taxes. Program revenues from charges for services increased by \$64.9 million compared to the prior year.

Governmental activities – The current year net position increased by \$1.1 billion. Approximately 43.4% of the total revenue came from taxes, while 45.6% was in the form of grants and contributions (including federal aid). Charges for various goods and services provided 8.4% of the total revenues (see chart below). The State's governmental activities expenses cover a range of services and the largest expenses were 37.7% for health services, 17.2% for social services, and 15.7% for state support of K to 12 education (see chart below). In 2016, governmental activities expenses exceeded program revenues, resulting in the use of \$3.6 billion in general revenues, which were generated to support the government.

The following chart depicts the governmental activities revenues for the fiscal year:

The following chart depicts the governmental activities expenses for the fiscal year:

The following table depicts the total program revenues and expenses for each function of governmental activities:

	Expenses	Revenues
General government	\$ 206,620	\$ 191,096
Health services	3,509,058	2,807,986
Social services	1,601,995	1,217,490
Education - K-12 state support	1,460,123	4,015
Education - K-12 administration	524,397	278,650
Education - higher education	577,683	-
Law, justice and public safety	709,920	354,537
Regulation of business	299,093	255,648
Transportation	180,224	492,099
Recreation and resource development	144,940	87,080
Total	\$ 9,214,053	\$ 5,688,601

Business-type activities – The current year net position increased by \$410.9 million. Approximately 76.0% of the total revenue came from taxes, while 7.9% was in the form of grants and contributions (including federal aid). Charges for various goods and services provided 16.1% of the total revenues (see chart below). The State’s business-type activities expenses cover a range of services. The largest expenses were 74.1% for unemployment compensation (see chart below). In 2016, business-type activities expenses exceeded program revenues by \$283.0 million. Of this amount, unemployment compensation was the largest, with net expenses of \$326.3 million, resulting in the use of general revenues generated by and restricted to the Unemployment Compensation Fund.

The following chart depicts the business-type activities revenues for the fiscal year:

The following chart depicts the business-type activities expenses for the fiscal year:

The following table depicts the total program revenues and expenses for each function for business-type activities:

	Expenses		Revenues	
Unemployment compensation	\$	342,279	\$	15,945
Housing		27,099		30,560
Water loans		4,962		28,097
Workers' compensation		31,024		41,875
Higher education tuition		25,108		28,635
Other		31,471		33,829
Total	\$	461,943	\$	178,941

The State's overall financial position improved over the past year. Current year operations resulted in a \$1.1 billion increase in the net position of the governmental activities and a \$410.9 million increase in the net position of the business-type activities. Nevada continues to recover at a slow pace. Key economic indicators from the State's sales and other taxes continue to show positive growth. Tax revenues for governmental activities increased in the current fiscal year \$455.4 million or 11.1% compared to an increase of \$296.8 million or 7.8% in the prior fiscal year. In addition, operating grants and contributions for governmental activities increased \$454.1 million primarily due to Medicaid receipts. In the Highway Fund, intergovernmental revenues increased \$164.3 million primarily due to an increase in federal aid, while motor and special vehicle taxes increased \$12.0 million and driver's license and motor carrier fees increased \$14.8 million.

FINANCIAL ANALYSIS OF THE STATE'S FUNDS

Governmental Funds:

As of the end of the current fiscal year, the State's governmental funds reported combined ending fund balances of \$1.9 billion, an increase of \$301.2 million from the prior year. Of these total ending fund balances, \$477.3 million or 25.6% is nonspendable, either due to its form or legal constraints, and \$815.0 million or 43.7% is restricted for specific programs by external constraints, constitutional provisions, or contractual obligations. An additional \$698.3 million or 37.5% of total fund balance has been committed to specific purposes. Committed amounts cannot be used for any other purpose unless approved by the Legislature. Included in committed fund balance is \$63.9 million for fiscal emergency. NRS 353.288 provides for the Account to Stabilize the Operation of the State Government (Stabilization Account) in the State General Fund. Additions to the stabilization account are triggered at the end of a fiscal year if the General Fund unrestricted fund balance (budgetary basis) exceeds 7% of General Fund operating appropriations, in which case forty percent of the excess is deposited to the Stabilization Account. Expenditures may occur only if actual revenues for the biennium fall short by 5% or more from anticipated revenues, or if the Legislature and Governor declare that a fiscal emergency exists. Additions to the Stabilization Account were \$63.9 million in the current fiscal year and \$0 in the prior fiscal year. The remaining negative \$126.4 million or (6.8%) of fund balance is unassigned. The major funds are discussed more fully below.

The General Fund is the chief operating fund of the State. At the end of the current fiscal year, the total General Fund fund balance was \$398.2 million compared to \$207.3 million in the prior fiscal year, before restatement. The fund balance increased by \$190.9 million or 92.1%, of which \$4.1 million or 2.0% is a decrease to beginning fund balance due to a prior period adjustment, leaving a fund balance increase of \$195.0 million or 95.9% during the current fiscal year. Reasons for this increase are discussed in further detail below. The negative unassigned fund balance of \$126.4 million is mostly due to an accrual for Medicaid expenditures and for unearned gaming taxes and mining taxes already collected and budgeted but not yet recognized as revenues.

The following schedule presents a summary of revenues of the General Fund for the fiscal years ended June 30, 2016 and 2015 (expressed in thousands). Other financing sources are not included.

General Fund Revenues (expressed in thousands)						
	2016		2015		Increase (Decrease)	
	Amount	Percent	Amount	Percent	Amount	Percent
Gaming taxes, fees and licenses	\$ 896,768	10.3%	\$ 894,805	11.3%	\$ 1,963	0.2%
Sales taxes	1,214,113	13.9%	1,161,893	14.6%	52,220	4.5%
Modified business taxes	561,779	6.5%	411,914	5.2%	149,865	36.4%
Insurance premium taxes	309,114	3.6%	292,665	3.7%	16,449	5.6%
Lodging taxes	167,160	1.9%	150,480	1.9%	16,680	11.1%
Cigarette taxes	153,033	1.8%	92,774	1.2%	60,259	65.0%
Commerce taxes	143,507	1.7%	-	0.0%	143,507	100.0%
Property and transfer taxes	80,169	0.9%	67,696	0.8%	12,473	18.4%
Motor and special fuel taxes	2,338	0.0%	2,466	0.0%	(128)	-5.2%
Other taxes	327,976	3.8%	330,931	4.2%	(2,955)	-0.9%
Intergovernmental	4,358,111	50.0%	4,081,581	51.3%	276,530	6.8%
Licenses, fees and permits	353,306	4.1%	305,079	3.8%	48,227	15.8%
Sales and charges for services	72,635	0.8%	70,877	0.9%	1,758	2.5%
Interest and investment income	8,445	0.0%	(337)	0.0%	8,782	2605.9%
Other revenues	61,293	0.7%	87,208	1.1%	(25,915)	-29.7%
Total revenues	\$ 8,709,747	100.0%	\$ 7,950,032	100.0%	\$ 759,715	9.6%

The total General Fund revenues increased \$759.7 million or 9.6%. The largest increases in revenue sources were \$276.5 million or 6.8% in intergovernmental revenues, \$149.9 million or 36.4% in modified business taxes, \$143.5 million or 100% in commerce taxes, \$60.3 million or 65.0% in cigarette taxes, and \$52.2 million or 4.5% in sales taxes. Intergovernmental revenues primarily increased by \$256.1 million in receipts for Medicaid, \$43.3 million in receipts for food stamps, and \$20.9 million for school lunch program. The largest decline in revenue sources was \$25.9 million or 29.7% in other revenues and \$3.0 million or .9% in other taxes. In other revenues, the decrease is primarily due to \$19.3 million of settlement income recorded in the prior year.

The following schedule presents a summary of expenditures by function of the General Fund for the fiscal years ended June 30, 2016 and 2015 (expressed in thousands). Other financing uses are not included.

General Fund Expenditures (expressed in thousands)

	2016		2015*		Increase (Decrease)	
	Amount	Percent	Amount	Percent	Amount	Percent
General government	\$ 127,247	1.5%	\$ 128,236	1.6%	\$ (989)	-0.8%
Health services	3,535,984	41.2%	3,343,666	41.4%	192,318	5.8%
Social services	1,510,685	17.6%	1,423,021	17.6%	87,664	6.2%
Education - K-12 state support	1,460,123	17.0%	1,474,155	18.3%	(14,032)	-1.0%
Education - K-12 administrative	524,747	6.1%	417,104	5.2%	107,643	25.8%
Education - higher education	549,228	6.5%	486,937	6.0%	62,291	12.8%
Law, justice and public safety	473,774	5.5%	450,754	5.6%	23,020	5.1%
Regulation of business	276,859	3.2%	233,072	2.9%	43,787	18.8%
Recreation, resource development	115,883	1.4%	113,164	1.4%	2,719	2.4%
Debt service	3,368	0.0%	3,251	0.0%	117	3.6%
Total expenditures	\$ 8,577,898	100.0%	\$ 8,073,360	100.0%	\$ 504,538	6.3%

* The 2015 amounts have been revised to disaggregate expenditures for health and social services and education K-12.

The total General Fund expenditures increased 6.3%. The largest increases in expenditures were \$192.3 million or 5.8% in health services expenditures, \$87.7 million or 6.2% in social services expenditures, \$107.6 million or 25.8% in education K to 12 administrative expenditures, and \$62.3 million or 12.8% in higher education. Health services expenditures increased due to expansion of the Medicaid program. The largest decrease was \$14.0 million or 1.0% of expenditures for education K to 12 state support.

The State Highway Fund is a special revenue fund used to account for the maintenance, regulation and construction of public highways and is funded through vehicle fuel taxes, federal funds, other charges and bond revenue. The fund balance increased by \$198.8 million or 59.5%, of which \$4.1 million or 1.2% is an increase to beginning fund balance due to a prior period adjustment, leaving an increase of \$194.7 million or 58.3% during the current fiscal year compared to a 5.6% decrease in the prior year. This was primarily due to an increase in intergovernmental revenues of \$164.3 million or 52.0% and other taxes of \$30.8 million or 151.2%. The increase in other taxes is due to the Legislative allocation to the Highway Fund of \$25.6 million in motor vehicle government services tax commissions and penalties allocated to the General Fund in 2015. Expenditures increased as spending for three major road construction projects, Project NEON, USA Parkway and the Boulder City Bypass, increased.

The Municipal Bond Bank Fund is a special revenue fund used to account for revenues and expenditures associated with buying local government bonds with proceeds of State general obligation bonds. The fund balance decreased by \$133.5 million during the current fiscal year, which is a 58.3% decrease from the prior year. This decrease was primarily due to the refunding of local government bonds of \$173.5 million offset by \$47.3 of new bonds and the State's refunding and payment of principal of \$7.4 million.

The Permanent School Fund is a permanent fund used to account for certain property and the proceeds derived from such property, escheated estates, and all fines collected under penal laws of the State, which become permanent assets of the fund. All earnings on the assets are to be used for education. The fund balance increased by \$7.6 million during the current fiscal year, which is a 2.3% increase from the prior year. This increase is primarily due to \$2.7 million increase in investment income.

Proprietary Funds:

The State's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail. Proprietary funds are comprised of two types: enterprise funds and internal service funds. Enterprise funds are used when goods or services are provided primarily to parties outside of the State while internal service funds are used when goods or services are provided primarily to State agencies.

Enterprise Funds – There are four major enterprise funds: Housing Division Fund, Unemployment Compensation Fund, Water Projects Loans Fund and the Higher Education Tuition Trust Fund. The combined net position of the four major funds is \$1,146.4 million, the net position of the nonmajor enterprise funds is \$19.9 million and the total combined net position of all enterprise funds is \$1,166.3 million. The combined net position of all enterprise funds increased by \$ 421.9 million in 2016, of which \$11.4 million is an increase to beginning net position due to the change in the method used to calculate bond premium amortization. The major enterprise funds are discussed below:

The Housing Division Fund was created for the purpose of making available additional funds to assist private enterprise and governmental agencies in providing safe and sanitary housing facilities and provides low interest loans for first-time homebuyers with low or moderate incomes. The net position increased by \$3.4 million or 1.8%, resulting in an ending net position of

\$196.5 million. Revenues from interest on loans increased by 15.9% reflecting Nevada's improving but still recovering housing market. Operating expenses increased by \$3.8 million, and operating revenues increased by \$1.9 million.

The Unemployment Compensation Fund accounts for the payment of unemployment compensation benefits to unemployed State citizens. The net position increased by \$391.4 million during the current fiscal year, of which \$10.4 million is an increase to beginning net position due to the change in the method used to calculate the bond premium amortization from straight-line to the interest method, resulting in an ending net position of \$501.3 million. This increase in net position is primarily due to operating revenues exceeding expenses by \$236.5 million and a transfer of \$149.5 million from the Unemployment Comp Bond Fund for special bond contributions assessed on employers for payment of principal and interest on Unemployment Compensation Bonds. During fiscal year 2016, \$338.3 million of unemployment compensation benefits was paid to unemployed State citizens compared to \$369.7 million paid in fiscal year 2015, representing a 8.5% decrease in claims expense.

The Water Projects Loans Fund issues loans to governmental and private entities for two programs: Safe Drinking Water and Water Pollution Control. The federal EPA matches the State's bond proceeds to make loans to governmental entities; only federal funds are loaned to private entities. The net position increased by \$22.3 million during the current fiscal year, of which \$1.0 million is an increase to beginning net position due to the change in method used to calculate the bond premium amortization from straight-line to the interest method, for a final net position of \$389.6 million, which is a 6.1% increase from the prior year.

The Higher Education Tuition Trust Fund provides a simple and convenient way for Nevada families to save for a college education through the advance payment of tuition. A purchaser enters into a contract for the future payment of tuition for a specified beneficiary. The contract benefits are based on in-state rates for Nevada public colleges, but can be used towards costs at any accredited, nonprofit, private or out-of-state college. The Trust Fund completed its eighteenth enrollment period during the fiscal year with 964 new enrollments. The net position increased \$6.0 million or 11.2% during the current fiscal year.

Internal Service Funds – The internal service funds charge State agencies for goods and services such as building maintenance, purchasing, printing, insurance, data processing and fleet services in order to recover the costs of the goods or services. Rates charged to State agencies for the operations of internal service funds are adjusted in following years to offset gains and losses. Because these are allocations of costs to other funds, they are not included separately in the government-wide financial statements but are eliminated and reclassified as either governmental activities or business-type activities. In 2016, total internal service fund net position increased by \$1.2 million, for a final net position of \$6.3 million. The two largest funds are:

The Self-Insurance Fund accounts for group health, life and disability insurance for State employees and retirees and certain other public employees. Net position decreased by \$6.2 million or 7.8% during the current fiscal year, for a final net position of \$73.8 million. The decrease was considered a normal fluctuation in insurance premium income and in claims expense.

The Information Services Fund accounts for designing, programming, and maintaining data processing software and operating the State's central computer facility and telecommunication system. The net position deficit decreased by \$2.3 million or 15.0% during the current fiscal year, resulting in a total net position deficit of \$12.9 million. The deficit decrease is primarily the result of increase in transfers from other funds.

ANALYSIS OF GENERAL FUND BUDGET VARIATIONS

The General Fund budgetary revenues and other financing sources were \$574.7 million or 5.5% less than the final budget, primarily because actual intergovernmental revenues received were less than the final budgeted amount. Intergovernmental revenues represent federal grants, and there are timing differences arising from when grants are awarded, received and spent. The final budget can include grant revenue for the entire grant period, whereas the actual amount recorded represents grant revenue received in the current year.

The net increase in the General Fund expenditures and other uses budget from original to final was \$613.2 million. Some of the differences originate because the original budget consists only of those budgets subject to legislative approval through the General Appropriations Act and the Authorizations Bill. The non-executive budgets, not subject to legislative approval, only require approval by the Budget Division and if approved after July 1, are considered to be revisions. Increases due to the non-executive budgets approved after July 1 and increased estimated receipts were approximately \$610.9 million.

CAPITAL ASSETS AND LONG-TERM DEBT ADMINISTRATION

Capital Assets:

The State's capital assets for governmental and business-type activities as of June 30, 2016 amount to \$8.1 billion, net of accumulated depreciation of \$1.2 billion, leaving a net book value of \$6.9 billion. This investment in capital assets includes land, buildings, improvements other than buildings, equipment, software costs, infrastructure, rights-of-way, and construction in progress. Infrastructure assets are items that are normally immovable, such as roads and bridges.

As allowed by GASB Statement No. 34, the State has adopted an alternative process for recording depreciation expense on selected infrastructure assets. Under this alternative method, referred to as the modified approach, the State expenses certain maintenance and preservation costs and does not report depreciation expense on infrastructure. Utilization of this approach requires the State to: 1) commit to maintaining and preserving affected assets at or above a condition level established by the State; 2) maintain an inventory of the assets and perform periodic condition assessments to ensure that the condition level is being maintained; and 3) make annual estimates of the amounts that must be expended to maintain and preserve assets at the predetermined condition levels. To monitor the condition of the roadways the State uses the International Roughness Index (IRI). In 2016, the State realigned its goals to maintain a certain percentage of each category of its roadways. The realignment was based on the Pavement and Bridge Condition Notice of Proposed Rulemaking released by the Federal Highway Administration (FHWA). The new policy is to maintain each category with an IRI of 95 or less. The prior policy was to maintain each category with an IRI of 80 or less. The first table shows the most current condition assessment under the State's new policy and the second table shows the condition assessment under the prior policy:

	Condition Level of the Roadways				
	Percentage of roadways with an IRI of less than 95				
	Category				
	I	II	III	IV	V
State Policy-minimum percentage	70%	65%	60%	40%	10%
Actual results of 2015 condition assessment	87%	82%	85%	45%	13%

	Condition Level of the Roadways				
	Percentage of roadways with an IRI of less than 80				
	Category				
	I	II	III	IV	V
State Policy-minimum percentage	70%	65%	60%	40%	10%
Actual results of 2014 condition assessment	84%	71%	62%	33%	7%
Actual results of 2012 condition assessment	84%	85%	84%	32%	9%

	Condition Level of the Bridges		
	Percentage of substandard bridges		
	2015	2014	2012
State Policy-maximum percentage	10%	10%	10%
Actual results condition assessment	4%	4%	4%

The estimated amount necessary to maintain and preserve infrastructure assets at target condition levels exceeded the actual amounts of expense incurred for fiscal year 2016 by \$11.2 million. Even though actual spending for maintenance and preservation of infrastructure assets fell below estimates, condition levels are expected to approximately meet or exceed the target condition levels for the roadway category. Additional information on the State's infrastructure can be found in the Schedule of Infrastructure Condition and Maintenance Data in the Required Supplementary Information section to the financial statements.

To keep pace with the demands of the population, the State also has a substantial capital projects program. The following is a summary of major projects in progress or completed during 2016 (expressed in millions):

	<u>Expended by June 30, 2016</u>	<u>Total Budget</u>
Healthcare Reform Software	\$ 49.2	\$ 49.2
Unemployment Insurance Software Development	35.9	40.4
New Readiness Center North Las Vegas	30.9	35.8
Southern Nevada Veterans' Cemetery Expansion	8.4	13.4
NDOT Integrated Right of Way Software	8.4	9.3
Energy Retrofit Projects	5.5	6.2
Statewide Roofing Projects	4.0	6.9
Southern Desert CC Distribution Switchgear & Panelboards	0.2	4.1

Additional information on the State's capital assets can be found in Note 7 to the financial statements.

Long-term Debt Administration:

As of year-end, the State had \$3.2 billion in bonds and certificates of participation outstanding, compared to \$3.5 billion last year, a decrease of \$323.9 million or 9.3% during the current fiscal year. This decrease was due primarily to the payment of principal on debt.

The most current bond ratings from Fitch Investor Service was AA+, Moody's was Aa2, and Standard and Poor's ratings were AA or AAA. These ratings are an indication of high quality obligations and a reflection of sound financial management. The Constitution of the State limits the aggregate principal amount of the general obligation debt to 2% of the total reported assessed property value of the State.

New bonds issued during the 2016 fiscal year were (expressed in thousands):

General Obligation Capital Improvement and Refunding Bonds	11/4/2015D	\$ 248,935
General Obligation Natural Resources and Refunding Bonds	11/4/2015E	21,133
General Obligation Municipal Bond Bank	11/4/2015F	47,305
General Obligation Open Space, Parks, Natural Resources and Refunding Bonds	11/4/2015G	9,350
Special Obligation Highway Revenue Improvement and Refunding Bonds	3/9/2016	292,600
General Obligation Safe Drinking Water Revolving Fund Matching and Refunding Bonds	11/4/2015H	10,845
General Obligation Natural Resources and Refunding Bonds Marlette Lake	11/4/2015E	1,462
Housing Multi-Unit Agate Avenue	7/1/2015	2,881
Housing Multi-Unit Landsman Gardens	9/28/2015	414
Housing Multi-Unit Agate Seniors II	1/7/2016	6,467
Housing Multi-Unit 501 Lamb Apartment	12/18/2015	4,868
Housing Multi-Unit Terracina	8/26/2015	9,393
Housing Multi-Unit Boulder Pines II	5/26/2016	2,109

Additional information on the State's long-term debt obligations can be found in Note 10 to the financial statements and in the Statistical Section.

Requests for Information

This financial report is designed to provide a general overview of the State of Nevada's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to: State of Nevada, Office of the State Controller, 101 N. Carson Street, Suite 5, Carson City, NV 89701 or visit our website at: www.controller.nv.gov.

BASIC FINANCIAL SECTION

Amelia Earhart flew over Nevada many times and often visited friends in Carson City and Lake Tahoe. In 1928 she crashed in rural Lincoln County but was unhurt. Here, in 1931, she appears (third from the right) in Lovelock while piloting an autogiro across the state. She made stops in Wendover, Elko, Battle Mountain, Lovelock and Reno.

Reconciliation of the Governmental Funds Balance Sheet to the Statement of Net Position

NEVADA

June 30, 2016

Total fund balances - governmental funds		\$ 1,864,204,227
Amounts reported for governmental activities in the statement of net position are different because:		
Capital assets used in governmental activities are not financial resources and therefore are not reported in the funds. These assets consist of:		
Land	\$ 150,951,465	
Construction in progress	224,702,425	
Infrastructure assets	4,591,399,157	
Rights-of-way	654,989,854	
Buildings	1,714,407,558	
Improvements other than buildings	124,758,260	
Furniture and equipment	372,960,895	
Software costs	171,777,736	
Accumulated depreciation/amortization	<u>(1,164,022,986)</u>	
Total capital assets		6,841,924,364
Some of the State's revenues collected after year-end are not available soon enough to pay for the current period's expenditures and, therefore, are reported as unavailable deferred inflows of resources in the funds.		
		397,482,263
Intergovernmental receivable not providing current resources.		
		221,045
Amounts due to component unit for bonds authorized to be issued are not reported in the funds as they are not due and payable.		
		(24,362,000)
Internal service funds are used by management to charge the costs of certain activities to individual funds. The assets, deferred outflows of resources, liabilities, and deferred inflows of resources of the internal service funds are included in governmental activities in the statement of net position.		
		6,441,270
The loss on early retirement of debt is reported as a deferred outflow of resources on the statement of net position and is amortized over the original remaining life of the old debt, or the life of the new debt, whichever is less.		
		80,786,385
Deferred outflow of resources related to pensions are not reported in the governmental funds.		
		195,525,183
Deferred inflow of resources related to pensions are not reported in the governmental funds.		
		(344,023,305)
Certain liabilities for settlement agreements are not due and payable in the current period and therefore are not reported in the funds.		
		(16,620,000)
Some liabilities are not due and payable in the current period and therefore are not reported in the funds. Those liabilities consist of:		
Net pension obligation	(1,813,890,034)	
Bonds payable	(2,162,514,398)	
Accrued interest on bonds	(20,987,906)	
Certificates of participation	(90,716,191)	
Capital leases	(19,527,807)	
Compensated absences	(89,023,127)	
Total long-term liabilities	<u>(4,196,659,463)</u>	
Net position of governmental activities		<u>\$ 4,804,919,969</u>

The notes to the financial statements are an integral part of this statement.

Reconciliation of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds to the Statement of Activities

NEVADA

For the Fiscal Year Ended June 30, 2016

Net change in fund balances - total governmental funds \$ 301,158,798

Amounts reported for governmental activities in the statement of activities are different because:

Capital outlays are reported as expenditures in governmental funds. However, in the statement of activities, the cost of capital assets is allocated over their estimated useful lives as depreciation expense. In the current period, the amounts are:

Capital outlay	\$ 735,171,498	
Depreciation expense	(69,112,132)	
Excess of capital outlay over depreciation expense		666,059,366

Debt proceeds provide current financial resources to governmental funds; however, issuing debt increases long-term liabilities in the statement of net assets. In the current period, proceeds were received from:

Bonds issued	(272,070,000)	
Refunding bonds issued	(347,253,000)	
Premiums on debt issued	(114,211,578)	
Total bond proceeds		(733,534,578)

Repayment of long-term debt is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the statement of net position. In the current year, these amounts consist of:

Bond principal retirement	378,419,677	
Certificates of participation retirement	2,710,000	
Payments to the bond refunding agent	419,992,607	
Capital lease payments	1,959,384	
Total long-term debt repayment		803,081,668

Internal service funds are used to charge the costs of certain activities to individual funds. The change in net position of the internal service funds is reported with governmental activities.

770,574

Because some revenues will not be collected for several months after the State's fiscal year end, they are not considered "available" and are not reported as revenues in the governmental funds. Unavailable deferred inflows of resources changed by this amount.

126,677,179

In the statement of activities, the gain or loss on the sale of assets is reported, whereas in the governmental funds, only the proceeds from the sale increase financial resources. Thus, the the change in net assets differs from the change in fund balance by the cost of the asset sold.

(931,523)

Amortization of deferred loss on early retirement of debt is reported as an expense for the statement of activities.

(13,262,832)

Amortization of premiums on bonds and certificates of participation is reported as a reduction of interest expense for the statement of activities.

30,408,854

Some items reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds. These activities consist of the net change in:

Pension costs, net	15,376,421	
Accrued interest payable	(3,519,285)	
Compensated absences	6,670,464	
Capital lease receivable	(43,398,670)	
Long term due to component unit	(24,362,000)	
Settlement agreement liability	(11,597,392)	
Total additional expenditures		(60,830,462)

Change in net position of governmental activities \$ 1,119,597,044

The notes to the financial statements are an integral part of this statement.

Putting the parapet and headbed on Boulder Dam

Workers cut and prepare building materials at the Boulder Dam site (1933).

(Photo's Permission Granted by:
Nevada Historical Society)

Workers commute from residences in Boulder City to the Boulder Dam in 1932.

"Jumbo Rigs," like the one shown here, were used to facilitate faster drilling for the tunnels of the Boulder Dam. They consisted of scaffolding mounted onto a truck bed that allowed drillers to work on three levels simultaneously.

A Postcard from 1936 documents the progress of construction on the Boulder Dam.

Note 1 - Summary of Significant Accounting Policies

The accompanying financial statements of the State of Nevada (the State) have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), as prescribed by the Governmental Accounting Standards Board (GASB). GASB is the accepted standard setting body for establishing governmental accounting and financial reporting principles.

A. Description of Government-wide Financial Statements

The Government-wide Financial Statements, which consist of the Statement of Net Position and the Statement of Activities, report information on all non-fiduciary activities of the primary government and its component units. All fiduciary activities, including component units that are fiduciary in nature, are reported only in the fund financial statements. Primary government activities are distinguished between governmental and business-type activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services. The primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

B. Reporting Entity

For financial reporting purposes, the State's reporting entity includes the "primary government" and its "component units." The primary government includes all funds, departments, agencies, and those authorities that are considered an integral part of the State's activities. Component units are legally separate organizations for which the State's elected officials are financially accountable. The State's component units have a June 30 year-end.

The GASB has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization's governing body and either: 1) the ability of the State to impose its will on that organization; or 2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on the State. When the State does not appoint a voting majority of an organization's governing body, GASB requires inclusion in the reporting entity based on financial accountability if: 1) the organization is both fiscally dependent on the State and there is the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on the State; or 2) it would be misleading to exclude the organization.

Fiduciary Component Units: The following fiduciary component units are legally separate from the State. The State is financially accountable for these organizations since it appoints the voting majority of the boards and is able to impose its will on them through the ability to remove appointed members of the organization's governing board. Since

these component units are fiduciary in nature, they are included only in the fund financial statements with the primary government's fiduciary funds. Therefore, these component units are excluded from the government-wide financial statements.

The *Public Employees' Retirement System* (PERS), the *Legislators' Retirement System* (LRS) and the *Judicial Retirement System* (JRS) are administered by a seven-member board appointed by the Governor. PERS is the administrator of a cost-sharing, multiple-employer, defined benefit public employees' retirement system established to provide a reasonable base income to qualified employees who have been employed by a public employer and whose earning capacities have been removed or substantially impaired by age or disability. LRS is the administrator of a single-employer public employees' defined benefit retirement system established to provide a reasonable base income to Legislators at retirement. JRS is the administrator of an agent multiple-employer public employees' defined benefit retirement system established to provide a reasonable base income to justices of the Supreme Court, district judges, municipal court judges, and justices of the peace at retirement.

The *Retirement Benefits Investment Fund* (RBIF) was created for the sole purpose of providing an investment vehicle for monies belonging to either the State or local government other post employment benefit trust funds. RBIF is administered by the Retirement Benefits Investment Board, which consists of the same members as the Public Employees' Retirement Board.

Blended Component Unit: The *Nevada Real Property Corporation* (NRPC) is a legally separate organization. The State is financially accountable for NRPC since it appoints the board of directors, and NRPC provides a financial benefit to the State by providing financing services. NRPC was incorporated to finance certain construction projects which include office buildings, a transitional residential facility and a warehouse, all financed by the issuance of certificates of participation. Upon completion of construction, the NRPC leases the facilities to the State. Since the NRPC provides financing services solely to the State, these financial transactions are reported as part of the primary government using the blended method.

Discretely Presented Component Units: A component unit should be included in the reporting entity financial statements using the discrete presentation method if the component unit's governing body is not substantively the same as the governing body of the primary government, the component unit does not provide services entirely or almost entirely to the primary government, and the component unit's total debt outstanding is not expected to be repaid entirely or almost entirely with resources of the primary government. The following

(Note 1 Continued)

discretely presented component units meet these criteria and are reported in a separate column in the government-wide financial statements to emphasize they are legally separate from the State.

The *Nevada System of Higher Education* (NSHE) is a legally separate organization consisting of the institutions of public higher education in Nevada, the NSHE Administration entity, and their component units. NSHE is governed by a Board of Regents elected by the voters. NSHE is considered to be fiscally dependent on the primary government since the State can modify and approve their budgets. In addition, NSHE imposes a financial burden on the primary government since the State provides financial support to NSHE through annual operating and capital appropriations.

The *Colorado River Commission* (CRC) is a legally separate organization responsible for managing Nevada's interests in the water and power resources available from the Colorado River. It is governed by seven commissioners, a majority of whom are appointed by the State: four are appointed by the Governor and three are appointed by the board of directors of the Southern Nevada Water Authority. The State is financially accountable for CRC since bonds issued by the CRC are backed by the full faith and credit of the State of Nevada, which creates the potential for a financial burden to the State. CRC provides services to citizens through the distribution and sale of electric power.

The *Nevada Capital Investment Corporation* (NCIC) is a legally separate organization whose board of directors consists of the State Treasurer, who serves as the chair; five members that are appointed by the primary government; and the Chancellor of NSHE, or his designee. Up to five additional members of the board may be chosen who are direct investors of the corporation. The NCIC is an independent corporation for public benefit, the general purpose of which is to act as a limited partner, shareholder or member to provide private equity funding to businesses located in or seeking to locate in Nevada, and engage in certain industries. The amount invested in the NCIC is not to exceed \$50 million from the State Permanent School Fund. The State is financially accountable for NCIC since it is able to impose its will through veto power by the State Treasurer.

Complete financial statements for each of the individual component units, with the exception of the *Nevada Real Property Corporation*, which has no other financial activity than that described above, may be obtained at that organization's administrative offices:

Related Organizations: The Governor is responsible for appointing the members of many boards and commissions. The State's accountability for these entities does not extend beyond making the appointments and thus these entities are excluded from this report. The State does not exercise financial or administrative control over the excluded boards and commissions.

C. Basis of Presentation

Government-Wide Financial Statements: While separate government-wide and fund financial statements are presented, they are interrelated. On the government-wide financial statements, the governmental activities column incorporates data from governmental funds and internal service funds, while business-type activities incorporate data from the government's enterprise funds. Separate fund financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. As discussed earlier, the State has three discretely presented component units which are shown in a single column in the government-wide financial statements.

In general, the effect of interfund activity has been removed from the government-wide financial statements. Overhead costs have been removed to minimize the double counting of internal activities, but interfund services provided and used have been retained, as their elimination would distort the measurement of the cost of individual functional activities. Internal activities of a reimbursement type nature reduce the expenses of the reimbursed programs. Certain centralized costs have been included as part of the program expenses reported for the various functions and activities. The net amount of interfund receivables and payables between governmental activities and business-type activities are reported as internal balances on the government-wide statement of net position. The net amount of transfers between governmental activities and business-type activities are reported as transfers on the government-wide statement of activities.

Fund Financial Statements: The fund financial statements provide information about the government's funds, including its fiduciary and blended component units. Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide statements. Major individual

(Note 1 Continued)

governmental and enterprise funds are reported as separate columns in the fund financial statements. All remaining governmental and enterprise funds are aggregated and reported as non-major funds.

The State reports the following major governmental funds:

General Fund – this is the State’s primary operating fund. It accounts for all financial resources of the general government except those required to be accounted for in another fund.

State Highway Fund - accounts for the maintenance, regulation, and construction of public highways and is funded through vehicle fuel taxes, federal funds, and other charges.

Municipal Bond Bank Fund - accounts for revenues and expenditures associated with buying local governments’ bonds with proceeds of State general obligation bonds.

Permanent School Fund - accounts for certain property and the proceeds derived from such property, escheated estates, and all fines collected under penal laws of the State, which become permanent assets of the fund. All earnings on the assets are to be used for education.

The State reports the following major enterprise funds:

Higher Education Tuition Trust Fund – accounts for the State program to assist Nevada residents in locking in the cost of future higher education expenses for Nevada colleges and universities. This program is financed through the sale of prepaid tuition contracts.

Housing Division Fund - accounts for the State program to assist private lenders in providing low interest housing loans to low- and moderate-income households. This program is financed through the sale of bonds.

Unemployment Compensation Fund - accounts for the payment of unemployment compensation benefits.

Water Projects Loans Fund - accounts for revenues and expenses associated with operating a revolving fund to finance local government pollution control projects, and with operating revolving and set-aside program funds to finance local public water systems’ safe drinking water projects.

Additionally, the State reports the following fund types:

Internal Service Funds - provide goods or services primarily to other agencies or funds of the State rather than to the general public. These goods and services include accounting, communications, information technology, fleet services, personnel, printing, property management, purchasing and risk management. In the government-wide statements, internal service funds are included with governmental activities.

Pension and Other Employee Benefit Trust Funds - report resources that are required to be held in trust for the members and beneficiaries of the State’s defined benefit pension plans and other post-employment benefit plans.

Investment Trust Funds - report resources received from local governments that are either pooled in an external investment portfolio for the benefit of all participants or separated into subaccounts of identified investments allocated to specific participating local governments. Examples include the Local Government Investment Pool, the Nevada Enhanced Savings Term and the Retirement Benefits Investment Fund.

Private Purpose Trust Funds - report resources of all other trust arrangements in which principal and income benefit individuals, private organizations, or other governments. Examples include the Prisoners’ Personal Property and the Nevada College Savings Plan.

Agency Funds - report assets and liabilities for deposits and investments entrusted to the State as an agent for others. Examples of funds in this category include state agency fund for bonds, motor vehicle, and child support disbursement.

D. Measurement Focus and Basis of Accounting

The accounting and financial reporting treatment is determined by the applicable measurement focus and basis of accounting. Measurement focus indicates the type of resources being measured, such as current financial resources or economic resources. The basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

The government-wide statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of cash flows. Grants and similar items are recognized as revenues as soon as all eligibility requirements imposed by the provider have been met.

The governmental fund statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized when susceptible to accrual; that is, when they become both measurable and available. “Measurable” means the amount of the transaction can be determined, and “available” means collectible within the current period or soon enough thereafter to pay liabilities of the current period. The State considers revenues to be available if they are collected within 60 days after year-end. Those revenues susceptible to accrual are gaming revenues, sales taxes, other taxes as described in Note 14, interest revenue and charges for services. Fines and permit revenues are not susceptible to accrual because they are generally not measurable until received in cash.

(Note 1 Continued)

Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences, and claims and judgments are recorded only when payment is due or when amounts have been accumulated in the debt service fund for payments to be made early in the following year. General capital asset acquisitions are reported as expenditures in governmental funds. Issuance of long-term debt and acquisitions under capital leases are reported as other financing sources.

The proprietary, pension and other employee benefit trust, investment trust, and private-purpose trust funds are reported using the economic resources measurement focus and the accrual basis of accounting. The agency funds have no measurement focus but utilize the accrual basis of accounting for reporting assets and liabilities.

E. Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance

Cash and Pooled Investments - The State Treasurer manages a cash pool where all temporary surplus cash is invested. These investments are reported on the Statement of Net Position and Balance Sheet as cash and pooled investments. Earnings from these pooled investments are credited to the General Fund and certain other funds that have specific statutory authority to receive a prorated share based on daily cash balances. Also included in this category is cash held by departments in petty cash funds and in bank accounts outside the Treasurer's cash management pool. The operations and investments of the cash pool are described in Note 3.

Cash and cash equivalents are defined as bank accounts, petty cash, money market demand accounts and certificates of deposit with original maturities of three months or less. Cash and cash equivalents are reported in the Statement of Cash Flows for proprietary fund types.

Investments - Investments are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Short-term investments are generally reported at cost, which approximates fair value, except for the short-term investments of the Nevada College Savings Plan that are valued at amortized cost, which approximates fair value. Securities, traded on a national or international exchange, are valued at the last reported sale price of the day. International securities prices incorporate end-of-day exchange rates. The fair value of real estate investments is based on estimated current value, and MAI (Member Appraisal Institute) independent appraisals. Investments that do not have an established market are reported at estimated fair value.

The Local Government Investment Pool, the Nevada Enhanced Savings Term Investment Trust and the Retirement

Benefits Investment Fund are reported as investment trust funds. The investments of the Local Government Investment Pool and the Nevada Enhanced Savings Term Investment Trust are subject to the general limitations of NRS 355.170. The investments of the Retirement Benefits Investment Fund are governed by the prudent person standard, as set forth by NRS 286.682. Security transactions are accounted for on the trade date (the date the order to buy or sell is executed). Interest income is determined on an accrual basis with discounts earned and premiums paid being amortized. Realized gains and losses, if any, on sales of securities are calculated using the amortized cost basis at the date of sale. The fair value of the position in the pool is the same as the value of the pool shares. The Bank of New York Mellon is the custodian and transfer agent for the Local Government Investment Pool, the Nevada Enhanced Savings Term Investment Trust and the Retirement Benefits Investment Fund.

Derivatives are generally valued at quoted market value. Under the circumstance where quoted market values are not considered to be readily available, such derivatives are reported at estimated fair value and the methods and significant assumptions used are described in Note 3D. Investments are discussed further in Note 3.

Receivables - Receivables represent amounts due to the State at June 30, which will be collected sometime in the future. In the government-wide financial statements, a corresponding amount is recorded as revenue. In the governmental fund financial statements, the portions considered "available" (i.e., received by the State within approximately 60 days after year-end) are recorded as revenue; the remainder is recorded as deferred inflows of resources, unavailable revenue. Receivables in proprietary fund types have arisen in the ordinary course of business. All receivables are shown net of an allowance for uncollectible accounts. Significant receivable balances not expected to be collected within one year are presented in Note 4.

Interfund Transactions - The State has two types of interfund transactions:

1. Services rendered and employee benefit contributions are accounted for as revenues, expenditures/expenses in the funds involved.
2. Operating appropriations and subsidies are accounted for as transfers in the funds involved.

Due from/due to other funds and transfers are presented in Note 5.

Inventories - In general, inventories in governmental funds are recorded as expenditures when purchased; however, certain inventories in the General Fund, the Highway Fund, and nonmajor governmental funds are recorded as expenditures at the time individual inventory items are consumed.

(Note 1 Continued)

Inventories are stated at cost on the first-in, first-out basis. Inventory items in the governmental funds are offset by nonspendable fund balance to indicate that they will not be converted to cash.

Prepaid Items – Prepaid items reflect payments for costs applicable to future accounting periods and are recorded in both government-wide and fund financial statements. The cost of prepaid items is recorded as expenditures/expenses when consumed rather than when purchased. Prepaid items in the governmental funds are offset by nonspendable fund balance to indicate that they will not be converted to cash.

Advances to Other Funds - Long-term interfund advances are recorded by the advancing fund as a receivable. These amounts are reported in the nonspendable fund balance in the General Fund to maintain the accountability and to disclose properly the amount available for appropriation. In other governmental funds this amount will be reported in restricted, committed, or assigned fund balances. Repayments are credited to the receivable and corresponding reductions are made in the appropriate fund balance. A summary of interfund advances is presented in Note 5.

Capital Assets and Depreciation - An inventory of State-owned land, buildings and equipment was developed in 1985. All capital assets are recorded in the Statement of Net Position at historical cost or estimated historical cost, based on acquisition of comparable property or agency records, if actual historical cost is not available. Donated capital assets are stated at appraised fair value at the time of donation or estimated fair value at time of donation, based on acquisition of comparable property, if appraised fair value is not available. The government defines capital assets as assets with a unit cost of \$5,000 or more for furniture and equipment, or \$100,000 or more for buildings and improvements, and an estimated useful life in excess of one year. Interest incurred during construction is only capitalized in proprietary funds.

Most capital assets are depreciated principally on a straight-line basis over estimated useful lives of 40 years for structures and 3 to 30 years for improvements, furniture and equipment. The State's significant infrastructure assets utilize the modified approach in which costs to maintain and preserve these assets are expensed and no depreciation expense is recorded. This approach is discussed further in the Required Supplementary Information portion of this report. In the Nevada System of Higher Education, capital assets are defined as assets with an initial unit cost of \$5,000 or more and an estimated useful life in excess of one year. Such assets are stated at cost at the date of acquisition or fair value at date of donation in the case of gifts. Depreciation is computed on a straight-line basis over estimated useful lives of 40 years for buildings, 10 to 15 years for land improvements and 3 to 18 years for library books, machinery and equipment. Additional disclosure related to capital assets is provided in Note 7.

Compensated Absences – A liability for compensated absences relating to services already rendered and that are not contingent on a specified event is accrued as employees earn the rights to the benefits. Compensated absences relating to future services or that are contingent on a specified event will be accounted for in the period those services are rendered or those events take place. Proprietary fund types report accrued compensated absences as liabilities in the appropriate funds. Governmental funds report a liability and expenditure for compensated absences only if the liability has matured as a result of employee resignations or retirements. Thus no expenditure would be recognized in governmental funds for the unpaid balance of compensated absences for employees still in active service at the end of the reporting period. On the Statement of Net Position, the accrued compensated absences for both proprietary and governmental fund types is reported.

Long-Term Obligations - In the government-wide statements and proprietary fund financial statements, long-term debt and other long-term liabilities are reported as liabilities. Bond premiums and discounts are deferred and amortized over the life of the bonds using the interest method. Bonds payable are reported net of the applicable bond premium or discount.

In the fund financial statements, governmental fund types recognize bond premiums and discounts during the current period. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds, are reported as debt service expenditures. Long-Term Obligations are more fully described in Note 10.

Deferred Outflows/Inflows of Resources – In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources, which represents a consumption of net position that applies to a future period and will not be recognized as an outflow of resources (expense/expenditure) until then. An example is the deferred charge on refunding which results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt.

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources, which represents an acquisition of net position that applies to a future period and will not be recognized as an inflow of resources (revenue) until that time. An example is unavailable revenue, reported in the governmental funds balance sheet when revenue is measurable but not available. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available.

(Note 1 Continued)

Net Position/Fund Balance - The difference between fund assets, deferred outflows of resources, liabilities and deferred inflows of resources is “Net Position” on the government-wide, proprietary and fiduciary fund statements, and “Fund Balance” on governmental fund statements.

In governmental fund financial statements, fund balances are classified based primarily on the extent to which the State is bound to observe constraints imposed upon the use of the resources in the fund as follows:

1. Nonspendable fund balance includes items that cannot be spent because they are either not in spendable form (such as inventories, prepaid amounts and the long-term portion of loans/notes receivables) or legally or contractually required to be maintained intact (such as the principal of a permanent fund).
2. Restricted fund balances have constraints placed upon the use of the resources either by an external party or imposed by law through constitutional provisions or enabling legislation.
3. Committed fund balances can be used only for specific purposes pursuant to constraints imposed by a formal action of the government’s highest level of decision-making authority, the Nevada Legislature, through legislation passed into law.
4. Assigned fund balance includes amounts that are constrained by the government’s intent to be used for a specific purpose, but are neither restricted nor committed. Assignments of fund balance are created by the executive branch.
5. Unassigned fund balance is the residual amount of the General Fund not included in the four categories above. Also, any deficit fund balances within the other governmental fund types are reported as unassigned.

Each fund has been analyzed for proper classification of fund balance. Funds are created by the Legislature and money is authorized to be transferred to the fund for a particular purpose. Balances in the Legislatively created funds are at least committed, and may be further restricted depending on whether there is an external party, constitutional provision, or enabling legislation constraint involved. Note 13 provides a disaggregation of governmental fund balances, nonspendable, restricted, committed, and unassigned.

Net Position/Fund Balance Flow Assumptions - The State’s policy is to spend restricted amounts first when an expenditure/expense is incurred for purposes for which both restricted and unrestricted resources are available. Therefore, restricted net position/fund balance is depleted before using unrestricted net position/fund balance. In governmental funds, when an expenditure is incurred for purposes for which amounts in any of the unrestricted fund balance classifications could be used, the assumed order of spending is first committed, assigned and then unassigned.

Minimum Fund Balance Policy - NRS 353.213(3) requires that the proposed budget for each fiscal year of the biennium provide for a reserve of not less than 5% or more than 10% of the total of all proposed appropriations from the State General Fund for the operation of all departments, institutions and agencies of the State and authorized expenditures from the State General Fund for the regulation of gaming for that fiscal year.

Stabilization Arrangement – NRS 353.288 provides for the Account to Stabilize the Operation of the State Government (Stabilization Account) in the State General Fund. Additions to the stabilization arrangement are triggered at the end of a fiscal year if the General Fund unrestricted fund balance (budgetary basis) exceeds 7% of General Fund operating appropriations. Forty percent of the excess is deposited to the Stabilization Account, and is classified on the balance sheet as committed for fiscal emergency. Expenditures may occur only if actual revenues for the biennium fall short by 5% or more from anticipated revenues, or if the Legislature and Governor declare that a fiscal emergency exists. The balance in the Stabilization Account committed for fiscal emergency at June 30, 2016 is \$63,935,955.

Pensions – For purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the PERS, LRS and JRS and additions to/deductions from the plans fiduciary net position have been determined on the same basis as they are reported by PERS, LRS and JRS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

F. Revenues and Expenditures/Expenses

Program Revenues - In the government-wide statement of activities, program revenues include: 1) charges to customers or applicants who purchase, use or directly benefit from goods, services or privileges provided by a given function, and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items not meeting the definition of program revenues are instead reported as general revenues.

Property Taxes – Property taxes are recognized as revenues in the year for which they are levied. Property taxes are levied July 1 on property values assessed by the prior January 1. Property tax billings are payable in quarterly installments on the third Monday in August and the first Monday in October, January and March, after which time the bill is delinquent.

(Note 1 Continued)

Grants – The State participates in various federal award programs which are received in both cash and noncash forms. Grants and other entitlements are recognized as revenues when all eligibility requirements are met, including any time requirements, and the amount is received within 60 days after year-end. Federal reimbursement type grants are recognized as revenue when the qualifying expenditures have been incurred and all other eligibility requirements have been met, and the amount is received within 60 days after year-end. Certain grants have matching requirements in which the State must contribute a proportionate share of the total costs of a program. Use of grant resources is conditioned upon compli-

ance with terms of the grant agreements and applicable federal regulations, which include subjecting grants to financial and compliance audits.

Proprietary Funds Operating and Nonoperating Revenues and Expenses - Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal, ongoing operations. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Note 2 - Budgetary and Legal Compliance

Budgetary Process and Control

The Governor must submit his proposed budget for the Executive Branch to the State Legislature not later than 14 calendar days before each regular session, which convenes every odd-numbered year. The presented budget spans the next two fiscal years and contains the detailed budgetary estimates of revenues and expenditures. The Legislature enacts the budget through passage of the General Appropriations Act, which allows expenditures from unrestricted revenues, and the Authorized Expenditures Act, which allows expenditures from revenues collected for specific purposes. Once passed and signed, the budget becomes the State's financial plan for the next two fiscal years.

The legal level of budgetary control, the level at which appropriations are approved and the level at which over-expenditure of appropriations or transfers of appropriated amounts may not occur without Legislative action, is at the total program level within each department or agency.

Limited budgetary revisions may be made without Legislative action through the following management/administrative procedures. After obtaining the approval of the Governor, or his designee, the Budget Director, Legislative Interim Finance Committee (LIFC) approval is required of those revisions in excess of \$30,000 which have the effect, when taken into consideration with all other changes during the fiscal year, of increasing or decreasing any legislatively approved expenditure level by 10% or \$75,000, whichever is less. Revisions not exceeding this threshold require only Budget Director approval. The LIFC approval is not equivalent to governing body approval, as total appropriations for a program may not be increased except as follows. The Legislature appropriates limited funds to the Contingency Account, in the General Fund, which may be allocated to programs by the LIFC upon recommendation of the Board of Examiners. Allocations totaling \$10,285,226 were made in the 2016 fiscal year.

Unencumbered appropriations lapse at the end of each fiscal year unless specific authority to carry forward is granted in the Appropriations Act. Unexpended authorized resources, under the Authorized Expenditures Act, are carried forward for expenditure in the next fiscal period.

Budgets are legally adopted for the General Fund and Special Revenue Funds, except for the Nevada Real Property Corporation special revenue fund. In addition, certain activity within such funds may be unbudgeted. The State's budget is prepared principally on a modified accrual basis with the following exceptions:

1. Cash placed in petty cash funds or outside bank accounts is considered expended for budgetary purposes.
2. Advances to other funds are considered expenditures. Repayments of such advances are considered revenues.
3. Certain assets, such as prepaid items, are considered expended for budgetary purposes. Inventory is an expenditure for budgetary purposes. Certain unearned revenue is considered revenue for budgetary purposes.
4. Expenditures are only recognized if the liability is liquidated within 45 days after the fiscal year end.
5. Revenue from grants is only recognized when it is received in cash.
6. Encumbrances for goods or services not received by fiscal year-end are considered an expenditure of the current period if received and paid within 45 days.

The Budgetary Comparison Schedule is presented as Required Supplementary Information (RSI) in this report. Actual amounts in this schedule are presented on a budgetary basis. Because this basis differs from accounting principles generally accepted in the United States of America (GAAP), a reconciliation between the budgetary and GAAP basis is presented in the RSI.

Note 3 - Deposits and Investments

The Nevada Revised Statutes (NRS) and Nevada Administrative Code, as well as procedures approved by the State Board of Finance, govern deposits and investing activities for the primary government and its discretely presented component units which are not expressly required by law to be received and kept by another party. NRS 226.110(3) further requires that the Office of the State Treasurer shall establish the policies to be followed in the investment of money of the State of Nevada.

A. Deposits

Primary Government, Private Purpose Trust, Pension and Other Employee Benefit Trust, and Investment Trust Funds - The State minimizes its custodial credit risk by legislation establishing a program to monitor a collateral pool for public deposits. Custodial credit risk for deposits is the risk that in the event of a bank failure, the State's deposits may not be recovered. The NRS direct the Office of the State Treasurer to deposit funds into any state, or national bank, credit union or savings and loan association covered by federal depository insurance. For those deposits over and above the federal depository insurance maximum balance, sufficient collateral must be held by the financial institution to protect the State of Nevada against loss. The pooled collateral for deposits program maintains a 102% pledged collateral for all public deposits. As of June 30, 2016, the bank balance of the primary government, private purpose trust, pension and other employee benefit trust, and investment trust funds totaled \$747,559,255, of which \$48,809,712 was uncollateralized and uninsured.

Component Units - Cash and cash equivalents of the Nevada System of Higher Education (NSHE) are stated at cost, which approximates market, and consist of deposits in money market funds, which are not federally insured, and cash in the bank. At June 30, 2016 NSHE's deposits in money market funds totaled \$206,200,000 and cash in bank was \$8,848,000. Of these balances, \$250,000 are covered by the Federal Depository Insurance Corporation (FDIC); the remaining deposits are uncollateralized and uninsured.

B. Investments

NRS 355.140 details the types of securities in which the State may invest. In general, authorized investments include: certificates of deposit, asset-backed securities, bankers' acceptances and commercial paper, collateralized mortgage obligations, corporate notes, municipal bonds, money market mutual funds whose policies meet the criteria set forth in the statute, United States treasury securities, and specific securities implicitly guaranteed by the federal government. Additionally, the State may invest in limited types of repurchase agreements; however, statutes generally prohibit the State from entering into reverse-repurchase agreements. The State's Permanent

School Fund is further limited by statute as to the types of investments in which it may invest (NRS 355.060). Cash and Investments are also discussed in Note 1 under Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance.

The State Board of Finance reviews the State's investment policies at least every four months. The Board is comprised of the Governor, the State Controller, the State Treasurer and two members appointed by the governor, one of which must be actively engaged in commercial banking in the State.

Investments held in the Local Government Investment Pool (LGIP), Retirement Benefits Investment Fund (RBIF), and Nevada Enhanced Savings Term (NVEST) are specifically identifiable investment securities and are included in the following tables. LGIP, RBIF, and NVEST are investment trust funds and discussed further in Note 1, Assets, Liabilities, Deferred Outflows/Inflows of Resources and Net Position/Fund Balance. LGIP and NVEST are governed by the Nevada State Board of Finance and administered by the Nevada State Treasurer. Complete financial statements for LGIP and NVEST may be obtained from the State Treasurer's Office, 101 N. Carson Street, Suite 4, Carson City, NV 89701. RBIF is administered by the Retirement Benefits Investment Board. The audited financial statements of RBIF may be obtained from the Public Employees' Retirement System, 693 West Nye Lane, Carson City, Nevada 89703.

Interest Rate Risk: Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment.

Primary Government, Private Purpose Trust, Pension and Other Employee Benefit Trust, and Investment Trust Funds - The State minimizes interest rate risk by maintaining an effective duration of less than 1.5 years and holding at least 25% of the portfolio's total market value in securities with a maturity of 12 months or less. However, the benchmark used by the State Treasurer to determine whether competitive market yields are being achieved is the 90 day U.S. Treasury Bill's average over the previous three month period (Rolling 90 day T-Bill). Investment policies for the pension and other employee benefit trust funds authorize all securities within the Barclays Aggregate Index benchmark. If securities are purchased outside the Barclays U.S. Treasury Index, they must be of investment grade rating by at least two of the following: Moody's, Standard & Poor's or Fitch (BBB- or better by Standard & Poor's/Fitch, Baa3 or better by Moody's) except those issued or guaranteed by the U.S. Government or its agencies. The following table provides information about the interest rate risks associated with the State's investments as of June 30, 2016 (expressed in thousands):

(Note 3 Continued)

	Fair Value	Maturities in Years			
		Less Than 1	1-5	6-10	More Than 10
U. S. Treasury securities	\$ 768,764	\$ 146,977	\$ 457,358	\$ 132,267	\$ 32,162
Negotiable certificate of deposit	487,544	485,085	2,459	-	-
U. S. agencies	10,751,086	532,249	6,529,208	1,892,353	1,797,276
Mutual funds	121,479	121,479	-	-	-
Repurchase agreements	358,006	358,006	-	-	-
Asset backed corporate securities	97,680	227	71,730	19,076	6,647
Corporate bonds and notes	340,113	138,595	178,130	11,371	12,017
Commercial paper	374,446	374,446	-	-	-
Fixed income securities	794	794	-	-	-
Municipal bonds	10,792	7,708	3,084	-	-
Investment agreements	175	-	-	-	175
Other short-term investments	294,015	294,015	-	-	-
Other investments	17,162	15,105	2,057	-	-
Total	\$ 13,622,056	\$ 2,474,686	\$ 7,244,026	\$ 2,055,067	\$ 1,848,277

The Nevada College Savings Plan, a private purpose trust, currently has no formal investment policy with regard to interest rate risk for the investments. The mutual funds held by Vanguard, USAA, Upromise, and Putnam have various maturities from 28 days to 13.9 years and are not included in the table above.

Component Units – The Nevada System of Higher Education’s (NSHE) policy for reducing its exposure to interest rate risk is to have an average investment life of at least two years for fixed income securities within both the endowment and operating investment pools. With regard to the trusts included in endowment investments, NSHE is not the trustee of these investments and, therefore, currently has no policies with regard to interest rate risk for these investments. Investments having interest rate risk are principally invested in mutual funds and private commingled funds. The following table provides the segmented time distribution for these investments at June 30, 2016 (expressed in thousands):

Less than 1 year	\$ 206,331
1 to 5 years	135,424
6 to 10 years	159,292
More than 10 years	-
Total	\$ 501,047

Credit Risk: Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the State of Nevada.

Primary Government, Private Purpose Trust, Pension and Other Employee Benefit Trust, and Investment Trust Funds - NRS 355.140, the State Treasurer’s investment policy, and investment policies of the pension and other employee benefit trust and investment trust funds all address credit risk. A summary of the policies is presented as follows:

- Commercial paper, Negotiable Certificates of Deposit, and Bankers’ Acceptances are rated by a nationally recognized rating service as “A-1,” “P-1” or its equivalent, or better,
- Notes, bonds and other unconditional obligations issued by corporations in the U.S. and municipal bonds (effective September 2011) are rated by a nationally recognized rating service as “A” or its equivalent, or better,
- Money market mutual funds are SEC registered 2(A)7 and rated by a nationally recognized rating service as “AAA” or its equivalent,
- Collateralized mortgage obligations and asset-backed securities are rated by a nationally recognized rating service as “AAA” or its equivalent,
- Repurchase agreements with banks or registered broker-dealers provided the agreement is collateralized by 102% with U.S. Treasuries or U.S. government agency securities on a delivery basis.

In addition to the above provisions, investment policies for the pension and other employee benefit trust funds allow investment in corporate bonds, assets related instruments, and foreign debt issued in the U.S. rated by at least two of the following: Moody’s, Standard & Poor’s, or Fitch (BBB- or better by Standard & Poor’s/Fitch, Baa3 or better by Moody’s). The Nevada College Savings Plan, a private purpose trust, currently has no formal investment policy with regard to credit risk for the investments. Investments having credit risk are included in the table below.

The State’s investments as of June 30, 2016 were rated by Standard & Poor’s and/or an equivalent national rating organization, and the ratings are presented below using the Standard & Poor’s rating scale (at fair value, expressed in thousands):

(Note 3 Continued)

	Quality Rating						
	AAA	AA	A	BBB	BB	B	Unrated
Negotiable certificate of deposit	\$ 2,307	\$ 10,007	\$ 172,048	\$ -	\$ -	\$ -	\$ -
U.S. agencies	54,481	700,283	-	-	-	-	-
Mutual funds	1,923	-	-	-	-	-	16,955,948
Repurchase agreements	-	5,006	-	-	-	-	-
Asset backed corporate securities	16,899	69,401	434	646	874	363	-
Corporate bonds and notes	9,835	75,910	147,447	28,453	2,961	446	9,419
Commerical paper	-	-	242,552	-	-	-	-
Fixed income securities	-	-	-	-	-	-	126
Municipal bonds	-	10,791	-	-	-	-	-
Investment agreements	-	-	163	12	-	-	-
Other short-term investments	94,481	203	108,350	-	-	-	182,963
Other Investments	-	6,039	10,089	-	-	-	-
Total	\$ 179,926	\$ 877,640	\$ 681,083	\$ 29,111	\$ 3,835	\$ 809	\$ 17,148,456

Component Unit – The NSHE’s policy for reducing its exposure to credit risk is to maintain a weighted average credit rating of AA or better, and never below A, for investments with credit risk within both the endowment and operating investment pools. With regard to the trusts included in endowment investments, NSHE is not the trustee of these investments and therefore, it currently has no policies with regard to credit risk for these investments. The credit risk profile for NSHE operating and endowment investments at June 30, 2016 is as follows (at fair value, expressed in thousands):

	Unrated
Mutual funds publicly traded	\$ 527,735
Partnerships	95,524
Endowment cash/cash equivalents	130
Trust(s)	4,063
Private commingled funds	145,656
Total	\$ 773,108

Concentration of Credit Risk: Concentration of credit risk is the risk of loss that may be attributed to the magnitude of a government’s investment in a single issuer. The NRS 355.140, 355.060, and the State Treasurer’s investment policy limit the investing in any one issuer to 5% of the total par value of the portfolio. At June 30, 2016, no individual investment exceeded 5% of the total portfolio of the Primary Government.

At June 30, 2016, the following investments exceeded 5% of the Higher Education Tuition Trust’s total investments (expressed in thousands):

	Fair Value	Percentage
Federal Home Loan Mortgage Corp-Asset-Backed Mortgage Security	\$ 16,618	7.42%

The Housing Division currently places no limit on the amount it may invest in any one issuer provided their ratings are in the highest two general rating categories. However, the Housing Division monitors rating changes on all issuers. If warranted, more concentrated investments may have to be diluted to alternative investment providers. As of June 30, 2016, the Housing Division’s investments in Fannie Mae and Ginnie Mae are 3.94% and 42.04% respectively, of the Housing Division’s total investments. The Fannie Mae and Ginnie Mae investments are in mortgage backed securities matched to the interest rate and maturity of the underlying bonds. Because such investments are matched to concomitant liabilities, the Housing Division is less concerned about a concentration risk on these investments.

Component Unit - The Nevada Capital Investment Corporation (NCIC) owns 99% equity interest in Silver State Opportunities Fund LLC (SSOF), a Nevada limited liability company, for the purpose of obtaining income. At June 30, 2016 the investment in equity interest of SSOF exceeded 5% of NCIC’s total investments.

Foreign Currency Risk: Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or deposit.

Primary Government, Pension and Other Employee Benefit Trust Funds, and Investment Trust Funds - The primary government does not have a policy regarding foreign currency risk; however, the State Treasurer’s office does not have any deposits or investments in foreign currency. The PERS, LRS, JRS, and RBIF do have foreign currency policies for deposit and investments, which may be used for portfolio diversification and hedging. Highly speculative positions in currency are not permitted. LRS and JRS had no exposure to foreign currency risk as of June 30, 2016. The following table summarizes the pension and investment trust funds’ exposure to foreign currency risk in U.S. dollars as of June 30, 2016 (expressed in thousands):

(Note 3 Continued)

Currency by Investment and Fair Value				
	Pending			
	Equity	Transactions	Cash	Total
Australian Dollar	\$ 433,885	\$ (200)	\$ 401	\$ 434,086
British Pound Sterling	1,174,188	(400)	1,518	1,175,306
Danish Krone	118,547	-	-	118,547
Euro	1,782,991	(800)	(169)	1,782,022
Hong Kong Dollar	186,619	(100)	1,009	187,528
Israeli Shekel	35,700	-	203	35,903
Japanese Yen	1,395,662	(3,400)	4,370	1,396,632
Norwegian Krone	11,322	-	100	11,422
Polish Zloty	38,633	-	101	38,734
Singapore Dollar	80,370	(100)	622	80,892
Swedish Krona	166,061	-	103	166,164
Swiss Franc	555,155	-	3	555,158
Total	\$ 5,979,133	\$ (5,000)	\$ 8,261	\$ 5,982,394

Private Purpose Trust Fund - The Nevada College Savings Plan, a private purpose trust, currently has no formal investment policy with regard to foreign currency risk for the investments. The Plan consists of Vanguard College Savings Plan, USAA College Savings Plan, Upromise College Fund Plan, and Putnam for America Plan which all state that there are certain inherent risks involved when investing in international securities through mutual funds that are not present with investments in domestic securities, such as foreign currency exchange rate fluctuations, adverse political and economic developments, natural disasters and possible prevention or delay of currency exchange due to foreign governmental laws or restrictions. The investments held in Putnam for America Plan consist of the portfolios managed and sponsored by Putnam Investment Management, Putnam Mutual Funds, and non-Putnam Mutual Funds. Both mutual funds pose no foreign currency risk. The following table summarizes foreign currency risk for the GAA portfolios in U.S. dollars as of June 30, 2016 (expressed in thousands):

Currency at Fair Value	
British Pound	\$ 2
Euro	(11)
Hong Kong Dollar	167
Japanese Yen	(16)
Taiwan Dollar	21
Swedish Krona	1
Swiss Franc	2
Total	\$ 166

Component Unit - The NSHE does not directly invest in foreign currency investments and is therefore not subject to foreign currency risk. However, it has \$176,008,000 in mutual funds in both the operating and endowment pools that are primarily invested in international equities at June 30, 2016.

Fair Value of Investments: The State categorizes the fair value measurements of its investments based on the hierarchy established by generally accepted accounting principles. The fair value hierarchy, which has three levels, is based on the valuation inputs used to measure an asset's fair value: Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. The following table summarizes the fair value measurements of the primary government as of June 30, 2016 (expressed in thousands):

(Note 3 Continued)

	Fair Value	Fair Value Measurements Using		
		Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
Investments by fair value level				
Debt securities				
U.S. Treasury securities	\$ 600,043	\$ 541,818	\$ 58,225	\$ -

C. Securities Lending

Primary Government and Investment Trust Funds - NRS 355.135 authorizes the State Treasurer to lend securities from the investment portfolio of the State if collateral received from the borrower is at least 102% of fair value of the underlying securities and the value of the securities borrowed is determined on a daily basis. There were no securities on loan at June 30, 2016 (excluding PERS).

Public Employees' Retirement System (PERS) - PERS maintains a securities lending program under the authority of the "prudent person" standard of NRS 286.682. Securities loaned under this program consist of U.S. Treasury Obligations, corporate fixed income securities, international fixed income securities, equity securities, and international equity securities. Collateral received consists of cash and securities issued by the U.S. Government, its agencies or instrumentalities. Collateral received for the lending of U.S. securities must equal at least 102% of fair value, plus accrued interest in the case of fixed income securities. Collateral received for the lending of international securities must equal at least 105% of fair value, plus accrued interest in the case of fixed income securities.

At year-end, PERS has no credit risk exposure to borrowers because the associated value of the collateral held exceeds the value of the securities borrowed. PERS has no discretionary authority to sell or pledge collateral received or securities loaned. The contract with the securities lending agent

requires the agent to indemnify PERS for all losses relating to securities lending transactions. There were no losses resulting from borrower default during the period nor were there any recoveries of prior period losses.

PERS may only loan up to 33 1/3% of its total portfolio. Either PERS or the borrower can terminate all securities loans on demand. In September 2013 the Board elected to allow only overnight repurchase agreements collateralized by U.S. government obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities within the reinvestment portfolio. This action effectively eliminated risk in securities lending collateral reinvestment portfolio since securities issued or guaranteed by the U.S. Government are considered to be free of credit risk. The maturities of the investments made with cash collateral generally do not match the maturities of the securities loaned because securities lending transactions can be terminated at will.

The fair value of underlying securities on loan at June 30, 2016 is \$3,954,057,876. Collateral received for outstanding securities lending arrangements consisted of cash in the amount of \$411,128,913 and non-cash in the amount of \$3,635,396,664. The cash collateral is reported on the Statement of Fiduciary Net Position as an asset with a related liability. At June 30, 2016, PERS has collateral consisting of cash and securities issued by the U.S. Government, its agencies or instrumentalities, in excess of the fair value of investments held by brokers/dealers under a securities lending agreement.

(Note 3 Continued)

D. Derivatives

Primary Government – The Office of the State Treasurer’s investment policies do not contain any specific language regarding derivatives other than prohibiting certain types of derivatives such as option contracts, futures contracts, and swaps in the General Portfolios and the Local Government Investment Pool effective June 2012 and November 2015 respectively. The primary government has no exposure to derivatives as of June 30, 2016.

Private Purpose Trust Fund – Certain investments in the Nevada College Savings Plan are managed by Putnam Investment Management through Putnam sponsored portfolios (the Portfolios) and mutual funds. The Portfolios use six types of derivatives: options, futures contracts, forward currency contracts, total return swap contracts, interest rate swap contracts, and credit default contracts. Currently, there is no written investment policy with regard to derivatives for the Portfolios. All six types of derivatives are considered investments. The fair value amount in the table below represents the unrealized appreciation (depreciation) from derivative instruments and is reported in the Statement of Fiduciary Net Position. The net increase (decrease) in fair value is reported as investment income on the Statement of Changes in Fiduciary Net Position. The Portfolios’ investment derivative instruments as of June 30, 2016, and changes in fair value for the year then ended are summarized in the following table (expressed in thousands):

	Contracts/ Notional Amounts	Fair Value	Change in Fair Value
Purchased Options, gross	\$ 2,127	\$ 10	\$ 10
Forward Currency Contracts, net	\$ 48,230	136	202
CC Interest Rate Swap Contracts, gross	\$ 6,525	(34)	(47)
OTC Total Return Swap Contracts, gross	\$ 16,379	(8)	18
OTC Credit Default Contracts, gross	\$ 2,952	(36)	(50)
CC Credit Default Contracts, gross	\$ 9,128	370	437
Futures Contracts, gross	172	(63)	(145)
Total		<u>\$ 375</u>	<u>\$ 425</u>

The Portfolios use options contracts to gain exposure to securities. The potential risk is that the change in value of options contracts may not correspond to the change in value of the managed instruments. In addition, losses may arise from changes in the value of the underlying instruments if there is an illiquid secondary market for the contracts, if interest or exchanged rates move unexpectedly or if the counterparty to the contract is unable to perform. Realized gains and losses on purchased options are included in realized gains and losses on investment securities. Exchange-traded options are valued at the last sale price.

The Portfolios use futures contracts to manage interest rate risk, gain exposure to interest rates, manage prepayment risk, equitize cash, and manage exposure to market risk. The potential risk is that the change in value of futures contracts may not correspond to the change in value of the managed instruments. In addition, losses may arise from changes in the value of the underlying instruments if there is an illiquid secondary market for the contracts, if interest or exchange rates move unexpectedly, or if the counterparty to the contract is unable to perform. Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade. Risks may exceed amounts recognized on the Statement of Fiduciary Net Position. The Portfolios and the broker agree to exchange an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as “variation margin.”

The Portfolios buy and sell forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to manage foreign exchange risk and to gain exposure on currency. The contract is marked to market daily using current forward currency exchange rates supplied by a quotation service. The Portfolios may be exposed to risk if the value of currency changes unfavorably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the Portfolios are unable to enter into a closing position. Risk of loss may exceed amounts recognized on the Statement of Fiduciary Net Position.

The Portfolios entered into OTC total return swap contracts, which are arrangements to exchange a market linked return for a periodic payment, both based on a notional principal amount, to manage sector exposure, manage exposure to specific sectors or industries, manage exposure to specific securities, to gain exposure to basket of securities, to gain exposure to specific markets or countries. To the extent that the total return of the security, index or other financial measure underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Portfolios will receive a payment from or make a payment to the counterparty. OTC total return swap contracts are marked to market daily based upon quotations from an independent pricing service or market makers. The Portfolios could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or the

(Note 3 Continued)

price of the underlying security or index, the possibility that there is no liquid market for these agreements or that the counterparty may default on its obligation to perform. The Portfolios' maximum risk of loss from counterparty risk is the fair value of the contract. This risk may be mitigated by having a master netting arrangement between the Portfolios and the counterparty. Risk of loss may exceed amounts recognized on the Statement of Fiduciary Net Position.

The Portfolios entered into OTC and/or centrally cleared interest rate swap contracts to manage interest rate risk and to gain exposure on interest. OTC and centrally cleared interest rate swap contracts are marked to market daily based upon quotations from an independent pricing service or market makers. The Portfolios could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or if the counterparty defaults, in the case of OTC interest rate contracts, or the central clearing agency or a clearing member defaults, in the case of centrally cleared interest rate swap contracts, on its respective obligation to perform. This risk may be mitigated for OTC interest rate swap contracts by having a master netting arrangement between the Portfolios and the counterparty and for centrally cleared interest rate swap contracts through the daily exchange of variation margin. There is minimal counterparty risk with respect to centrally cleared interest rate swap contracts due to the clearinghouse guarantee fund and other resources that are available in the event of a clearing member default. Risk of loss may exceed amounts recognized on the Statement of Fiduciary Net Position.

The Portfolios entered into OTC and/or centrally cleared credit default contracts to manage credit risk and market risk, and gain exposure on individual names and/or baskets of securities. In an OTC and centrally cleared credit default contracts, the protection buyer typically makes a periodic stream of payments to a counterparty, the protection seller, in exchange for the right to receive a contingent payment upon the occurrence of a credit event on the reference obligation or all other equally ranked obligations of the reference entity. Credit events are contract specific but may include bankruptcy, failure to pay, restructuring and obligation acceleration. The OTC and centrally cleared credit default contracts are marked to market daily based upon quotations from an independent pricing service or market makers. In addition to bearing the risk that

the credit event will occur, the Portfolios could be exposed to market risk due to unfavorable changes in interest rates or in the price of the underlying security or index or the possibility that it may be unable to close out its position at the same time or at the same price as if it had purchased the underlying reference obligations. In certain circumstances, the Portfolios may enter into offsetting OTC and centrally cleared credit default contracts which could mitigate their risk of loss. Risk of loss may exceed amounts recognized on the Statement of Fiduciary Net Position. The Portfolios' maximum risk of loss from counterparty risk, either as the protection seller or as the protection buyer, is the fair value of the contract. This risk may be mitigated for OTC credit default contracts by having a master netting arrangement between the Portfolios and the counterparty and for centrally cleared credit default contracts through the daily exchange of the variation margin. Counterparty risk is further mitigated with respect to centrally cleared credit default contracts due to the clearinghouse guarantee fund and other resources that are available in the event of a clearing member default. Where the Portfolios are a seller of protection, the maximum potential amount of future payments it may be required to make is equal to the notional amount.

Derivative instruments held by the Portfolios were not individually rated by a ratings agency for the reporting period. As of June 30, 2016, OTC derivative counterparties had ratings that were either greater than or equivalent to long-term ratings of Baa1/BBB and short-term ratings of P-2/A-2. Centrally cleared contracts are not considered brokered contracts and have mitigated risks. With futures, there is minimal counterparty credit risk to the Portfolios since futures are exchange traded and the exchange's clearinghouse, as counterparty to all exchange traded futures, guarantees the futures against default.

Derivative instruments are subject to interest rate risk. Prices of longer term maturities generally change more in response to interest rate changes than the prices of shorter term maturities. The following table provides information about the interest rate risks associated with the types of investment derivative instruments as of June 30, 2016 (expressed in thousands):

	Maturities in Years				Total
	Less than 1	1-5	6-10	Greater than 10	
Forward Currency Contracts	\$ 136	\$ -	\$ -	\$ -	\$ 136
CC Interest Rate Swap Contracts	-	13	15	(62)	(34)
OTC Total Return Swap Contracts	(7)	-	-	(1)	(8)
OTC Credit Default Contracts	-	-	-	(36)	(36)
CC Credit Default Contracts	-	370	-	-	370
Futures Contracts	(63)	-	-	-	(63)
Total	\$ 66	\$ 383	\$ 15	\$ (99)	\$ 365

(Note 3 Continued)

Forward currency contracts are subject to foreign currency risk. The following table provides information about the forward currency contracts as of June 30, 2016 (expressed in thousands):

	Fair Value
Australian Dollar	\$ (40)
British Pound	46
Canadian Dollar	4
Euro	(5)
Indonesian Rupiah	2
Japanese Yen	(5)

Total	\$ 137

The audited financial statements of Putnam 529 for America may be obtained from Putnam Investment Management, One Post Office Square, Boston, MA 02109.

Note 4 - Receivables

Receivable balances are disaggregated by type and presented separately in the financial statements. Significant receivable balances not expected to be collected within one year and not already classified in the fund financials are presented below (expressed in thousands):

	Major Governmental Funds			Total Governmental
	General	Municipal Bond Bank	Permanent School Fund	
As shown on financial statements:				
Intergovernmental receivables	\$ 387,135	\$ -	\$ 1,059	\$ 388,194
Notes/loans receivable	15,874	94,240	-	110,114
Due from Component Unit	770	-	34,572	35,342
Total	\$ 403,779	\$ 94,240	\$ 35,631	\$ 533,650
Classified:				
Current portion	\$ 379,750	\$ 4,540	\$ 1,059	\$ 385,349
Noncurrent portion:				
Intergovernmental receivables	9,114	-	-	9,114
Notes/loans receivable	14,915	89,700	-	104,615
Due from Component Unit	-	-	34,572	34,572
Total noncurrent portion	24,029	89,700	34,572	148,301
Total	\$ 403,779	\$ 94,240	\$ 35,631	\$ 533,650

Not included in the receivable balances are amounts considered to be uncollectible. In the governmental funds, uncollectible taxes receivable are estimated at \$20.1 million, and uncollectible accounts receivable are estimated at \$110.2 million. The proprietary funds have \$37.1 million in uncollectible accounts receivable of which \$9.1 million are from uninsured employers' fines and penalties, and \$12.1 million are from unemployment contributions and benefit overpayments.

Note 5 - Interfund Transactions

A. Interfund Advances

A summary of interfund advances at June 30, 2016, follows (expressed in thousands):

	Advances From		
	General	Nonmajor Governmental	Total
Advances To			
Nonmajor enterprise	\$ 207	\$ -	\$ 207
Internal service	2,339	603	2,942
Total other funds	<u>\$ 2,546</u>	<u>\$ 603</u>	<u>\$ 3,149</u>

Interfund advances are the portions of interfund balances that are *not* expected to be repaid within one year. The interfund balances that are expected to be repaid within one year are shown in the Due From/Due To summary below.

Advances are generally made to finance capital expenditures or as a loan for operating purposes.

B. Due From/Due To Other Funds and Component Units

A summary of due from and due to other funds and component units at June 30, 2016, is shown below (expressed in thousands):

	Due To

Total Enterprise	-	220	220
Internal Service	-	66	66
Total	\$ 517	\$ 24,975	\$ 25,492

The balances result primarily from timing differences between the date goods and services are provided or reimbursable expenses occur, and the date the transactions are recorded in the accounting system and payment is made. An exception is the long-term due to the Nevada System of Higher Education (NSHE) from the Primary Government in the amount of \$24,427,760. This is the result of the 2015 Legislative Session which authorized funds for the UNLV hotel college, totaling approximately 50% of the construction cost with the remaining coming from donor funds, as well as funding for the ongoing NSHE Statewide deferred maintenance program (\$15 million).

Notes to Financial Statements

For the Fiscal Year Ended June 30, 2016

NEVADA

(Note 5 Continued)

C. Transfers From/Transfers To Other Funds

A summary of transfers between funds for the year ended June 30, 2016, is shown below (expressed in thousands):

	Transfers Out/To					
	Major Governmental Funds					Total Governmental
	General	State Highway	Municipal Bond Bank	Permanent School	Nonmajor Governmental	
Transfers In/From						
Major Governmental Funds:						
General	\$ -	\$ 19,931	\$ -	\$ 4,050	\$ 49,423	\$ 73,404

Total Enterprise	2,438	-	-	-	149,556	151,994
Internal Service	6,922	335	-	-	7	7,264
Total other funds	\$ 29,241	\$ 21,082	\$ 180,607	\$ 4,050	\$ 222,026	\$ 457,006

	Transfers Out/To					
	Major Enterprise Fund		Nonmajor Enterprise	Total Enterprise	Internal Service	Total Other Funds
	Unemployment Compensation	Water Projects Loans				
Transfers In/From						
Major Governmental Funds:						
General	\$ -	\$ 1,780	\$ 14,403	\$ 16,183	\$ 110	\$ 89,697
State Highway	-	-	-	-	-	6,374
Nonmajor governmental	8,441	-	6	8,447	157	226,574
Total Governmental	8,441	1,780	14,409	24,630	267	322,645
Major Enterprise Funds:						
Housing	-	-	-	-	-	-
Unemployment Comp	-	-	-	-	-	149,506
Higher Ed Tuition Trust	-	-	-	-	-	2,437
Nonmajor enterprise	-	-	11	11	-	62
Total Enterprise	-	-	11	11	-	152,005
Internal Service	-	-	-	-	-	7,264
Total other funds	\$ 8,441	\$ 1,780	\$ 14,420	\$ 24,641	\$ 267	\$ 481,914

The general purpose for transfers is to move monies from funds required by statute to collect them to the funds required by statute or budget to expend them, and to move monies collected for debt service purposes to the debt service fund required to make the payment.

Notes to Financial Statements

For the Fiscal Year Ended June 30, 2016

NEVADA

Note 6 - Restricted Assets

Various debt service, operation and maintenance, capital improvement and construction (acquisition) funding requirements of bond covenants, and trust indentures are recorded as restricted assets on the Statement of Net Position. The components of restricted assets at June 30, 2016 are as follows (expressed in thousands):

	Primary Government		
	Governmental Activities	Business-Type Activities	Component Units
Restricted:			
Cash	\$ 3,043	\$ -	\$ 136,727
Investments	-	176,892	63,979
Total	\$ 3,043	\$ 176,892	\$ 200,706
Restricted for:			
Debt service	\$ -	\$ 176,892	\$ 4,156
Construction	-	-	127,827
Regulation of business	3,043	-	-
Other purposes	-	-	68,723
Total	\$ 3,043	\$ 176,892	\$ 200,706

Note 7 - Capital Assets

Capital asset activity of the primary government for the year ended June 30, 2016, was as follows (expressed in thousands):

	Beginning Balance	Increases	Decreases	Ending Balance
Governmental activities:				
Capital assets, not being depreciated				
Land	\$ 150,711	\$ 1,273	\$ -	\$ 151,984
Construction in progress	199,375	64,693	(39,366)	224,702
Infrastructure	3,965,220	626,180	-	4,591,400
Rights-of-way	642,842	12,148	-	654,990
Total capital assets, not being depreciated	4,958,148	704,294	(39,366)	5,623,076
Capital assets, being depreciated/amortized				
Buildings	1,699,700	35,100	-	1,734,800
Improvements other than buildings	128,248	350	-	128,598
Furniture and equipment	406,940	37,994	(14,326)	430,608
Software costs	184,001	3,112	(12)	187,101
Total capital assets, being depreciated/amortized	2,418,889	76,556	(14,338)	2,481,107
Less accumulated depreciation/amortization for:				
Buildings	(590,834)	(43,472)	-	(634,306)
Improvements other than buildings	(85,647)	(4,039)	-	(89,686)
Furniture and equipment	(338,265)	(22,351)	13,320	(347,296)
Software costs	(161,451)	(3,580)	12	(165,019)

Note 8 - Capital Lease Receivable

The State, as lessor, entered into a lease purchase agreement in fiscal year 2014 with the Nevada System of Higher Education (NSHE), a discretely presented component unit, as lessee. The agreement is to finance a building construction project at the Nevada State College. Construction was completed in fiscal year 2016, and at the end of the lease, title to the buildings transfers to NSHE. As discussed in Note 10G, the construction is being financed by Lease Revenue Certificates of Participation Series 2013. Proceeds from the certificates of participation are used to pay the capitalized interest during the construction period, and NSHE will begin making capital lease principal and interest payments starting in fiscal year 2017.

For the fiscal year ended June 30, 2016, a capital lease receivable has been recorded by the primary government in the amount of \$50,445,000, which represents the certificate of participation proceeds remitted to NSHE for construction of the building.

The future minimum lease payments receivable for capital leases are as follows (expressed in thousands):

Year Ending June 30	Governmental Activities
2017	\$ 3,383
2018	3,380
2019	3,381
2020	3,383
2021	3,383
2022-2043	74,402
Total future minimum lease revenues	\$ 91,312

Note 9 - Short-Term Obligations

Primary Government - On May 17, 2016, the State issued short-term bonds of \$4,042,042 to provide the necessary State match for all or a portion of the 2015, 2016, and 2017 Clean Water Capitalization Grant Awards. These bonds were paid off on May 24, 2016. There was no short-term debt outstanding at July 1, 2015 or June 30, 2016.

Note 10 - Long-Term Obligations

A. Changes in Long-Term Liabilities

The following is a summary of changes in long-term obligations of the primary government for the fiscal year ended June 30, 2016 (expressed in thousands):

	<u>Beginning Balance</u>	<u>Prior Year Adjustments</u>	<u>Additions</u>	<u>Reductions</u>	<u>Ending Balance</u>	<u>Due Within One Year</u>
Governmental activities:						
Bonds payable:						
General obligation bonds	\$ 1,607,930	\$ -	\$ 326,723	\$ (576,223)	\$ 1,358,430	\$ 109,543
Special obligation bonds	486,140	-	292,600	(191,645)	587,095	48,595
Subtotal	2,094,070	-	619,323	(767,868)	1,945,525	158,138
Issuance premiums (discounts)	176,725	(36,367)	114,212	(32,844)	221,726	35,125
Total bonds payable	2,270,795	(36,367)	733,535	(800,712)	2,167,251	193,263
Certificates of participation	91,935	-	-	(2,710)	89,225	3,845
Issuance premiums (discounts)	2,720	(702)	-	(527)	1,491	480
Total certificates of participation	94,655	(702)	-	(3,237)	90,716	4,325
Other Governmental long-term activities:						
Obligations under capital leases	22,826	-	-	(2,649)	20,177	2,813
Compensated absences obligations	99,031	-	74,625	(81,641)	92,015	57,821
Total other governmental long-term activities	121,857	-	74,625	(84,290)	112,192	60,634
Governmental activities long-term obligations	\$ 2,487,307	\$ (37,069)	\$ 808,160	\$ (888,239)	\$ 2,370,159	\$ 258,222
Business-type activities:						
Bonds payable:						
General obligation bonds	\$ 73,370	\$ -	\$ 12,307	\$ (16,197)	\$ 69,480	\$ 9,377
Special obligation bonds	1,008,858	-	26,132	(211,702)	823,288	177,216
Subtotal	1,082,228	-	38,439	(227,899)	892,768	186,593
Issuance premiums (discounts)	42,691	(11,411)	458	(16,050)	15,688	10,162
Total bonds payable	1,124,919	(11,411)	38,897	(243,949)	908,456	196,755
Compensated absences obligations	2,008	-	1,198	(1,508)	1,698	1,108
Arbitrage rebate liability	961	-	11	-	972	-
Tuition benefits payable	199,391	-	14,679	(2,951)	211,119	17,922
Business-type activities long-term obligations	\$ 1,327,279	\$ (11,411)	\$ 54,785	\$ (248,408)	\$ 1,122,245	\$ 215,785

The General Fund and special revenue funds typically liquidate the capital lease obligations. The compensated absence obligations are typically liquidated by the General Fund and State Highway Fund incurring the related salaries and wages costs. The debt service funds typically liquidate the arbitrage obligations.

B. Bonds Payable

The State issues general obligation bonds for the acquisition, construction and improvement of major capital facilities; buying local governments' bonds in the municipal bond bank fund; loans to municipalities for water projects; protection of natural resources; cultural affairs projects; the construction, reconstruction, improvement and maintenance of highways; and for refunding purposes. General obligation bonds are direct obligations and pledge the full faith and credit of the State.

Special obligation highway improvement revenue bonds provide funds for property acquisition and construction of highway projects. Special obligation unemployment compensation bonds are to repay the Federal Unemployment Advance as benefits paid significantly exceeded employer assessment during the national economic downturn. Special obligation housing bonds in the aggregate have a debt limit of \$5 billion and are used for housing loans or to purchase mortgage loans having both fixed and variable interest rates. Special obligation bonds are payable solely from gross pledged revenues and are not general obligations of the State.

Notes to Financial Statements

For the Fiscal Year Ended June 30, 2016

NEVADA

(Note 10 Continued)

General obligation bonds and special obligation bonds of the primary government outstanding at June 30, 2016 are comprised of the following (expressed in thousands):

	Interest Rates	Original Amount	Principal Outstanding
Governmental activities:			
General obligation bonds:			
Subject to Constitutional Debt Limitation	1.145-6.17%	\$ 1,712,230	\$ 1,080,295
Exempt from Constitutional Debt Limitation	2.0-5.5%	739,808	278,135
Special obligation bonds:			
Exempt from Constitutional Debt Limitation-			
Highway Improvement Revenue Bonds	3.0-5.0%	899,055	587,095
Subtotal		3,351,093	1,945,525
Issuance premiums (discounts)		351,175	221,726
Governmental activities bonds payable		3,702,268	2,167,251
Business-type activities:			
General obligation bonds:			
Exempt from Constitutional Debt Limitation	1.75-5.5%	97,997	69,480
Special obligation bonds:			
Unemployment Compensation Bonds	5.0%	548,900	279,145
Housing Bonds	*.50-6.95%	791,970	544,143
Subtotal		1,438,867	892,768
Issuance premiums (discounts)		67,110	15,688
Business-type activities bonds payable		1,505,977	908,456
Total bonds payable		\$ 5,208,245	\$ 3,075,707

*Many Housing bonds have variable rates of interest. The tax exempt bonds track the SIFMA Index while the federally taxable debt tracks the one-month LIBOR Index.

Debt service requirements (principal and interest) for all long-term bonds and notes outstanding at June 30, 2016, of the primary government are summarized in the table following (expressed in thousands):

Year Ending	Governmental Activities		Business-Type Activities	
	Principal	Interest	Principal	Interest
June 30				
2017	\$ 158,138	\$ 98,324	\$ 186,593	\$ 27,202
2018	152,352	84,372	144,540	18,660
2019	143,248	75,672	17,490	13,446
2020	152,741	68,988	17,345	12,817
2021	159,133	61,144	16,522	12,155
2022-2026	707,485	195,222	64,804	52,620
2027-2031	415,663	42,780	91,918	40,392
2032-2036	53,685	4,696	162,486	26,833
2037-2041	3,080	166	152,991	13,163
2042-2046	-	-	16,694	4,634
2047-2051	-	-	21,385	820
Total	\$ 1,945,525	\$ 631,364	\$ 892,768	\$ 222,742

C. Constitutional Debt Limitations

Section 3, Article 9, of the State Constitution (as amended) limits the aggregate principal amount of the State's public debt to two percent (2%) of the assessed valuation of the State. Exempt from this limitation are debts authorized by the Legislature that are incurred for the protection and preservation of, or for obtaining the benefits of, any property or natural resources within the State. At June 30, 2016, the debt limitation and its unused portion are computed as follows (expressed in thousands):

Debt limitation (2% of total assessed valuation)	\$ 2,166,631
Less: Bonds and leases payable as of June 30, 2016, subject to limitation	(1,082,845)
Remaining debt capacity	<u>\$ 1,083,786</u>

(Note 10 Continued)

D. Nevada Municipal Bond Bank

General obligation bonds have been issued through the Nevada Municipal Bond Bank, a special revenue fund, as authorized by NRS 350A. These bonds are subject to statutory limitation of \$1.8 billion and are exempt from the Constitutional Debt Limitation. Proceeds from the bonds are used to purchase validly issued general obligation bonds of the State’s local governments to finance projects related to natural resources. The State anticipates that the debt service revenue it receives from the participating local governments will be sufficient to pay the debt service requirements of the State bonds as they become due. Twelve projects were funded through the Nevada Municipal Bond Bank as of June 30, 2016, and total outstanding loans to local governments amounted to \$94,240,000.

E. Refunded Debt and Redemptions

During the fiscal year 2016, the State of Nevada refunded \$248,480,000 in general obligation, limited tax, bonds related to capital improvement, natural resources and water project loans by issuing refunding bonds with a total par amount of \$227,770,000 at a \$44,923,783 premium. In addition, the State refunded \$146,045,000 in special obligation bonds, payable and collectible solely out of the gross pledged revenue, by issuing refunding bonds with a total par amount of \$125,115,000 at a \$30,167,763 premium. Proceeds from refunding bonds were used to refund certain outstanding State bonds to realize debt service savings. The refunding decreased the aggregate debt service payments by \$46,892,943 with an economic or present value gain of \$41,296,322. The reacquisition price exceeded the carrying amount of the old debt causing a deferred accounting loss of \$28,379,225. This amount is being reported as a deferred outflow of resources and amortized as an adjustment to interest expense over the life of the refunded debt or the refunding debt, whichever is shorter. The impact of the refunding issues is presented in the following table (expressed in thousands):

Issue Description:	Refunding Amount	Refunded Amount	Cash Flow Gain (Loss)	Present Value Gain
General obligation bonds:				
Capital Improvement and Refunding Bonds Series 2015D	\$ 230,821	\$ 210,585	\$ 24,076	\$ 19,707
Natural Resources and Refunding Bonds Series 2015E	24,854	23,095	2,400	2,037
Nevada Municipal Bond Bank Project Nos.87, 88 and 89 Series 2015F	2,570	2,565	4,879	3,888
Open Space, Parks, Natural Resources and Refunding Bonds Series 2015G	8,917	8,170	1,036	811
Safe Drinking Water Revolving Fund Matching and Refunding Bonds Series 2015H	4,208	4,065	309	285
Special obligation bonds:				
Highway Revenue Improvement and Refunding Bonds Series 2016	154,504	146,045	14,193	14,568
Total	\$ 425,874	\$ 394,525	\$ 46,893	\$ 41,296

In current and prior years, the State defeased certain general obligations and other bonds by placing the proceeds of new bonds and other monies in an irrevocable trust to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the State’s financial statements. The total outstanding amount of defeased issues at June 30, 2016 is \$691,983,056.

F. Capital Leases

The State has entered into various agreements for the lease of equipment and improvement of buildings. Assets of the primary government acquired under such leases at June 30, 2016, include equipment with a historical cost of \$2,255,789 with accumulated depreciation of \$1,186,604 and building improvements of \$27,810,128 with accumulated depreciation of \$6,125,751.

For all capital leases of the primary government, the gross minimum lease payments and the present value of the net minimum lease payments as of June 30, 2016 follow (expressed in thousands):

Year Ending June 30	Governmental Activities
2017	\$ 3,693
2018	3,157
2019	3,241
2020	3,069
2021	3,035
2022-2025	7,920
Total minimum lease payments	24,115
Less: amount representing interest	(3,938)
Obligations under capital leases	\$ 20,177

(Note 10 Continued)

G. Certificates of Participation

In fiscal year 2010, the NRPC, a blended component unit, issued \$7,900,000 of General Obligation Certificates of Participation series 2009 at 5.0-5.125% interest to prepay the remaining outstanding balance of the 1999 issue of the Nevada Real Property Corporation. The original 1999 issue of \$15,000,000 was to finance the acquisition, construction, installation and equipping of a secured juvenile treatment facility. The 2009 issue is a direct general obligation of the State to which the full faith and credit of the State is pledged. The State is required to make payments from general (ad valorem) taxes in the Consolidated Bond Interest and Redemption debt service fund that approximate the interest and principal payments made by trustees to certificate holders.

In fiscal year 2014, the NRPC issued \$35,785,000 of Lease Revenue Refunding Certificates of Participation Series 2013 at 3.0-5.0% interest to refund the outstanding balances of Lease Revenue Certificates of Participation Series 2004 and 2004B, which were to finance the acquisition and construction of the State’s Capitol Complex Building 1 and Casa Grande Projects respectively.

In fiscal year 2014, the NRPC issued \$50,445,000 of new Lease Revenue Certificates of Participation Series 2013 at 4.0-5.0% interest to finance the State’s Nevada State College Project. The Project is leased to the Nevada System of Higher Education (NSHE), the State’s discretely presented component unit. Meanwhile, the NRPC entered into a Ground Lease with respect to the real property on which the Project is located.

In fiscal year 2007, the NRPC issued \$5,760,000 of Lease Revenue Certificates of Participation Series 2006 at 4.0-5.0% interest to finance the design and construction of a warehouse addition to the Legislative Counsel Bureau’s existing State Printing Office building in Carson City and resurfacing of the exterior of the existing building, together with related improvements on the premises.

Under the lease revenue certificates of participation financing arrangements, the certificates are not general obligations of the State and are not backed by the faith and credit or the taxing power of the State. The State’s obligation to pay base rent and make other payments to the trustee under the financing leases is subject to appropriation by the State. In the event that the State does not make a sufficient appropriation with respect to a Lease Purchase Agreement, that Lease Purchase Agreement will terminate. Currently, only the payment of principal and interest on the Series 2006 is being guaranteed by an insurance policy.

The following schedule presents future certificates of participation payments as of June 30, 2016 (expressed in thousands):

Year Ending June 30	Principal	Interest
2017	\$ 3,845	\$ 4,132
2018	4,080	3,957
2019	2,960	3,805
2020	3,160	3,676
2021	3,300	3,539
2022-2026	19,015	15,141
2027-2031	22,745	10,374
2032-2036	10,530	6,379
2037-2041	13,300	3,612
2042-2043	6,290	476
Total	\$ 89,225	\$ 55,091

H. Tuition Benefits Payable

The Higher Education Tuition Trust Fund, an enterprise fund, reports benefits payable as shown in Section A based upon the actuarial present value (APV) of the future tuition obligations and administrative expenses that will be paid in future years. The present value calculation includes the effects of projected tuition and fee increases and termination of contracts as follows (expressed in thousands):

APV of the future tuition obligation	\$211,120
Net position available	270,183
Net position as a percentage of tuition benefits obligation	127.98%

The actuarial valuation used an investment yield assumption of 5.00% per year and tuition growth assumptions as follows:

	Universities	Community Colleges
2017-18	4.00%	4.00%
2018-19	4.00%	4.00%
2019-20 and later	4.75%	4.00%

I. Arbitrage Rebate Requirement

The Tax Reform Act of 1986 imposes a rebate requirement with respect to some bonds issued by the State. Under this requirement, an amount equal to the sum of (a) the excess of the aggregate amount earned on all investments (other than certain specified exceptions) over the amount that would have been earned if all investments were invested at a rate equal to the yield on the bonds, and (b) any income earned on the excess described in (a) must be rebated to the United States Treasury, in order for the interest on the bonds to be excluded from gross income for federal income tax purposes. In accordance with the Internal Revenue Service Regulations, arbitrage rebate liability has been calculated as of June 30, 2016, and changes for the fiscal year then ended are presented in Section A of this note.

(Note 10 Continued)

J. Conduit Debt Obligations

The State has issued Industrial Revenue Bonds to provide financial assistance to private-sector entities for the acquisition and construction of commercial facilities deemed to be in the public interest. During the 2013 session, the Nevada Legislature enacted the Charter School Financing Law, which authorizes the issuance of Charter School Bonds and other obligations to finance the acquisition, construction, improvement, maintenance or furnishing of land, buildings and facilities for Charter Schools in the State of Nevada. The above two types of bonds are secured by the properties financed and are payable solely from payments received on the underlying mortgage loans. The State is not obligated in any manner for the repayment of the bonds. Accordingly, the bonds are not reported as liabilities in the accompanying financial statements. As of June 30, 2016, there are five series of Industrial Revenue Bonds and one series of Charter School Bonds outstanding, with an aggregate principal amount payable of \$633,670,616.

K. Pledged Revenue

Pledged motor vehicle and special fuel tax - The State has pledged a portion of future motor vehicle fuel and special fuel tax revenues as well as federal aid for eligible projects to repay the Highway Improvement Revenue Bonds that were issued for highway construction projects and property acquisition purposes. As of June 30, 2016, the outstanding balance of Highway Improvement Revenue and Refunding bonds is \$587,095,000. The total of principal and interest remaining on the bonds is \$780,048,647 payable through December 2029. Upon completion of eligible projects, federal aid of \$324,971,600 is expected to be received in fiscal year 2017. For the current year, principal and interest paid was \$65,852,363 and total motor vehicle fuel and special fuel tax revenues were \$287,571,198.

Pledged future lease rental payments - With respect to each series of Lease Revenue Certificates of Participation, the NRPC, a blended component unit, has pledged its rights, title and interest in the applicable Ground Lease and Lease Purchase Agreement to the Trustee (including the right to receive payments of base rent and other payments). As of June 30, 2016, the outstanding balance of Lease Revenue Certificates of Participation is \$86,675,000. The total of principal and interest remaining on the certificates is \$141,636,994 payable through June 2043. In fiscal year 2016, principal and interest of \$5,614,156 was paid, which includes the interest payment of \$1,216,388 paid entirely by the excess certificate proceeds for the State's Nevada State College Project as discussed in Section G of this note and Note 8. As of June 30, 2016, \$1,735,598 was held by the trustee for the benefit of the bondholders. Building rent of \$5,000,000 is expected to be col-

lected in fiscal year 2017, which, along with assets held by the trustee, will be used to pay the fiscal year 2017 debt service principal and interest of \$6,635,856.

Pledged additional assessments of unemployment contributions - The State has pledged additional assessments on unemployment contributions (special bond contributions), the proceeds derived from the sale of bonds, and related investment earnings to repay \$548,900,000 of Unemployment Compensation Fund Special Revenue Bonds issued on November 6, 2013. The revenue bonds were issued for the purposes of repaying the Federal Unemployment Advance that occurred during the last recession and funding a deposit to the Nevada UITF Account to avoid the need for further advances. Pursuant to NRS 612.6132, special bond contributions must be established at levels sufficient to pay debt service on the bonds. As of June 30, 2016, the outstanding balance of the bonds is \$279,145,000. The total principal and interest remaining on the bonds is \$296,124,125 payable through June 2018. In fiscal year 2016, principal and interest of \$150,045,950 was paid. As of June 30, 2016, \$55,137,513 was held by the trustee for the benefit of the bondholders. Special bond contributions of \$246,152,623 are expected to be collected in fiscal year 2017, which, along with assets held by the trustee, will be used to pay the fiscal year 2017 debt service principal and interest of \$163,480,875.

Pledged Nevada Housing Division program funds - The single-family bonds are payable from, and secured by, a pledge of the proceeds derived from the sale of bonds; the rights and interest of the Housing Division in all mortgage loans purchased under the various bond certificates; revenues which primarily include mortgage repayments and the net income, if any, derived as a result of foreclosure or other action taken in the event of a default on such a mortgage loan; curtailments, consisting generally of all amounts representing monthly principal payments with respect to mortgage loans which are received in advance of the scheduled amortization thereof; and all earnings realized by the investment of monies in all funds and accounts as well as all funds and accounts created by the various bond certificates.

The multi-unit bonds are payable from, and secured by, a pledge of the proceeds derived from the sale of bonds; all earnings realized from the investment of bond proceeds; after permanent financing, all revenues received from the development including housing assistance and rental payments made by tenants, notes receivable collateralized by deeds of trust and the rights to FHA insurance, draws on bank letters of credit, private mortgage and hazard insurance and condemnation proceeds.

Notes to Financial Statements

For the Fiscal Year Ended June 30, 2016

NEVADA

(Note 10 Continued)

As of June 30, 2016, the outstanding balance of single-family and multi-unit bonds is \$544,821,907. The total of principal and interest remaining on the bonds is \$736,897,544 payable through June 2049. In fiscal year 2016, principal and interest of \$53,552,576 was paid. As of June 30, 2016, \$177,071,228 was held by the trustee for the benefit of the single-family bondholders. The amount of payments received for mortgage loans in fiscal year 2016 is \$54,405,310. Fifty-five million is expected to be collected in fiscal year 2017, which, along with assets held by the trustee, will be used to pay the fiscal year 2017 debt service principal and interest of \$38,379,320.

L. Component Unit Obligations

Nevada System of Higher Education (NSHE) – Bonds, notes, capital leases and compensated absences payable by NSHE at June 30, 2016, and the changes for the year then ended, consist of the following (expressed in thousands):

	Beginning Balance	Additions	Reductions	Ending Balance	Due Within One Year
Bonds and notes payable	\$ 519,645	\$ 234,646	\$ (158,995)	\$ 595,296	\$ 19,449
Issuance premiums (discounts)	35,705	9,183	(3,662)	41,226	2,944
Total bonds payable	555,350	243,829	(162,657)	636,522	22,393
Obligations under capital leases	46,276	7,360	(1,695)	51,941	3,583
Compensated absences obligations	50,116	32,665	(32,976)	49,805	33,283
Total	\$ 651,742	\$ 283,854	\$ (197,328)	738,268	59,259
Discretely presented component units of the NSHE:					
Compensated absences				212	-
Long-term debt				199	63
Total				\$ 738,679	\$ 59,322

Tuition and fees, auxiliary enterprises' revenue and certain other revenue as defined in the bond indentures secure the revenue bonds.

The following table presents annual principal and interest payments for bonds and notes payable outstanding by NSHE at June 30, 2016 (expressed in thousands):

Year Ending June 30	Principal	Interest
2017	\$ 22,393	\$ 24,449
2018	27,863	24,358
2019	29,770	23,366
2020	30,211	22,240
2021	29,744	21,088
2022-2026	140,306	87,874
2027-2031	125,357	60,229
2032-2036	124,679	34,462
2037-2041	60,860	15,660
2042-2046	39,715	4,573
2047-2051	5,624	47
Total	\$ 636,522	\$ 318,346

Future net minimum rental payments which are required under the capital leases by NSHE for the years ending June 30 are as follows (expressed in thousands):

Year Ending June 30	Amount
2017	\$ 3,583
2018	3,580
2019	3,580
2020	3,580
2021	3,574
2022-2026	17,581
2027-2031	17,037
2032-2036	16,900
2037-2041	16,900
2042-2046	6,766
Total minimum lease payments	93,081
Less: amount representing interest	(41,140)
Obligations under capital leases	\$ 51,941

(Note 10 Continued)

Colorado River Commission (CRC) – Bonds and compensated absences payable by CRC at June 30, 2016, and the changes for the year then ended, consist of the following (expressed in thousands):

	<u>Beginning Balance</u>	<u>Additions</u>	<u>Reductions</u>	<u>Ending Balance</u>	<u>Due Within One Year</u>
Bonds payable:					
General obligation bonds	\$ 43,980	\$ -	\$ (4,785)	\$ 39,195	\$ 5,015
Issuance premiums (discounts)	591	-	(566)	25	181
Total bonds payable	<u>44,571</u>	<u>-</u>	<u>(5,351)</u>	<u>39,220</u>	<u>5,196</u>
Compensated absences obligations	342	183	(202)	323	183
Total	<u>\$ 44,913</u>	<u>\$ 183</u>	<u>\$ (5,553)</u>	<u>\$ 39,543</u>	<u>\$ 5,379</u>

Scheduled maturities for bonds payable by CRC for the years ending June 30 are as follows (expressed in thousands):

<u>Year Ending June 30</u>	<u>Principal</u>	<u>Interest</u>
2017	\$ 5,015	\$ 1,465
2018	5,970	1,208
2019	730	1,062
2020	740	1,050
2021	755	1,033
2022-2026	4,085	4,841
2027-2031	4,825	4,085
2032-2036	5,845	3,027
2037-2041	6,700	1,678
2042-2044	4,530	294
Total	<u>\$ 39,195</u>	<u>\$ 19,743</u>

Note 11 - Pensions and Other Employee Benefits

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of each pension plan and additions to/ deductions from each pension plan’s fiduciary net position have been determined on the same basis as they are reported by the plans. For this purpose, benefit payments and refunds of employee contributions are recognized when due and payable in accordance with the terms of the plan. Investments are reported at fair value.

The aggregate pension related amounts for the primary government consist of a net pension liability of \$1,899,044,202, deferred outflows of resources of \$204,228,570, deferred inflows of resources of \$360,060,384 and pension expense of \$191,174,572. The State’s defined benefit pension plans are described in detail below.

A. Public Employees’ Retirement System of Nevada

Plan Description – The Public Employees’ Retirement System (PERS) was established in 1947 by the Nevada Legislature and is governed by the Public Employees’ Retirement Board whose seven members are appointed by the governor.

PERS administers a cost-sharing multiple-employer defined benefit pension plan that covers qualified State employees and employees of participating local government entities in the State. Any public employer in the State may elect to have its regular and police/fire employees covered by PERS. The cost to administer the plan is financed through the contributions and investment earnings of the plan. PERS issues a publicly available financial report that includes financial statements and the required supplementary information for the System. That report may be obtained on the PERS website at www.nvpers.org.

Pension Benefits – Benefits provided to participants or their beneficiaries include retirement, disability, and survivor benefits. Benefits, as required by statute, are determined by the number of years of accredited service at the time of retirement and the member’s highest average compensation in any 36 consecutive months, with special provisions for members entering the System on or after January 1, 2010. Members become fully vested as to benefits upon completion of 5 years of service. Unreduced benefits are available, depending upon when the member entered the System, as follows:

(Note 11 Continued)

Regular Members		Police/Fire Members	
<u>Before January 1, 2010</u>		<u>Before January 1, 2010</u>	
Age 65 with 5 years of service		Age 65 with 5 years of service	
Age 60 with 10 years of service		Age 55 with 10 years of service	
Any age with 30 years of service		Age 50 with 20 years of service	
		Any age with 25 years of service	
<u>On or after January 1, 2010</u>		<u>On or after January 1, 2010</u>	
Age 65 with 5 years of service		Age 65 with 5 years of service	
Age 62 with 10 years of service		Age 60 with 10 years of service	
Any age with 30 years of service		Age 50 with 20 years of service	
		Any age with 30 years of service	
<u>On or after July 1, 2015</u>		<u>On or after July 1, 2015</u>	
Age 65 with 5 years of service		Age 65 with 5 years of service	
Age 62 with 10 years of service		Age 60 with 10 years of service	
Age 55 with 30 years of service		Age 50 with 20 years of service	
Any age with 33.3 years of service		Any age with 30 years of service	

Members with the years of service necessary to receive a retirement benefit but who have not reached the age for an unreduced benefit may retire at any age with the benefit reduced by 4% (for members entering the System before January 2, 2010) or 6% (for members entering the System on or after January 1, 2010) for each full year they are under the required age.

Monthly benefit allowances for members are computed as 2.5% of average compensation for each accredited year of service prior to July 1, 2001. For service earned on and after July 1, 2001, this multiplier is 2.67% of average compensation. For members entering the System on or after January 1, 2010, there is a 2.5% multiplier. Lastly, for members entering the System on or after July 1, 2015, there is a 2.25% multiplier. PERS offers several alternatives to the unmodified service retirement allowance which, in general, allow the retired employee to accept a reduced service retirement allowance payable monthly during his or her lifetime and various optional monthly payments to a named beneficiary after his or her death.

Retirees are eligible for annual benefit increases if they began receiving benefits at least 3 years before the effective date of the increase. Benefits are increased annually on the first day of the month following the anniversary of the commencement of benefits. The increases begin at 2% in years 4, 5 and 6; increase to 3% in years 7, 8 and 9; 3.5% in years 10, 11 and 12; 4% for years 13 and 14; and 5% in year 15 and each year thereafter. For retirees entering the System on or after January 1, 2010, increases are capped at 4% in year 13 and each year thereafter. If the benefit outpaces inflation in the period since retirement, the increase may be capped by a rolling three-year average of the Consumer Price Index (all items). For retirees entering the System on or after July 1, 2015, the increases begin at 2% in years 4, 5 and 6; increase to 2.5% in years 7, 8 and 9; the lesser of 3% or the increase, if any, in the Consumer Price Index (all items) for the preceding calendar years following year 10 and every year thereafter.

Member and Employer Contributions - The authority for establishing and amending the obligation to make contributions, and member contribution rates, is set by statute. New hires of the State of Nevada and public employers have the option of selecting either the employee/employer contribution plan or the employer-pay contribution plan. Under the employee/employer contribution plan, the employee and the employer each make matching contributions. Under the employer-pay contribution plan, the employer pays all contributions on the employee's behalf; however, the employee shares equally in the cost of the contribution rate either through salary reduction or in lieu of a promised pay increase.

PERS' basic funding policy provides for periodic contributions as a level pattern of cost as a percentage of salary throughout an employee's working lifetime in order to accumulate sufficient assets to pay benefits when due. Although PERS receives an actuarial valuation on an annual basis indicating the contribution rates required to fund the System on an actuarial reserve basis, contributions actually made are in accordance with the required rates established by the Nevada Legislature. These statutory rates are increased/decreased pursuant to NRS 286.421 and 286.450. The actuarial funding method used is the Entry Age Normal Cost Method. It is intended to meet the funding objective and result in a relatively level long-term contributions requirement as a percentage of salary.

Required contribution rates for employers and for active plan members, as a percentage of covered payroll, for the fiscal year ended June 30, 2016 were as follows:

	Statutory Rate	
	Employer	Employees
Regular employees:		
Employer-pay plan	28.00%	na
Employee/employer plan (matching rate)	14.50%	14.50%
Police and Fire employees:		
Employer-pay plan	40.50%	na
Employee/employer plan (matching rate)	20.75%	20.75%

State contributions recognized as part of pension expense for the current fiscal year ended June 30, 2016 were \$176,579,325.

Pension Liabilities, Pension Expense, Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions - At June 30, 2016, the State reported a liability of \$1,879,626,041, for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The State's proportion of the net pension liability was based on the State's share of contributions in PERS pension plan relative to the total contributions of all

Notes to Financial Statements

For the Fiscal Year Ended June 30, 2016

NEVADA

(Note 11 Continued)

participating PERS employers and members. At June 30, 2015, the State's proportion was 16.4%, a decrease of .20% from its proportion measured at June 30, 2014.

For the year ended June 30, 2016, the State recognized pension expense of \$187,305,225. At June 30, 2016, the State reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources (expressed in thousands):

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ -	\$(141,380,420)
Net difference between projected and actual earnings on pension plan investments	-	(101,813,003)
Changes in proportion and differences between State contributions and proportionate share of contributions	3,413,400	(110,583,999)
State contributions subsequent to the measurement date	191,436,428	-
Total	\$ 194,849,828	\$(353,777,422)

Deferred outflows of resources of \$191,436,428 for contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2017.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows (expressed in thousands):

Year Ended June 30:	
2017	\$ (96,170)
2018	(96,170)
2019	(96,171)
2020	(6,406)
2021	(41,436)
2022	(14,011)
Thereafter	-

Actuarial Assumptions – The State's net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The total pension liability was determined using the following actuarial assumptions, applied to all periods included in the measurement:

<i>Inflation rate:</i>	3.50%
<i>Payroll growth:</i>	5.00%, including inflation
<i>Investment rate of return:</i>	8.00%
<i>Productivity pay increase:</i>	0.75%
<i>Projected salary increases:</i>	Regular: 4.60% to 9.75%, depending on service Police/Fire: 5.25% to 14.50%, depending on service Rates include inflation and productivity increases
<i>Consumer price index:</i>	3.50%
<i>Other assumptions:</i>	Same as those used in the June 30, 2015 funding actuarial valuation

Mortality rates were based on the RP-2000 Combined Healthy Mortality Table projected to 2013 with Scale AA, set back one year for females (no age setback for males) for regular members and set forward one year for police/fire members. Mortality rates for disabled members were based on the RP-2000 Disabled Retiree Mortality Table projected to 2013 with Scale AA, set forward three years.

Actuarial assumptions used in the June 30, 2015 valuation were based on an experience study for the period from July 1, 2006, through June 30, 2012.

Investment Policy - The PERS Board evaluates and establishes the investment portfolio target asset allocations and the expected real rates of return (expected returns, net of investment expenses and inflation) for each asset class. The Board reviews these asset allocations and capital market expectations annually. The System's target asset allocations and current long-term geometric expected real rates of return for each asset class included in the fund's investment portfolio as of June 30, 2015, are included in the following table:

Asset Class	Target Allocation	Long-term Geometric Expected Real Rate of Return
Domestic equity	42%	5.50%
International equity	18%	5.75%
Domestic fixed income	30%	0.25%
Private markets	10%	6.80%

Discount Rate – The discount rate used to measure the total pension liability was 8% as of June 30, 2015. The projection of cash flows used to determine the discount rate assumed plan contributions will be made in amounts consistent with statutory provisions and recognizing the plan's current funding policy and cost-sharing mechanism between employers and

(Note 11 Continued)

members. For this purpose, all contributions that are intended to fund benefits for all plan members and their beneficiaries are included, except that projected contributions that are intended to fund the service costs for future plan members and their beneficiaries are not included. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments for current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability as of June 30, 2015.

Sensitivity of the Proportionate Share of the Net Pension Liability to Changes in the Discount Rate – The following presents the State's proportionate share of the net pension liability at June 30, 2015 calculated using the discount rate of 8%, as well as what the State's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (7%) or 1-percentage-point higher (9%) than the current rate (expressed in thousands):

	<u>1% Decrease in Discount Rate (7%)</u>	<u>Discount Rate (8%)</u>	<u>1% Increase in Discount Rate (9%)</u>
Net pension liability	\$ 2,864,174	\$ 1,879,626	\$ 1,060,906

Pension Plan fiduciary net position – Detailed information about the pension plan's fiduciary net position is available in the separately issued PERS' report.

Payables to the pension plan – At June 30, 2016, the State reported payables to the defined benefit pension plan of \$14,598,437 for legally required employer contributions which had been withheld from employee wages but not yet remitted to PERS.

B. Legislators' Retirement System of Nevada

Plan Description – The Legislators' Retirement System (LRS) is a single-employer defined benefit pension plan established in 1967 by the Nevada Legislature (NRS 218C) and is governed by the Public Employees' Retirement Board whose seven members are appointed by the governor. All State Legislators are members. LRS issues a publicly available financial report that includes financial statements and the required supplementary information for the System. LRS' financial report may be obtained from the Public Employees' Retirement System, 693 West Nye Lane, Carson City, Nevada 89703.

At June 30, 2015, the LRS pension plan membership consisted of:

Retirees and beneficiaries currently receiving benefits	78
Inactive vested members	13
Inactive non-vested members	26
Active members	<u>35</u>
Total	<u><u>152</u></u>

Pension Benefits – Benefits are determined by the number of years of accredited service at the time of retirement. Service years include the entire election term whether or not the Legislature is in session. Benefits payments to which participants may be entitled under the plan include pension and survivor benefits. Monthly benefit allowances are \$25 for each year of service up to 30 years.

If a Legislator is newly elected after July 1, 1985, they must have at least 10 years of service, be age 60, and no longer be a Legislator in order to retire without benefit reduction. If a Legislator is no longer serving and has at least 10 years of service but is under the age of 60, they can elect to wait to receive their benefit until the age of 60 or begin receiving a reduced benefit prior to the age of 60. The minimum requirement for an unreduced benefit for a Legislator elected prior to July 1, 1985, is 8 years of accredited service at age 60.

Members are eligible for post-retirement benefit increases based on their effective date of membership. For members with an effective date of membership before January 1, 2010, the lesser of: (a) 2% per year following the third anniversary of the commencement of benefits, 3% per year following the sixth anniversary, 3.5% per year following the ninth anniversary, 4% per year following the twelfth anniversary and 5% per year following the fourteenth anniversary, or (b) the average percentage increase in the Consumer Price Index (or other Board approved index) for the three preceding years. In any event, a member's benefit must be increased by the percentages in (a) if it has not been increased at a rate greater than or equal to the average of the Consumer Price Index (CPI) (All items) (or other Board approved index) for the period between retirement and the date of increase. For members with an effective date of membership on or after January 1, 2010, same as above, except the increases in paragraph (a) do not exceed 4% per year. For future retirees, those hired prior to 2010 are assumed to reach the cap after 24 years of retirement. Those hired in 2010 or later are assumed to reach the cap after 39 years of retirement. Underlying all of these assumptions is that CPI will grow over time at a rate of 3.5% per year.

Member and Employer Contributions - The employee contribution of 15% of compensation is paid by the employee only when the Legislature is in session, as required by statute. The

(Note 11 Continued)

Legislature holds sessions every two years. Prior to 1985, the employee contributions were matched by the employer. The 1985 Legislators' Retirement Act includes NRS 218C.390(2) which states, "The Director of the Legislative Counsel Bureau shall pay to the Board from the Legislative Fund an amount as the contribution of the State of Nevada as employer which is actuarially determined to be sufficient to provide the System with enough money to pay all benefits for which the System will be liable." The Legislature appropriated \$311,710 for fiscal years 2015 and 2016, which is the required State contribution as determined by the actuary. This amount was paid by the State of Nevada to the Legislative fund during fiscal 2015, of which \$155,855 (half) was recognized as employer contributions in the fiscal year 2015, and the other half recognized as employer contributions in fiscal year 2016.

State contributions recognized as part of pension expense for the fiscal year ended June 30, 2016 were \$155,855.

LRS' basic funding policy provides for contributions by the State based on a biennial actuarial valuation prepared per NRS 281C.390(2). The Actuarially Determined Employers' Contribution (ADEC) includes the employer's normal cost and a provision for amortizing the Unfunded Actuarial Accrued Liability (UAAL). Beginning July 1, 2014, actuarial valuations are done annually. Effective with the January 1, 2009 valuation, the UAAL is amortized as a level dollar amount over a declining amortization period of 20 years. Any increases or decreases in the UAAL that arise in future years will be amortized over separate 20-year periods. In addition, the Actuarial Value of Assets (AVA) was limited to not less than 75% or greater than 125% of market value. The actuarial funding method used is the Entry Age Normal Cost Method.

Pension Liabilities, Pension Expense, Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions – At June 30, 2016, the State reported a net pension liability of \$654,825. The net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date.

For the year ended June 30, 2016, the State recognized pension income of \$72,390. At June 30, 2016, the State reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources (expressed in thousands):

	Deferred Outflows of Resources	Deferred Inflows of Resources
Net difference between projected and actual earnings on pension plan investments	\$ 157	\$ (281)
Difference between expected and actual experience	-	(26)
State contributions subsequent to the measurement date	-	-
Total	\$ 157	\$ (307)

There were no deferred outflows of resources for contributions subsequent to the measurement date to be recognized in the year ended June 30, 2017.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows (expressed in thousands):

Year Ended June 30:	
2017	\$ (81)
2018	(54)
2019	(54)
2020	39
2021	-
Thereafter	-

(Note 11 Continued)

The following table presents the changes in the net pension liability for LRS for the year ended June 30, 2015 (expressed in thousands):

	2015
Total pension liability	
Service cost	\$ 39
Interest	426
Differences between expected and actual experience	(109)
Benefit payments, including refunds	(497)
Net change in total pension liability	(141)
Total pension liability - beginning	5,531

Plan fiduciary net position as a percentage of total pension liability	88%
Covered-employee payroll	N/A
Net pension liability as a percentage of covered-employee payroll	N/A

Actuarial Assumptions – The State’s net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The total pension liability was determined using the following actuarial assumptions, applied to all periods included in the measurement:

<i>Inflation rate:</i>	3.50%
<i>Investment rate of return:</i>	8.00%
<i>Projected salary increases:</i>	3.50%
<i>Consumer price index:</i>	3.50%
<i>Other assumptions:</i>	Same as those used in the June 30, 2015 funding actuarial valuation

Mortality rates were based on the RP-2000 Combined Healthy Mortality Table projected to 2013 with Scale AA, set back one year for females (no age setback for males).

Actuarial assumptions used in the June 30, 2015 valuation were based on the results of the actuarial experience study for the period July 1, 2006, through June 30, 2012.

Investment Policy – The Retirement Board evaluates and establishes the investment portfolio target asset allocations and the expected real rates of return (expected returns, net of investment expenses and inflation) for each asset class. The Board reviews these asset allocations and capital market expectations annually. The System’s target asset allocations and current long-term expected real rates of return for each asset class included in the fund’s investment portfolio as of June 30, 2015, are included in the following table:

Asset Class	Target Allocation	Long-term Expected Real Rate of Return
Domestic equity	49%	5.50%
International equity	21%	5.75%
Domestic fixed income	30%	0.25%

Discount Rate – The discount rate used to measure the total pension liability was 8% as of June 30, 2015. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rate and that contributions from employers will be made at contractually required rates, actuarially determined. For this purpose, only employer contributions that are intended to fund benefits for current plan members and their beneficiaries are included. Projected employer contribu-

(Note 11 Continued)

tions that are intended to fund the service costs for future plan members and their beneficiaries, as well as projected contributions from future plan members, are not included. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments for current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Net Pension Liability to Changes in the Discount Rate – The following presents the net pension liability calculated using the discount rate of 8%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (7%) or 1-percentage-point higher (9%) than the current rate (expressed in thousands):

	1% Decrease in Discount Rate (7%)	Discount Rate (8%)	1% Increase in Discount Rate (9%)
Net pension liability	\$ 1,111	\$ 655	\$ 263

Pension plan fiduciary net position – Detailed information about the pension plan's fiduciary net position is available in the separately issued LRS report.

Payables to the pension plan – At June 30, 2016, the State had no payables to the defined benefit pension plan for legally required employer contributions.

C. Judicial Retirement System of Nevada

Plan Description – The Judicial Retirement System (JRS) is an agent multiple-employer defined benefit pension plan established in 2001 by the Nevada Legislature (NRS 1A.160) and is governed by the Public Employees' Retirement Board whose seven members are appointed by the governor. The JRS was established to provide benefits in the event of retirement, disability, or death of justices of the Supreme Court, district judges, municipal court judges and justices of the peace, funded on an actuarial reserve basis. JRS issues a publicly available financial report that includes financial statements and the required supplementary information for the System. JRS' financial report may be obtained from the Public Employees' Retirement System, 693 West Nye Lane, Carson City, Nevada 89703.

At June 30, 2015, the JRS pension plan membership consisted of:

Retirees and beneficiaries currently receiving benefits	69
Inactive vested members	4
Active members	115
Total	188

Pension Benefits - Benefits are paid according to various options contained in pertinent statutes, dependent upon whether a member was serving as a Supreme Court justice or district judge before November 5, 2002. Retiring members who were serving as a judge before November 5, 2002 may select among the two benefit options below. Retiring members who began serving as a justice or judge on or after November 5, 2002 may select only the first option below.

Option 1 - 2003 Benefit Plan: Benefits, as required by statute, are computed at 3.4091% per year of accredited service at the time of retirement times the member's highest average compensation in any 36 consecutive months, to a maximum of 75%. Benefit payments to which participants may be entitled under the plan include pension benefits, disability benefits and survivor benefits.

Option 2 – Previous Benefit Plan: Retiring members who were serving as a Supreme Court justice or district judge prior to November 5, 2002 may select benefit payments computed at 4.1666% for each year of service, up to a total maximum of 22 years, times the member's compensation for their last year of service.

Members who retired under the Previous Benefit Plan (plan in effect before November 5, 2002) and are appointed as senior judges can earn service credit while receiving their pension payments. They are eligible to have their benefit recalculated each time they earn an additional year of service credit.

Members of the System become fully vested after five years of service. A member of the System is eligible for retirement at age 65 with five years of service, at age 60 with ten years of service, or at any age with 30 years of service. For those members who were serving as a Supreme Court justice or district judge prior to November 5, 2002, and selected the second benefit option, eligibility for retirement is at age 60 with five years of service.

Member and Employer Contributions – The JRS is an employer-paid plan and there is no contribution from active members. The participating employers submit the percentage of compensation determined by the actuary to pay the normal costs and administrative expenses. Also, the participating employers pay to the JRS an amount on the unfunded liability which is actuarially determined to be sufficient to enable the JRS to pay all current benefits for which the JRS is liable.

JRS' basic funding policy provides for contributions by the participating employers based on an actuarial valuation prepared per Nevada Revised Statute (NRS 1A.180(1)). The amount of the annual contribution required to fund the System is comprised of a normal cost payment and a payment on the Unfunded Actuarial Accrued Liability (UAAL). Effective January 1, 2009, UAAL is amortized over a year-by-year closed amortization period as a level percent of pay (3% pay-

(Note 11 Continued)

roll growth assumed) where each amortization period will be set at 30 years for State judges (Supreme Court justices and district judges) and 20 years for each non-state agency. Any increases or decreases in UAAL that arise in future years will be amortized over separate 30-year periods for State judges and 20-year periods for non-state judges. The actuarial funding method used is the Entry Age Normal Cost Method.

The State’s annual actuarially determined contribution to fund the System at June 30, 2016 was \$5,443,188 and the actual contribution made was \$5,227,905.

Pension Liability, Pension Expense, Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions – At June 30, 2016, the State reported a liability of \$18,763,336 for its net pension liability for the JRS pension plan. The net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The State’s net pension liability was based on an individual basis and based on the plan provisions and benefit accrual rates applicable to that individual.

For the year ended June 30, 2016, the State recognized pension expense of \$3,504,834. At June 30, 2016, the State reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources (expressed in thousands):

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 895	\$ (1,479)
Net difference between projected and actual earnings on pension plan investments	3,099	(4,341)
Changes in proportion and differences between State contributions and proportionate share of contributions	-	(155)
State contributions subsequent to the measurement date	5,227	-
Total	\$ 9,221	\$ (5,975)

Deferred outflows of resources of \$5,227,095 for contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2017.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows (expressed in thousands):

Year Ended June 30:	
2017	\$ (979)
2018	(979)
2019	(980)
2020	957
2021	-
Thereafter	-

(Note 11 Continued)

The following table presents the changes in the net pension liability for JRS for the year ended June 30, 2015 (expressed in thousands):

	2015
Total pension liability	
Service cost	\$ 3,593
Interest	8,876
Differences between expected and actual experience	1,250
Benefit payments, including refunds	(4,896)
Other	2,357
Net change in total pension liability	11,180
Total pension liability - beginning	108,630
Total pension liability - ending (a)	\$ 119,810
Plan fiduciary net position	
Contributions - employer	\$ 6,155
Contributions - employee	96
Net investment income	3,206
Benefit payments, including refunds	(4,896)
Administrative expense	(86)
Other	2,357
Net change in plan fiduciary net position	6,832
Plan fiduciary net position - beginning	92,113
Plan fiduciary net position - ending (b)	\$ 98,945
Net pension liability - beginning	\$ 16,517
Net pension liability - ending (a) - (b)	\$ 20,865
Plan fiduciary net position as a percentage of total pension liability	83%
Covered-employee payroll (measurement as of end of fiscal year)	\$ 19,930
Net pension liability as a percentage of covered-employee payroll	105%

Actuarial Assumptions – The State’s net pension liability was measured as of June 30, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The total pension liability was determined using the following actuarial assumptions, applied to all periods included in the measurement:

<i>Inflation rate:</i>	3.50%
<i>Investment rate of return:</i>	8.00%
<i>Projected salary increases:</i>	3.00% - 8.00% varies by service
<i>Consumer price index:</i>	3.50%
<i>Other assumptions:</i>	Same as those used in the June 30, 2015 funding actuarial valuation

Mortality rates were based on the RP-2000 Combined Healthy Mortality Table projected to 2013 with Scale AA, set back one year for females (no age setback for males).

The actuarial assumptions used in the June 30, 2015 valuation were based on the results of an actuarial experience study for the period July 1, 2006, through June 30, 2012.

Investment Policy – The Retirement Board evaluates and establishes the investment portfolio target asset allocations and the expected real rates of return (expected returns, net of investment expenses and inflation) for each asset class.

The Board reviews these asset allocations and capital market expectations annually. The System’s target asset allocations and current long-term expected real rates of return for each asset class included in the fund’s investment portfolio as of June 30, 2015, are included in the following table:

Asset Class	Target Allocation	Long-term Expected Real Rate of Return
Domestic equity	49%	5.50%
International equity	21%	5.75%
Domestic fixed income	30%	0.25%

Discount Rate – The discount rate used to measure the total pension liability was 8% as of June 30, 2015. The projection of cash flows used to determine the discount rate assumed that contributions will be made monthly at the current contribution rate and the payment to amortize the unfunded actuarial liability is assumed to be paid at the end of the year for State and monthly for non-state agencies. Based on those assumptions, the pension plan’s fiduciary net position was projected to be available to make all projected future benefit payments for current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

(Note 11 Continued)

Sensitivity of the Net Pension Liability to Changes in the Discount Rate – The following presents the State’s proportionate share of the net pension liability using the discount rate of 8%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (7%) or 1-percentage-point higher (9%) than the current rate (expressed in thousands):

	1% Decrease in Discount Rate (7%)	Discount Rate (8%)	1% Increase in Discount Rate (9%)
Net pension liability \$	31,043	18,763	8,370

Pension Plan fiduciary net position – Detailed information about the pension plan’s fiduciary net position is available in the separately issued LRS report.

Payables to the pension plan – At June 30, 2016, the State reported payables to the defined benefit pension plan of \$258,496 for legally required employer contributions not yet remitted to JRS.

D. Other Postemployment Benefits

Plan Description – The State Retirees’ Health and Welfare Benefits Fund, Public Employees’ Benefits Program (“PEBP”) of the State of Nevada (“Retirees’ Fund”) was created in 2007 by the Nevada Legislature to account for the financial assets designated to offset the portion of current and future costs of health and welfare benefits paid on behalf of state retirees. NRS 287.0436 established the Retirees’ Fund as an irrevocable trust fund for the purpose of providing retirement benefits other than pensions. The Retirees’ Fund is a multiple-employer cost-sharing defined postemployment benefit plan administered by the Board of the Public Employees’ Benefits Program of the State of Nevada. The Retirees’ Fund provides benefits other than pensions to eligible retirees and their dependents through the payment of subsidies to the PEBP. PEBP administers a group health and life insurance program for covered employees, both active and retired, of the State, and certain other participating public employers within the State of Nevada. NAC 287.530 establishes the benefit upon the retiree. All Nevada public employees who retire with at least five years of public service and who have State service are eligible to receive benefits from the Retirees’ Fund. State service is defined as employment with any Nevada State agency, the Nevada System of Higher Education and any State Board or Commission. A portion of the monthly premiums are deducted from pension checks and paid to the PEBP. The cost varies depending on which health plan the retiree chooses, as well as the amount of subsidy they receive.

The Retirees’ Fund issues a stand-alone financial report that includes financial statements and required supplementary information. The State reports the Retirees’ Fund as a trust fund. The Retirees’ Fund financial report may be obtained from Public Employees’ Benefits Program, 901 South Stewart Street, Suite 1001, Carson City, NV 89701.

Summary of Significant Accounting Policies - The financial statements of the Retirees’ Fund have been prepared using the accrual basis of accounting and the economic resources measurement focus. Employer contributions are recognized when due and the employer has made a formal commitment to provide the contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan. The Retirees’ Fund does not receive member contributions.

Method Used to Value Investments – The Retiree’s Fund and the Retirement Benefit Investment Fund (RBIF) both hold investments that are measured at fair value on a recurring basis and categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. Debt and equity securities classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities. All investments are classified in Level 1.

Contributions and Funding Policy - NRS 287.046 establishes a subsidy to pay an amount toward the cost of the premium or contribution for the persons retired from the State. Contributions to the Retirees’ Fund are paid by the State of Nevada through an assessment of actual payroll paid by each State entity. For the period from July 1, 2015 through June 30, 2016 the rate assessed was 2.126% of annual covered payroll. The assessment is based on an amount provided by the Legislature each biennium in session law. For the year ended June 30, 2016, the State, its component units, State Boards and Commissions, and other participating public employers contributed \$32,213,079 to the plan, which is 100% of the contractually required contribution. For the years ended June 30, 2015 and 2014 the State, its component units, State Boards and Commissions, and other participating public employers contributed \$37,758,981, and \$32,697,856, respectively, to the plan, which equaled 100% of the contractually required contribution each year.

Note 12 - Risk Management

The State of Nevada established the Self-Insurance and Insurance Premiums funds in 1983 and 1979, respectively. Both funds are classified as internal service funds.

Interfund premiums are reported as interfund services provided and used. All State funds participate in the insurance program. Changes in the claims liabilities during the past two fiscal years were as follows (expressed in thousands):

	Self Insurance Fund	Insurance Premiums Fund
Balance June 30, 2014	\$ 47,154	\$ 65,378
Claims and changes in estimates	221,215	11,899
Claim payments	(207,711)	(12,538)
Balance June 30, 2015	60,658	64,739
Claims and changes in estimates	220,238	14,736
Claim payments	(217,882)	(15,758)
Balance June 30, 2016	\$ 63,014	\$ 63,717
Due Within One Year	\$ 63,014	\$ 16,778

In accordance with GASB, a liability for claims is reported if information received before the issuance of the financial statements indicates it is probable a liability has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated. These liabilities include incremental claims adjustment costs. A reserve for losses has been established in both funds to account for these liabilities and is included in the liability section of the Statement of Net Position.

There was no insurance coverage for excess liability insurance.

There are several pending lawsuits or unresolved disputes involving the State or its representatives at June 30, 2016. The estimated liability for these claims has been factored into the calculation of the reserve for losses and loss adjustment expenses developed.

A. Self-Insurance Fund

The Self-Insurance Fund administers the group health, life and disability insurance for covered employees, both active and retired, of the State and certain other participating public employers within the State. All public employers in the State are eligible to participate in the activities of the Self-Insurance Fund and currently, in addition to the State, there are five public employers whose employees are covered under the plan. Additionally, all retirees of public employers contracted with the Self-Insurance Fund to provide coverage to their active employees are eligible to join the program subsequent to their

retirement. Public employers are required to subsidize their retirees who participate in the plan in the same manner the State subsidizes its retirees. Currently, the State, the Nevada System of Higher Education and one hundred twenty-two public employers are billed for retiree subsidies. The Self-Insurance Fund is overseen by the Public Employees' Benefit Program Board. The Board is composed of ten members, nine members appointed by the Governor, and the Director of the Department of Administration or their designee.

The Self-Insurance Fund is self-insured for medical, dental, vision, mental health and substance abuse benefits and assumes all risk for claims incurred by plan participants. Fully insured HMO products are also offered. Long-term disability and life insurance benefits are fully insured by outside carriers. For the self-insured benefits, fund rate-setting policies have been established after consultation with an actuary. The participating public employers, with the exception of the State, are not subject to supplemental assessment in the event of deficiencies.

The management of the Self-Insurance Fund establishes claims liabilities based on estimates of the ultimate cost of claims (including future claim adjustment expenses) that have been reported but not settled and of claims that have been incurred but not reported and the unused portion of the Health Reimbursement Arrangement (HRA) liability. Because actual claims costs depend on such complex factors as inflation, changes in doctrines of legal liability and damage awards, the process used in computing claims liabilities does not necessarily result in an exact amount. Upon consultation with an actuary, claims liabilities are recomputed annually using a variety of actuarial and statistical techniques to produce current estimates that reflect recent settlements, claim frequency and other economic and social factors. A provision for inflation in the calculation of estimated future claims costs is implicit in the calculation, because reliance is placed both on actual historical data that reflect past inflation and on other factors that are considered to be appropriate modifiers of past experience. Adjustments to claims liabilities are charged or credited to expense in the periods in which claims are made.

B. Insurance Premiums Fund

The Insurance Premiums Fund provides general, civil (tort), and auto liability insurance to State agencies, workers' compensation insurance for State employees excluding NSHE, and auto physical damage and property insurance for State agencies.

For the period beginning January 1, 2001, and for each calendar year thereafter, the Fund purchased a high deductible pol-

(Note 12 Continued)

ity for workers' compensation. Liabilities in the amount of \$49,841,992 as of June 30, 2016 were determined using standard actuarial techniques as estimates for the case, reserves, incurred but not reported losses and allocated loss adjustment expenses under the plan as of June 30, 2016.

The Fund is financed by the State. The State has a maximum exposure of \$50,000 through October 1, 2007, \$75,000 through October 1, 2011 and \$100,000 thereafter for each general liability claim, with the exception of claims that are filed in other jurisdictions, namely, federal court. Those claims filed in federal court are not subject to the limit. Per State statute, if, as the result of future general liability or catastrophic losses, fund resources are exhausted, coverage is first provided by the reserve for statutory contingency account and would then revert to the General Fund.

The Fund is fully self-insured for general, civil and vehicle liability. The Fund is also self-insured for comprehensive and collision loss to automobiles, self-insured to \$250,000 for property loss with commercial insurance purchased to cover the excess above this amount, and commercially insured for losses to boilers and machinery and certain other risks.

At June 30, 2016, incurred but not reported claims liability for general, civil and auto liability insurance is based upon standard actuarial techniques, which take into account financial data, loss experience of other self-insurance programs and the insurance industry, the development of known claims, estimates of the cost of reported claims, incurred but not reported claims, and allocated loss adjustment expenses. The incurred but not reported claims liability for property casualty insurance is based upon the estimated cost to replace damaged

property. The liability for estimated losses from reported and unreported claims in excess of the amounts paid for the workers' compensation policies is determined using standard actuarial techniques, which take into account claims history and loss development factors for similar entities. Incurred but not reported claims liabilities are included in the reserve for losses.

The State is contingently liable for the cost of post retirement heart and lung disease benefits payable under the Nevada Occupational Disease Act. Any fireman or police officer that satisfies the five-year employment period requirement under this act is eligible for coverage under Workers' Compensation for heart and lung disease. A range of estimated losses from \$5,224,500 to \$18,779,100 for heart disease and \$5,761,870 for lung disease have been determined using standard actuarial techniques. Due to the high degree of uncertainty surrounding this coverage, no accrual for these losses is reflected in the financial statements.

At June 30, 2016 total liabilities exceeded total assets by \$49,982,199. The Fund is liable for approximately \$50,000,000 as of June 30, 2016 in potential claims settlements, which have yet to be funded through premium contributions. As NRS 331.187 provides that if money in the Fund is insufficient to pay a tort claim, the claim is to be paid from the reserve for statutory contingency account, and, as management assesses premiums to cover current claims payments, management believes that this provides the opportunity for the Fund to satisfy these liabilities.

Note 13 - Fund Balances and Net Position

A. Net Position-Restricted by Enabling Legislation

The government-wide statement of net position reports \$2,258,085,033 of net position-restricted for the primary government, of which \$207,583,030 is restricted by enabling legislation.

B. Governmental Fund Balances

Governmental fund balances are classified as nonspendable, restricted, committed, assigned and/or unassigned based primarily on the extent to which the State is bound to observe constraints imposed on the use of the resources of the fund. A summary of governmental fund balances at June 30, 2016, is shown below (expressed in thousands):

Notes to Financial Statements

For the Fiscal Year Ended June 30, 2016

NEVADA

(Note 13 Continued)

C. Individual Fund Deficit

Nonmajor Enterprise Funds:

Insurance Administration and Enforcement - The Insurance Administration and Enforcement Fund accounts for activities related to the administration and enforcement of the Nevada Insurance Code and other laws and regulations enforced by the Department of Business and Industry Division of Insurance. The fund recorded a decrease in net position of \$1,519,921 for the year ended June 30, 2016, resulting in negative net position of \$2,654,268 at June 30, 2016.

(Note 13 Continued)

Nevada Magazine – The Nevada Magazine Fund accounts for the operation of the publication, Nevada Magazine, which is published to promote tourism. The fund recorded a decrease in net position of \$16,232 for the year ended June 30, 2016, resulting in a negative net position of \$689,424 at June 30, 2016.

Internal Service Funds:

Buildings and Grounds – The Buildings and Grounds Fund accounts for the maintenance, housekeeping and security of most State buildings. The fund recorded a decrease in net position of \$20,899 for the year ended June 30, 2016, resulting in a negative net position of \$3,608,157 at June 30, 2016.

Communications – The Communications Fund accounts for the operation of mail services for State agencies in Carson City, Reno, Las Vegas and Elko. The fund recorded an increase in net position of \$180,586 for the year ended June 30, 2016, resulting in a negative net position of \$172,420 at June 30, 2016.

Insurance Premiums – The Insurance Premiums Fund allocates the cost of fidelity insurance, property insurance and workers’ compensation insurance to State agencies. The fund recorded an increase in net position of \$836,572 for the year ended June 30, 2016, resulting in negative net position of \$49,982,199 at June 30, 2016.

Administrative Services – The Administrative Services Fund provides administrative and accounting services to various divisions of the Department of Administration. The fund recorded a decrease in net position of \$226,236 for the year ended June 30, 2016, resulting in negative net position of \$2,867,990 at June 30, 2016.

Personnel – The Personnel Fund accounts for the costs of administering the State personnel system. The fund recorded an increase in net position of \$305,995 for the year ended June 30, 2016, resulting in negative net position of \$7,286,488 at June 30, 2016.

Purchasing – The Purchasing Fund provides purchasing services to State agencies and other governmental units. The fund recorded an increase in net position of \$429,670 for the year ended June 30, 2016, resulting in negative net position of \$2,606,781 at June 30, 2016.

Information Services – The Information Services Fund accounts for designing, programming, and maintaining data processing software and also operating the State’s central computer facility, radio communication and telecommunication systems. The fund recorded an increase in net position of \$2,289,300 for the year ended June 30, 2016, resulting in negative net position of \$12,930,201 at June 30, 2016.

Note 14 - Principal Tax Revenues

The principal taxing authorities for the State of Nevada are the Nevada Tax Commission and the Nevada Gaming Commission.

The Nevada Tax Commission was created under NRS 360.010 and is the taxing and collecting authority for most non-gaming taxes. The following are the primary non-gaming tax revenues:

Sales and Use Taxes are imposed at a minimum rate of 6.85%, with county and local option up to an additional 1.25%, on all taxable sales and taxable items of use. The State receives tax revenue of 2% of total sales with the balance distributed to local governmental entities and school districts.

Modified Business Tax is imposed at different rates for businesses, financial institutions and mining. Businesses other than financial institutions and mining are assessed a tax at a rate of 1.475% per calendar quarter for amounts the

wages exceed \$50,000. Modified Business Tax is imposed on financial institutions and mining at 2% on gross wages paid by the employer during the calendar quarter. There is an allowable deduction from the gross wages for amounts paid by the employer for qualified health insurance or a qualified health benefit plan.

Insurance Premium Tax is imposed at 3.5% on insurance premiums written in Nevada. A “Home Office Credit” is given to insurance companies with home or regional offices in Nevada.

Motor Vehicle Fuel Tax is levied at 24.805 cents per gallon on gasoline and gasohol sales. 17.65 cents of the tax goes to the State Highway Fund, .75 cents goes to the Cleaning Up Petroleum Discharges Fund, .055 cents goes to the General Fund and the remaining 6.35 cents goes to the counties. The counties have an option to levy up to an additional 9 cents per gallon.

(Note 14 Continued)

Cigarette Tax is imposed at a rate of 90 mills per cigarette. A tax on tobacco products, other than cigarettes, is imposed at a rate of 30% of the wholesale price.

Commerce Tax is imposed upon each business entity whose Nevada gross revenue in a taxable year exceeds \$4 million. The business entity is entitled to deduct certain amounts. The tax rate is based on the primary business industry classification.

Lodging Tax is imposed at a rate of at least 1% of the gross receipts from the rental of transient lodging with three-eighths of the first 1% paid to the State for the Tourism Promotion Fund. In counties with populations greater than 300,000, an additional tax of up to 3% is remitted to the State for distribution to the State Supplemental School Support Account.

Other Sources of tax revenues include: Controlled Substance Tax, Jet Fuel, Liquor Tax, Live Entertainment Tax (non-gaming establishments), Business License Fees, Motor Carrier Fees, Motor Vehicle Registration Fees, Net Proceeds of Minerals Tax, Property Tax, Real Property Transfer Tax, Short-Term Lessor Fees and Tire Tax.

The Nevada Gaming Commission was created under NRS 463.022 and is charged with collecting State gaming taxes and fees. The following sources account for gaming tax revenues:

Percentage Fees are the largest of several State levies on gaming. They are based upon gross revenue and are col-

lected monthly. The fee is applied on a graduated basis at the following monthly rates: 3.5% of the first \$50,000 of gross revenue; 4.5% of the next \$84,000 of gross revenue; and 6.75% of the gross revenue in excess of \$134,000.

Live Entertainment Taxes, prior to October 1, 2015, were imposed at 10% of all amounts paid for admission, food, merchandise or refreshment, while the establishment provided entertainment in facilities with less than occupancy/seating of 7,500. A 5% rate was imposed for facilities with at least 7,500 occupancy/seating. Beginning October 1, 2015 taxes are imposed at a rate of 9% on admission to a facility where live entertainment is provided with an occupancy over 200. Live entertainment provided by escort services is also subject to the tax.

Flat Fee Collections are levied on the number of gambling games and slot machines operated. Licensees pay fees at variable rates on the number of gaming devices operated per quarter.

Other Sources of gaming tax revenues include: Unredeemed Slot Machine Wagering Vouchers, Annual State Slot Machine Taxes, Annual License Fees and Miscellaneous Collections, which consists of penalties and fines, manufacturer's, distributor's and slot route operator's fees, advance payments, race wire fees, pari-mutuel wagering tax and other nominal miscellaneous items.

Note 15 - Works of Art and Historical Treasures

The State possesses certain works of art, historical treasures, and similar assets that are not included in the capital assets shown in Note 7. The mission of the Lost City Museum in Overton is to study, preserve, and protect prehistoric Pueblo sites found in the Moapa Valley and adjacent areas and to interpret these sites through exhibits and public programs. In Reno, the Nevada Historical Society exhibits and maintains a large number of historical collections preserving the cultural heritage of Nevada. These collections are divided into four sections: library, manuscripts, photography, and museum. The Nevada State Museum in Carson City collects, preserves, and documents three general types of collections: anthropology, history, and natural history as it relates to Nevada and the Great Basin. The mission of the Nevada State Museum, Las Vegas, is to inspire and educate a diverse public about the history and natural history of Nevada. Its major collections include transportation, mining, and tourism as well as daily artifacts such as clothing, historical correspondence, business records, and photography. The Nevada State Railroad Museum, which is located in Carson City, is dedicated to educating visitors and the community through the collection, preserva-

tion and interpretation of objects directly related to railroads and railroading in Nevada. The East Ely Depot Museum, located in the historic Nevada Northern Railroad Depot building, exhibits artifacts, documents, and photographs of early Eastern Nevada mining and railroad transportation. The Nevada Arts Council with locations in Carson City and Las Vegas exhibits artwork. Its mission is to enrich the cultural life of the State and make excellence in the arts accessible to all Nevadans.

These collections are not capitalized by the State because they are:

- Held for public exhibition, education or research in furtherance of public service, rather than financial gain,
- Protected, kept unencumbered, cared for and preserved, and
- Subject to an organizational policy that requires the proceeds from sales of collection items to be used to acquire other items for collections.

Note 16 - Commitments and Contingencies

A. Primary Government

Lawsuits - The State Attorney General’s Office reported that the State of Nevada or its officers and employees were parties to numerous lawsuits, in addition to those described below. In view of the financial condition of the State, the State Attorney General is of the opinion that the State’s financial condition will not be materially affected by this litigation, based on information known at this time.

Several of the actions pending against the State are based upon the State’s (or its agents’) alleged negligence in which the State must be named as a party defendant. However, there is a statutory limit to the State’s liability of \$50,000 per cause of action through October 1, 2007 and \$75,000 per cause of action through October 1, 2011 and \$100,000 per cause of action thereafter. Such limitation does not apply to federal actions such as civil rights actions under 42 U.S.C. Section 1983 brought under federal law or to actions in other states. Building and contents are insured on a blanket replacement cost basis for all risk except certain specified exclusions.

The State and/or its officers and employees are parties to a number of lawsuits filed under the federal civil rights statutes. However, the State is statutorily required to indemnify its officers and employees held liable in damages for acts or omissions on the part of its officers and employees occurring in the course of their public employment. Several claims may thus be filed against the State based on alleged civil rights violations by its officers and employees. Since the statutory limit of liability (discussed above) does not apply in federal civil rights cases, the potential liability of the State is not ascertainable at the present time. Currently, the State is involved in several actions alleging federal civil rights violations that could result in substantial liability to the State.

In litigation filed against the Department of Taxation (DOT), the plaintiff is seeking a declaration that the Live Entertainment Tax is unconstitutional on its face and that they do not have to pay the tax. The Live Entertainment Tax is collected by the DOT as well as the Gaming Control Board. The Gaming Control Board’s collection of the Live Entertainment Tax has not been challenged. Should a refund be granted, the estimated amount to date is \$145.1 million. However, if the tax is found to be unconstitutional on its face, the statute may be completely stricken.

The Department of Taxation has litigated vigorously a lawsuit against a utility company. The lawsuit arose out of a claim for the refund of \$200.0 million in use tax paid, plus interest, on coal purchased out of the state and used in Nevada. The company claims the use tax is unconstitutional. The State won the case in the 1st Judicial District Court. The utility company appealed to the Nevada Supreme Court and is waiting for a decision. The use tax distribution is shared between the State,

counties and local governments. If the utility company’s appeal is successful, the State’s exposure upon a potentially unfavorable outcome is \$26.6 million.

Leases - The State is obligated by leases for buildings and equipment accounted for as operating leases. Operating leases do not give rise to property rights as capital leases do. Therefore, the results of the lease agreements are not reflected in the Statement of Net Position. Primary government lease expense for the year ended June 30, 2016 amounted to \$38.9 million. The following is the primary government’s schedule of future minimum rental payments required under operating leases that have initial or remaining noncancelable lease terms in excess of one year as of June 30, 2016 (expressed in thousands):

<u>For the Year Ending June 30</u>	<u>Amount</u>
2017	\$ 32,838
2018	27,681
2019	21,906
2020	17,367
2021	12,695
2022-2026	35,377
2027-2031	3,708
2032-2036	273
Total	\$ 151,845

Federal Grants - The State receives significant financial assistance from the federal government in the form of grants and entitlements, which are generally conditioned upon compliance with terms and conditions of the grant agreements and applicable federal regulations, including the expenditure of the resources for eligible purposes. Substantially all grants are subject to financial and compliance audits by federal agencies. Any disallowance as a result of these audits could become a liability of the State. As of June 30, 2016, the State is unable to estimate the amount, if any, of expenditures that may be disallowed, although the State expects such amounts, if any, to be immaterial.

Rebate Arbitrage - The Federal Tax Reform Act of 1986 imposes a rebate requirement with respect to some bonds issued by the State. Under this requirement, an amount equal to the sum of (a) the excess of the aggregate amount earned on all investments (other than certain specified exceptions) over the amount that would have been earned if all investments were invested at a rate equal to the yield on the bonds, and (b) any income earned on the excess described in (a) is required to be rebated to the U.S. Treasury, in order for the interest on the bonds to be excluded from gross income for federal income tax purposes. Rebateable arbitrage is computed as of each installment computation date. The present value of the rebateable arbitrage is \$972,000 and has been recorded as a liability in the Statement of Net Position at June 30, 2016. Future calculations might result in different rebateable arbitrage amounts.

(Note 16 Continued)

Nonexchange Financial Guarantees – The 1997 Nevada Legislature added NRS 387.513 through 387.528, allowing school districts to enter into guarantee agreements with the State Treasurer whereby money in the Permanent School Fund may be used to guarantee the debt service payments on certain bonds issued by Nevada school districts. The amount of the guarantee for bonds of each school district outstanding, at any one time, must not exceed \$40 million. Total bond guarantees at June 30, 2016 were \$238.4 million which includes accrued interest of \$1.4 million. The bonds mature at various intervals through fiscal year 2042. In the event any school district was unable to make a required payment, the State Treasurer would withdraw from the State Permanent School Fund the amount needed to cover the debt service payment. Any amount withdrawn would be deemed a loan to the school district from the State Permanent School Fund, and the State Treasurer would determine the rate of interest on the loan. Repayment would be taken from distributions from the State Distributive School Account.

Encumbrances – As of June 30, 2016, encumbered expenditures in governmental funds were as follows (expressed in thousands):

	<u>Amount</u>
General Fund	\$ 7,412
State Highway	5,017
Nonmajor governmental funds	119
Total	<u>\$ 12,548</u>

Construction Commitments – As of June 30, 2016, the Nevada Department of Transportation had total contractual commitments of approximately \$231.1 million for construction of various highway projects. Other major non-highway construction commitments for the primary government’s budgeted capital projects funds total \$66.8 million.

B. Discretely Presented Component Units

Nevada System of Higher Education (NSHE) – As of June 30, 2016, NSHE is a defendant or co-defendant in legal actions. Based on present knowledge and advice of legal counsel, NSHE management believes any ultimate liability in these matters, in excess of insurance coverage, will not materially adversely affect the net position, changes in net position or cash flows of NSHE.

The NSHE has an actuarial study of its workers’ compensation losses completed every other year. The study addresses the reserves necessary to pay open claims from prior years and projects the rates needed for the coming year. The NSHE uses a third party administrator to adjust its workers’ compensation claims.

The NSHE is self-insured for its unemployment liability. The NSHE is billed by the State each quarter based on the actual unemployment benefits paid by the State. Each year the NSHE budgets resources to pay for the projected expenditures. The amount of future benefits payments to claimants and the resulting liability to the NSHE cannot be reasonably determined as of June 30, 2016.

The NSHE receives Federal grants and awards, and amounts are subject to change based on outcomes of Federal audits. Management believes any changes made will not materially affect the net position, changes in net position or cash flows of the NSHE.

The estimated cost to complete property authorized or under construction at June 30, 2016 is \$122.5 million. These costs will be financed by State appropriations, private donations, available resources and/or long-term borrowings.

The Board of Regents, at its March 4, 2016 meeting, approved the issuance of a Promissory Note in an amount up to \$5.0 million. The authorized note is expected to be issued in calendar year 2017.

Colorado River Commission (CRC) - The CRC may from time to time be a party in various litigation matters. It is management’s opinion, based upon advice from legal counsel, that the risk of financial losses to CRC from such litigation, if any, will not have a material adverse effect on CRC’s future financial position, results of operations or cash flows. Accordingly, no provision has been made for any such losses.

The CRC does not accrue for estimated future legal and defense costs, if any, to be incurred in connection with outstanding or threatened litigation and other disputed matters but rather, records such as period costs when the services are rendered.

Nevada Capital Investment Corporation (NCIC) - The NCIC currently has commitments to the Silver State Opportunity Fund of \$50.0 million (the First Tranche). As of June 30, 2016, the NCIC has fulfilled \$35.9 million of its total commitment. The NCIC has the right, but not the obligation, to increase its capital commitment by which would be effective after the end of the First Tranche (or such other date as the NCIC and Manager may agree). If the NCIC elects to make such an additional commitment, both the amount of the NCIC’s additional commitment and an additional commitment from the Manager shall be established by agreement between the NCIC and the Manager (the Second Tranche).

Note 17 - Subsequent Events

A. Primary Government

Bonds – On November 9, 2016, the State issued \$48,790,000 in General Obligation Bonds. The Series 2016C bonds were issued primarily to finance various capital improvement projects, to award financial assistance to certain governmental entities and nonprofit organizations for the actual expenses of preserving or protecting historical buildings to be used to develop a network of cultural centers and activities. The Series 2016D bonds were issued to finance costs of environmental improvement projects for the Lake Tahoe Basin and to refund certain outstanding bonds.

On August 30, 2016, the State issued \$1,023,500 in General Obligation (Limited Tax) Open Space, Parks, and Natural Resources Bonds, Series 2016B (not subject to the Constitutional Debt Limit). These “Question 1” project bonds as set forth in Section 28 of Chapter 445 statutes of Nevada 2013 will be used for Wildlife Projects.

Certificates of Participation – On August 9, 2016, the State approved the issuance of Series 2016, Certificates of Participation for \$3,730,000. The Certificates refund the 2006 Certificates for the Nevada Legislative Counsel Bureau’s warehouse remodel. The Series evidences an undivided interest in the right to receive base rent under a lease purchase agreement to be paid by the State. The lease purchase agreement is with Nevada Real Property Corporation. The Certificates are not general obligations of the State.

B. Discretely Presented Component Units

Nevada System of Higher Education – The Board of Regents, at its September 9, 2016 meeting, approved a resolution authorizing the issuance of up to \$14,800,000 of universities revenue bonds. The System issued the bonds in October 2016.

C. New Accounting Pronouncements

In June 2015, the GASB issued Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits other than Pensions* (GASB 75), which improves accounting and

financial reporting by state and local governments for postemployment benefits other than pensions (other postemployment benefits or OPEB). It also improves information provided by state and local governmental employers about financial support of OPEB that is provided by other entities. GASB 75 is effective for fiscal years beginning after June 15, 2017. The anticipated impact of this pronouncement is uncertain at this time.

In January 2016, the GASB issued Statement No. 80, *Blending Requirements for Certain Component Units* (GASB 80), which improves financial reporting by clarifying the financial statement requirements for certain component units. The statement amends the blending requirements for the financial statement presentation of component units of all state and local governments. GASB 80 is effective for fiscal years beginning after June 15, 2016. The anticipated impact of this pronouncement is uncertain at this time.

In March 2016, the GASB issued Statement No. 82, *Pension Issues – An Amendment of GASB Statements No. 67, No. 68, and No. 73* which addresses certain issues that have been raised with respect to Statements No. 67, *Financial Reporting for Pension Plans*, No. 68, *Accounting and Reporting for Pensions*, and No. 73, *Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement No. 68, and Amendments to Certain Provisions of GASB Statements No. 67 and 68* (GASB 82). Specifically, this Statement addresses issues regarding (1) the presentation of payroll-related measures in required supplementary information, (2) the selection of assumptions and the treatment of deviations from the guidance in an Actuarial Standard of Practice for financial reporting purposes, and (3) the classification of payments made by employers to satisfy employee (plan member) contribution requirements. GASB 82 is effective for fiscal years beginning after June 15, 2017. The anticipated impact of this pronouncement is uncertain at this time.

Note 18 - Accounting Changes and Restatements

A. Primary Government

Net position as of July 1, 2015 has been restated in the Governmental Activities and the Business-type Activities to reflect a conversion from the straight line method of amortizing premiums and discounts to the interest method, for bond obligations. The change to the interest method affected the Unemployment Compensation Fund and the Water Projects Loans Fund which are major enterprise funds under Business-type Activities.

In addition, a prior period adjustment was made to decrease the General Fund balance and to increase the State Highway Fund balance to correct for the allocation of an investment loss related to the 2008 Lehman Brothers bankruptcy.

The following table shows the changes to the beginning net position as of July 1, 2015 for the primary government (expressed in thousands):

	<u>Governmental Activities</u>	<u>Business-type Activities</u>
Net position at June 30, 2015 as previously reported	\$ 3,648,254	\$ 743,907
Conversion from straight line amortization to the interest method for bond premiums/discounts	37,069	11,411
Net position at June 30, 2015 as restated	<u>\$ 3,685,323</u>	<u>\$ 755,318</u>

The following table shows the changes to the beginning fund balance/net position as of July 1, 2015 for the General Fund, State Highway Fund and proprietary funds (expressed in thousands):

	<u>Major Governmental Funds</u>		<u>Major Enterprise Funds</u>	
	<u>General</u>	<u>State Highway</u>	<u>Unemployment Compensation</u>	<u>Water Projects Loans</u>
Fund balance/net position at June 30, 2015 as previously reported	\$ 207,288	\$ 333,930	\$ 109,846	\$ 367,277
Conversion from straight line amortization to the interest method for bond premiums/discounts	-	-	10,434	977
Allocation of investment loss	(4,086)	4,086	-	-
Fund balance/net position at June 30, 2015 as restated	<u>\$ 203,202</u>	<u>\$ 338,016</u>	<u>\$ 120,280</u>	<u>\$ 368,254</u>

Taking the Cure

Everyone wants to learn the truth about this astounding new racket—how a nation has gone mad over a scramble for new wives and husbands! In a fantastic race to win the divorce business, common sense has been thrown to the winds! In this chapter the fantastic laws of Reno are revealed, showing how it's done, what it costs, and how long it takes to "reno-vate."

(Magazine Page Permission Granted by:
Nevada Historical Society)

GOODBYE WEDDING RINGS!

Tossing their discarded rings into the river from Reno's "Bridge of Sighs" are Mrs. Marjorie MacArthur (right) and Mrs. Dorothy Foltz, as they follow the custom of the liberated.

HERE'S THE CURE FACTORY

REQUIRED SUPPLEMENTAL INFORMATION

Guests appear on horseback at the Valley Ranch divorce colony near Reno, circa 1940.

(Photo and Postcard Permission Granted by: Nevada Historical Society)

The availability of quick divorces became a cottage industry for Northern Nevada during the 1930s. This cartoon depicts men and women moving to the area for just long enough to establish residency and file for divorce.

RENO

THIS IS THE PLACE, AND "X" MARKS THE SPOT, WHERE LAWYERS UNTANGLE THE MARITAL KNOT. SOMESAY, IT'S ONLY A MODERN GOMORRAH, BUT MANY HAVE LEFT THERE THE SLIPNOOSE OF SORROW. IF LIFE, THE OLD GAMBLER, HAD DEALT YOU A HAND, A SHOWDOWN WOULD MARK YOU A PIKER TO STAND; IF MAYBE YOUR PARTNER RENEGED ON YOU, AND STACKED THE DECK A TIME OR TWO, WOULDN'T IT BE MUCH MORE WORTH WHILE TO QUIT THE GAME & WITH A SMILE, TAKE THAT HEARTACHE FOR A RIDE. SPOT IT ON SIERRA'S SIDE, OUT WHERE MEN SPEAK JUST AS THEY FEEL; GIVING AND GETTING — A SQUARE DEAL — THAN HEED LOVE HI-JACKERS' LYING DISCOURSES, CAMOUFLAGING THEIR OWN SIN WHILE SCOURGING DIVORCES? OF COURSE THE SEARCHERS USUALLY FIND EXACTLY THE STUFF THEY HAVE IN MIND. DEVOTEES OF TRUTH OR REST WILL FIND THEM RIGHT HERE — IN THIS HEART OF THE WEST.

Women congregate around the roulette table at The Willows in 1931 to place newly legal bets. In addition to being an exclusive gambling hall, The Willows catered to men and women living in Reno's so-called "divorce colonies," where they had often moved from other states to secure a quick divorce.

A crowd gathers around the roulette table at The Willows (1931).

Gamblers place newly legal bets in 1931 with a crowd of onlookers.

**Notes to Required Supplementary Information
Budgetary Reporting**

NEVADA

For the Fiscal Year Ended June 30, 2016

The accompanying Budgetary Comparison Schedule – General Fund and Major Special Revenue Funds presents both the original and the final legally adopted budgets, as well as actual data on a budgetary basis. (Note 2 of the basic financial statements identifies the budgeting process and control.)

The original budget is adopted through passage of the General Appropriations Act, which allows for expenditures from unrestricted revenues, while the Authorized Expenditures Act allows for expenditures from revenues collected for specific purposes (restricted revenues). For programs financed from restricted revenues, spending authorization is generally contingent upon recognition of the related revenue. Reductions of spending authority occur if revenues fall short of estimates. If revenues exceed the estimate, supplemental appropriations are required before the additional resources can be spent.

Generally Accepted Accounting Principles (GAAP) require that the final legal budget be reflected in the “final budget” column. Therefore, updated revenue estimates available for appropriations as of August 23 are reported instead of the amounts disclosed in the original budget. The August 23, 2016 date is used because this is the date for which the Legislative Interim Finance Committee affected the last changes to the fiscal year ended June 30, 2016 budget as permitted by NRS 353.220.

Since the budgetary and GAAP presentations of actual data differ, a reconciliation of ending fund balances is presented below (expressed in thousands):

	<u>General Fund</u>	<u>State Highway</u>	<u>Municipal Bond Bank</u>
Fund balances (budgetary basis) June 30, 2016	\$ 851,140	\$ 518,619	\$ 1
Adjustments:			
<i>Basis differences:</i>			
Petty cash or outside bank accounts	5,673	145	-
Investments not recorded on the budgetary basis	11,889	-	-

Accrual of certain other receivables	242,056	8,124	1,086
Inventory	7,383	18,903	-
Advances to other funds	2,798	-	-
Accrual of certain accounts payable and other liabilities	(423,533)	(17,190)	-
Unearned revenues	(122,092)	-	-
Deferred inflows - unavailable	(194,972)	(2,642)	-
Encumbrances	7,413	5,017	-
Other	(3,018)	1,763	-
<i>Perspective differences:</i>			
Special revenue fund reclassified to General Fund for GAAP purposes	13,425	-	-
Fund balances (GAAP basis) June 30, 2016	<u>\$ 398,162</u>	<u>\$ 532,739</u>	<u>\$ 95,327</u>

Total fund balance on the budgetary basis in the General Fund at June 30, 2016, is composed of both restricted funds, which are not available for appropriation, and unrestricted funds as follows (expressed in thousands):

Total fund balance (budgetary basis)	\$ 851,140
Restricted funds	<u>(442,130)</u>
Unrestricted fund balance (budgetary basis)	<u>\$ 409,010</u>

Pension Plan Information

For the Fiscal Year Ended June 30, 2016

A. Multiple-employer Cost Sharing Plan

The following schedule presents the State's (primary government's) proportionate share of the net pension liability for the Public Employees' Retirement System at June 30, 2015 (expressed in thousands):

	2015	2014
State's proportion of the net pension liability	16.4%	16.6%
State's proportionate share of the net pension liability	\$ 1,879,626	\$ 1,730,601
State's covered-employee payroll	\$ 874,098	\$ 872,316
State's proportionate share of the net pension liability as a percentage of its covered-employee payroll	215%	198%
Plan fiduciary net position as a percentage of the total pension liability	75%	76%

Note: This schedule requires ten years of information to be presented. However, until ten years of data is available, only those years for which information is available will be presented.

The following schedule presents a ten year history of the State's (primary government's) contributions to the Public Employees' Retirement System (expressed in thousands):

	2016	2015	2014	2013	2012	2011	2010	2009	2008	2007
Statutorily required contributions	\$ 190,528	\$ 176,579	\$ 174,712	\$ 162,484	\$ 163,219	\$ 160,959	\$ 164,630	\$ 153,768	\$ 146,754	\$ 136,270
Contributions in relation to the										
statutorily required contribution	190,528	176,579	174,712	162,484	163,219	160,959	164,630	153,768	146,754	136,270
Contribution (deficiency) excess	-	-	-	-	-	-	-	-	-	-
Covered-employee payroll	906,687	874,098	872,316	855,179	859,047	946,818	968,412	961,050	917,213	851,688
Contributions as a percentage of covered employee payroll	21%	20%	20%	19%	19%	17%	17%	16%	16%	16%

B. Single-employer Plan

The following schedule presents the changes in the net pension liability for the Legislators' Retirement System for the year ended June 30, 2015 (expressed in thousands):

	2015	2014
Total pension liability		
Service cost	\$ 39	\$ 37
Interest	426	428
Differences between expected and actual experience	(109)	-
Benefit payments, including refunds	(497)	(494)
Net change in total pension liability	(141)	(29)
Total pension liability - beginning	5,531	5,560
Total pension liability - ending (a)	\$ 5,390	\$ 5,531
Plan fiduciary net position		
Contributions - employer	\$ 156	\$ 213
Contributions - employee	23	27
Net investment income	179	804
Benefit payments, including refunds	(497)	(494)
Administrative expense	(85)	(46)
Other	86	46
Net change in plan fiduciary net position	(138)	550
Plan fiduciary net position - beginning	4,873	4,323
Plan fiduciary net position - ending (b)	\$ 4,735	\$ 4,873
Net pension liability - beginning	\$ 658	\$ 1,237
Net pension liability - ending (a) - (b)	\$ 655	\$ 658
Plan fiduciary net position as a percentage of total pension liability	88%	88%
Covered-employee payroll	N/A	N/A
Net pension liability as a percentage of covered-employee payroll	N/A	N/A

Note: This schedule requires ten years of information to be presented. However, until ten years of data is available, only those years for which information is available will be presented.

(Continued)

The following schedule presents the State's (primary government's) contributions to the Legislators' Retirement System (expressed in thousands):

	2016	2015
Statutorily required contributions	\$ -	\$ 312
Contributions in relation to the statutorily required contribution	\$ -	\$ 312
Contribution (deficiency) excess	\$ -	\$ -
Covered-employee payroll	N/A	N/A
Contributions as a percentage of covered-employee payroll	N/A	N/A

Note: This schedule requires ten years of information to be presented. However, until ten years of data is available, only those years for which information is available will be presented

C. Agent Multiple-employer Plan

The following schedule presents the changes in the net pension liability for the Judicial Retirement System for the year ended June 30, 2015 (expressed in thousands):

	2015	2014
Total pension liability		
Service cost	\$ 3,593	\$ 3,411
Interest	8,876	8,367
Differences between expected and actual experience	1,250	(2,666)
Benefit payments, including refunds	(4,896)	(4,295)
Other	2,357	990
Net change in total pension liability	11,180	5,807
Total pension liability - beginning	108,630	102,823
Total pension liability - ending (a)	\$ 119,810	\$ 108,630
Plan fiduciary net position		
Contributions - employer	\$ 6,155	\$ 6,002
Contributions - employee	96	-
Net investment income	3,206	14,252
Benefit payments, including refunds	(4,896)	(4,295)
Administrative expense	(86)	(83)
Other	2,357	990
Net change in plan fiduciary net position	6,832	16,866
Plan fiduciary net position - beginning	92,113	75,247
Plan fiduciary net position - ending (b)	\$ 98,945	\$ 92,113
Net pension liability - beginning	\$ 16,517	\$ 27,576
Net pension liability - ending (a) - (b)	\$ 20,865	\$ 16,517
Plan fiduciary net position as a percentage of total pension liability	83%	85%
Covered-employee payroll (measurement as of end of fiscal year)	\$ 19,930	\$ 18,934
Net pension liability as a percentage of covered-employee payroll	105%	87%

Note: This schedule requires ten years of information to be presented. However, until ten years of data is available, only those years for which information is available will be presented.

The following schedule presents the State's (primary government's) contributions to the Judicial Retirement System (expressed in thousands):

	2016	2015
Actuarially determined contribution	\$ 5,443	\$ 5,266
Contributions in relation to the actuarially determined contribution	\$ 5,227	\$ 5,535
Contribution (deficiency) excess	\$ (216)	\$ 269
Covered-employee payroll	\$ 17,425	\$ 17,132
Contributions as a percentage of covered-employee payroll	30%	32%

Note: This schedule requires ten years of information to be presented. However, until ten years of data is available, only those years for which information is available will be presented

Notes to Required Supplementary Information – actuarial assumptions used in calculating the actuarially determined contributions can be found in Note 11C.

Schedule of Infrastructure Condition and Maintenance Data

NEVADA

For the Fiscal Year Ended June 30, 2016

The State has adopted the modified approach for reporting infrastructure assets defined as a single roadway network that includes bridges. Bridges are not considered a subsystem as they are included in the cost of road construction. Under this approach, the State expenses certain maintenance and preservation costs and does not report depreciation expense. The single roadway network accounted for under the modified approach includes the combination of 5,400 centerline miles of roads and 1,160 bridges.

The State manages its roadway network by dividing the roadway system into five categories based on the traffic load. The categories range from category I, representing the busiest roadways and interstates, to category V, representing the least busy rural routes with an average daily traffic of less than 400 vehicles. To monitor the condition of the roadways the State uses the International Roughness Index (IRI). IRI measures the cumulative deviation from a smooth surface. The lower the IRI value, the better the condition of the roadway. The State realigned its goals to maintain a certain percentage of each category of its roadways. The realignment was based on the Pavement and Bridge Condition Notice of Proposed Rulemaking released by the Federal Highway Administration (FHWA). The new policy is to maintain each category with an IRI of 95 or less. The prior policy was to maintain each category with an IRI of 80 or less. Therefore, the first table shows the most current condition assessment under the new policy and the second table shows the condition assessment under the prior policy.

Condition Level of the Roadways					
Percentage of roadways with an IRI of 95 or less					
	I	II	Category III	IV	V
State Policy-minimum percentage	70%	65%	60%	40%	10%
Actual results of 2015 condition assessment	87%	82%	85%	45%	13%

Condition Level of the Roadways					
Percentage of roadways with an IRI of 80 or less					
	I	II	Category III	IV	V
State Policy-minimum percentage	70%	65%	60%	40%	10%
Actual results of 2014 condition assessment	84%	71%	62%	33%	7%
Actual results of 2012 condition assessment	84%	85%	84%	32%	9%

The State has set a policy to maintain its bridges so that not more than 10 percent are structurally deficient or functionally obsolete. The following tables show the State's policy and the condition level of the roadways and bridges.

Condition Level of the Bridges			
Percentage of substandard bridges			
	2015	2014	2012
State Policy-maximum percentage	10%	10%	10%
Actual results condition assessment	4%	4%	4%

The following table shows the State's estimate of spending necessary to preserve and maintain the roadway network at, or above, the established condition level and the actual amount spent during the past five fiscal years.

Maintenance and Preservation Costs					
(Expressed in Thousands)					
	2016	2015	2014	2013	2012
Estimated	\$ 306,532	\$ 386,093	\$ 433,338	\$ 402,650	\$ 322,210
Actual	295,244	329,677	360,904	325,313	304,333

Maintenance and preservation costs are primarily funded with highway user revenue, fuel taxes, vehicle registration and license fees. The funding level for maintenance and preservation costs is affected by the amount of taxes and fees collected and the amount appropriated for construction of new roadways.

COMBINING STATEMENTS AND SCHEDULES

Film crews document progress on the Boulder Dam construction in 1935.

(Photo's Permission Granted by:
Nevada Historical Society)

Below earth and concrete,
construction on Boulder Dam
proceeds in 1932 with artificial light.

A construction worker bends over in the heat at the Boulder Dam site (1933).

NONMAJOR GOVERNMENTAL FUNDS

NONMAJOR SPECIAL REVENUE FUNDS

Employment Security Accounts for the administration of employment training programs (NRS 612.607), unemployment compensation claims (NRS 612.605), and employment security laws (NRS 612.615).

Unemployment Comp Bond Fund Accounts for special bond contributions assessed on employers for the purpose of retiring the bonds in the Unemployment Compensation Fund (NRS 612.613)

Regulatory Accounts for receipts and expenditures related to enforcement of regulations on manufactured housing (NRS 489.491), enforcement of regulations pursuant to dairy products (NRS 584.053), legal judgments against real estate licensees (NRS 645.842), regulation of public utilities (NRS 703.147), and regulation of taxicabs (NRS 706.8825).

Higher Education Capital Construction Accounts for the first \$5,000,000 and 20% of the remaining annual slot machine tax, which is designated for capital construction and payment of principal and interest of construction bonds for higher education (NRS 463.385).

Cleaning Up Petroleum Discharges Accounts for fees collected and claims paid related to the use, storage or discharge of petroleum (NRS 590.830).

Hospital Care to Indigent Persons Accounts for taxes levied to provide care to indigent persons hospitalized from motor vehicle accidents, and for taxes received and payments to counties for supplemental medical assistance to indigent persons (NRS 428.175).

Tourism Promotion Accounts for room taxes and other monies designated for the support of the Commission on Tourism (NRS 231.250).

Offenders' Store Accounts for operations of the general merchandise stores and snack bars used by offenders. Earnings, except interest, must be expended for the welfare and benefit of all offenders (NRS 209.221).

Tobacco Settlement Accounts for proceeds from settlement agreements with and civil actions against manufacturers of tobacco products, forty percent of which is allocated to the Millennium Scholarship fund for the purpose of increasing the number of State residents who enroll in and attend a university or community college of the Nevada System of Higher Education (NRS 396.926), and sixty percent of which is allocated to the Healthy Nevada fund (NRS 439.620) for the purpose of assisting Nevada residents in obtaining and maintaining good health.

Attorney General Settlement Accounts for receipts from the National Mortgage Settlement for purposes of foreclosure relief and housing programs.

Gift Accounts for gifts and grants received by the Department of Conservation and Natural Resources (NRS 232.070), the Department of Wildlife (NRS 501.3585), the State Board of Education (NRS 385.095), the State Library and Archives (NRS 378.090), the Division of State Parks (NRS 407.075), the Rehabilitation Division of the Department of Employment, Training and Rehabilitation (NRS 232.960), and the Department of Health and Human Services (NRS 232.355).

Natural Resources Accounts for grants to publicly owned water systems for water conservation and capital improvements (NRS 349.952).

NV Real Property Corp General Fund Accounts for the general fund activity of the Nevada Real Property Corporation, a blended component unit incorporated to finance certain construction projects.

Miscellaneous Accounts for receipts and expenditures related to compensation of victims of crime (NRS 217.260); fees related to private investigators and recoveries for unfair trade practices (NRS 228.096); prosecution of racketeering (NRS 207.415); and the office of advocate for customers of public utilities (NRS 228.310). It also accounts for private money received by the Division of Museums and History for the Dedicated Trust Fund (NRS 381.0031; receipts for the care of sites for the disposal of radioactive waste (NRS 459.231); and fees collected from owners of mobile home parks to provide mobile home lot rent assistance to low-income mobile home owners (NRS 118B.215).

NONMAJOR DEBT SERVICE FUNDS

Consolidated Bond Interest and Redemption Fund Accumulates monies for the payment of leases and of principal and interest on general obligation bonds of the State (NRS 349.090).

Highway Revenue Bonds Accumulates monies for the payment of principal and interest on highway revenue bonds of the State (NRS 349.300).

NONMAJOR CAPITAL PROJECTS FUNDS

Parks Capital Project Construction Accounts for the parks improvements program for the Division of State Parks of the Department of Conservation and Natural Resources (NRS 407.065).

Capital Improvement Program - Motor Vehicle Accounts for capital improvement projects for the Department of Motor Vehicles and Public Safety (NRS 341.146).

Capital Improvement Program - Human Resources Accounts for capital improvement projects for the Department of Health and Human Services (NRS 341.146).

Capital Improvement Program - University System Accounts for capital improvement projects for the Nevada System of Higher Education (NRS 341.146).

Capital Improvement Program - General State Government Accounts for capital improvement projects for general government (NRS 341.146).

Capital Improvement Program - Prison System Accounts for capital improvement projects for the Department of Corrections (NRS 341.146).

Capital Improvement Program - Military Accounts for capital improvement projects for the Department of Military (NRS 341.146).

Capital Improvement Program - Wildlife Accounts for capital improvement projects for the Department of Wildlife (NRS 341.146).

NONMAJOR PERMANENT FUND

Henry Wood Christmas Fund Accounts for the bequest of the late Henry Wood to provide Christmas gifts to orphans.

An ox wagon leads parade for graduates of Churchill County High School in Fallon, NV.

(Photo's Permission Granted by: Nevada Historical Society)

An agricultural stronghold, Fallon quickly grew from its establishment in 1896 into one of Nevada's largest towns by the 1930s.

Churchill County High School in 1930. The building remains in use today as Churchill County Middle School.

An Independence Day Parade proceeds across the Virginia Street Bridge in Reno during the 1930s.

(Photo's Permission Granted by:
Nevada Historical Society)

The White Hats riding group and band perform at the Reno Rodeo on July 4, 1938.

The First National Bank of Nevada, shown here on North Virginia Street in Reno, partnered with the Nevada State Journal in 1936 to finance the "One Sound State" campaign.

NONMAJOR ENTERPRISE FUNDS

Workers' Compensation and Safety Records assessments on insurers for compensation of injured workers and administration of regulations for employee safety (NRS 616A.425), assesses self-insurers to pay claims against insolvent self-insured employers (NRS 616B.309), accounts for compensation benefits to physically impaired employees from a subsequent injury in the course of employment (NRS 616B.554, 616B.575, 616B.584), and accounts for injury claims of employees of uninsured employers (NRS 616A.430).

Insurance Administration and Enforcement Accounts for activities related to the administration and enforcement of the Nevada Insurance Code and other laws and regulations enforced by the Department of Business and Industry Division of Insurance (NRS 680C.100).

Gaming Investigative Accounts for activities related to investigations of gaming license applicants (NRS 463.331).

Forestry Nurseries Accounts for the self-supporting operation of State nurseries, which propagate, maintain and distribute plants for conservation purposes (NRS 528.100).

Prison Industry Accounts for a self-supporting program of job training through the employment of inmates in farming and manufacturing (NRS 209.189).

Nevada Magazine Accounts for the operation of the publication, Nevada Magazine, which is published to promote tourism (NRS 231.290).

Marlette Lake Water System Accounts for the costs of operating the State-owned Marlette Lake Water System. The system serves the State Buildings and Grounds Division and portions of Carson City and Storey County (NRS 331.180).

The Waldorf Club in Reno on opening night in 1931, following Nevada's legalization of gambling.

(Photo and Postcard Permission Granted by: Nevada Historical Society)

Photo Permission Granted by: Nevada Historical Society

Patrons celebrate an evening out at the Reno Country Club in the mid-1930s.

A 1939 postcard highlights many contemporary attractions of the Reno area.

INTERNAL SERVICE FUNDS

Self-Insurance Accounts for self-insured group life, accident and health insurance plans for State and other government employees (NRS 287.0435).

Buildings and Grounds Accounts for the maintenance, housekeeping and security of most State buildings (NRS 331.101).

Fleet Services Accounts for the operations of the State vehicle fleet (NRS 336.110).

Communications Accounts for the operation of mail services for State agencies in Carson City, Reno, Las Vegas and Elko (NRS 378.143).

Insurance Premiums Allocates the costs of fidelity insurance, property insurance and workers' compensation insurance to State agencies (NRS 331.187).

Administrative Services Provides administrative and accounting services to various divisions of the Department of Administration (NRS 232.219).

Personnel Accounts for the costs of administering the State personnel system. Operations are financed by assessments charged to user agencies (NRS 284.110).

Purchasing Provides purchasing services to State agencies and other governmental units. The operation is financed by an administrative charge on purchase orders and warehouse orders (NRS 333.120).

Information Services Accounts for designing, programming, and maintaining data processing software and also operating the State's central computer facility, radio communication and telecommunication systems (NRS 242.211).

Printing Accounts for the operation of the State printing facilities (NRS 344.090).

Crowd gathers in front of steam engine No. 10 at the Palisade Station of the Eureka-Nevada Railway in 1938.

(Photo's Permission Granted by:
Nevada Historical Society)

Mining has always been a staple industry in Nevada. Here, a steam engine unloads ore from the Eureka mines.

Two crewmen and a third man occupy a passenger car on the Eureka-Nevada Railway (1935).

FIDUCIARY FUNDS

PENSION AND OTHER EMPLOYEE BENEFIT TRUST

Public Employees' Retirement Accounts for the operations of the Public Employees' Retirement System which provides income benefits to qualified public employees (NRS 286.220).

Legislators' Retirement Accounts for the operations of the Legislators' Retirement System (NRS 218.2375).

Judicial Retirement Accounts for the operations of the Judicial Retirement System which provides benefits for justices of the Supreme Court and district judges (NRS 1A.160).

State Retirees' Fund Accounts for the assets accumulated and the payments made for other postemployment benefits provided to current and future State retirees. Administered as a defined benefit Other Postemployment Benefit Plan (OPEB). Funding comes from employer contributions and investment earnings (NRS 287.0436).

INVESTMENT TRUST

Local Government Investment Pool Accounts for investment funds received from local governments and pooled to obtain greater interest earnings (NRS 355.167).

Nevada Enhanced Savings Term Accounts for the establishment of one or more separate subaccounts for identified investments that are made for and allocated to specific participating local governments (NRS 355.165).

Retirement Benefits Investment Fund Accounts for investment of contributions made by participating entities to support financing of other post employment benefits at some time in the future (NRS 355.220).

PRIVATE PURPOSE TRUST

Prisoners' Personal Property Accounts for personal property held in trust for prisoners pending their release (NRS 209.241).

Nevada College Savings Plan Accounts for participant contributions used to pay for future college expenses (NRS 353B.340).

AGENCY

Intergovernmental Accounts for taxes and fees, such as sales and use, property tax and motor vehicle privilege tax, collected by the Department of Taxation on behalf of local governments (NRS 353.254).

State Agency Fund for Bonds Accounts for surety bonds and deposits held by the State (NRS 353.251).

Motor Vehicle Accounts for taxes and fees collected by the Department of Motor Vehicles pending distribution to counties (NRS 482.180).

Child Support Disbursement Accounts for the centralized collection and disbursement of child support payments in accordance with 42 U.S.C. Sec. 654b (NRS 425.363).

Child Welfare Trust Accounts for survivor benefits held in trust for children receiving welfare services (NRS 432.037).

Restitution Trust Accounts for money received from parolees making restitution (NRS 213.126).

State Payroll Accounts for payment of payroll and payroll deductions such as income tax withholding, insurance deductions, credit union deductions, etc. (NRS 227.130).

Heavyweight champion boxer Jack Dempsey poses in the ring with a young boy.

(Photo's Permission Granted by:
Nevada Historical Society)

Heavyweight boxing champ Jack Dempsey, who first came to Nevada as a freight car stowaway, didn't just work inside the ring. Here, he is shown lobbing ore into a mining cart.

STATISTICAL SECTION

This part of the State of Nevada’s comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the government’s overall financial health.

<u>TABLES</u>	<u>PAGES</u>
FINANCIAL TRENDS	
These tables contain trend information to help the reader understand how the government’s financial performance and well-being have changed over time.	156
REVENUE CAPACITY	
These tables contain information to help the reader assess the government’s most significant revenue source, taxable sales.	160
DEBT CAPACITY	
These tables present information to help the reader assess the affordability of the government’s current levels of outstanding debt and the government’s ability to issue additional debt in the future.	161
DEMOGRAPHIC AND ECONOMIC INFORMATION	
These tables offer demographic and economic indicators to help the reader understand the environment within which the government’s financial activities take place.	165
OPERATING INFORMATION	
These tables contain service and infrastructure data to help the reader understand how the information in the government’s financial report relates to the services the government provides and the activities it performs.	168

Sources: Unless otherwise noted, the information in these tables is derived from the comprehensive annual financial report of the relevant year.

Only the general obligation certificates of participation subject to the debt limitation are included above.

(a) See Table 11 for population data.

(b) Revised for fiscal years 2006 through 2014 to exclude special obligation bonds.

Table 9 - Legal Debt Margin Information

Last Ten Fiscal Years, (Expressed in Thousands)

	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
Debt limit	\$ 2,756,849	\$ 2,963,124	\$ 2,482,138	\$ 1,900,366	\$ 1,756,111	\$ 1,671,513	\$ 1,701,164	\$ 1,854,550	\$ 2,028,293	\$ 2,166,631
Total debt applicable to limit	1,015,375	1,214,991	1,405,781	1,410,211	1,342,660	1,293,386	1,178,185	1,151,010	1,127,220	1,082,845
Legal debt margin	\$ 1,741,474	\$ 1,748,133	\$ 1,076,357	\$ 490,155	\$ 413,451	\$ 378,127	\$ 522,979	\$ 703,540	\$ 901,073	\$ 1,083,786
Legal debt margin as a percentage of the debt limit	63.17%	59.00%	43.36%	25.79%	23.54%	22.62%	30.74%	37.94%	44.43%	50.02%

Computation of Legal Debt Margin at June 30, 2016:

Assessed value of taxable property at June 30, 2016 (a)	\$ 108,331,564
Debt limitation (2% of assessed value)	\$ 2,166,631
General Obligation Bonds subject to limit	\$ 1,080,295
Certificates of participation	89,225
<i>Less obligations exempt from debt margin:</i>	
Lease revenue certificates of participation	(86,675)
Debt subject to debt limitation	(1,082,845)
Legal debt margin at June 30, 2016	\$ 1,083,786

Note:

(a) On June 30 of each year, the most current assessed value available is the assessed value used for calculating and assessing taxes for the following fiscal year. Therefore, the debt limitation as of June 30 of each year is calculated using the assessed value for the following fiscal year. For purposes of this computation, assessed valuation includes 35% of actual taxable property value, plus statewide redevelopment agency assessed values.

Note: Total personal income is composed of wages and salaries, proprietors' income, personal interest and dividend income, rental income, and personal current transfer receipts, less contributions for government social insurance. Per capita personal income is calculated by dividing total personal income by population.

CPAs & BUSINESS ADVISORS

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

The Honorable Ronald Knecht, MS, JD & PE
State Controller
Carson City, Nevada

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Nevada, as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the State of Nevada's basic financial statements, and have issued our report thereon dated December 21, 2016. Our report includes a reference to other auditors who audited the financial statements of the Nevada System of Higher Education and the Colorado River Commission, discretely presented component units; the Housing Division Enterprise Fund, the Self Insurance and Insurance Premiums Internal Service Funds, the Pension Trust Funds and the Other Employee Benefit Trust Fund – State Retirees' Fund, the Nevada College Savings Plan – Private Purpose Trust Fund, the Retirement Benefits Investment Fund – Investment Trust Fund, and the Division of Museums and History Dedicated Trust Fund Special Revenue Fund, as described in our report on the State of Nevada's financial statements. This report does not include the results of the other auditors' testing of internal control over financial reporting or compliance and other matters that are reported on separately by some of those auditors. The financial statements of the Division of Museums and History Dedicated Trust Fund, the Pension Trust Funds, the Insurance Premiums Internal Service Fund and the Retirement Benefits Investment Fund were not audited in accordance with *Government Auditing Standards*.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the State of Nevada's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the State of Nevada's internal control. Accordingly, we do not express an opinion on the effectiveness of the State of Nevada's internal control.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant

deficiencies may exist that were not identified. However, as described in the accompanying Schedule of Findings and Responses, we identified certain deficiencies in internal control that we consider to be material weaknesses.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the deficiencies described in the accompanying Schedule of Findings and Responses as Findings 2016-A, 2016-B, and 2016-C to be material weaknesses.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the State of Nevada's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

The State of Nevada's Response to Findings

The State of Nevada's response to the findings identified in our audit is described in the accompanying Schedule of Findings and Responses. The State of Nevada's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the State of Nevada's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State of Nevada's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Reno, Nevada
December 21, 2016

**STATE OF NEVADA
SCHEDULE OF FINDINGS AND RESPONSES
FOR THE YEAR ENDED JUNE 30, 2016**

Findings Relating to the Financial Statements Reported in Accordance with GAGAS:

**2016-A Amortization of Bond Premiums and Discounts
Material Weakness**

Criteria: Management is responsible for establishing and maintaining an effective system of internal control over financial reporting. Properly calculating and reporting amortization of bond premiums and discounts are key components of effective internal control over financial reporting.

Condition: A prior period adjustment of approximately \$48,480,000 was required to correct the amortization of bond premiums and discounts when the State of Nevada converted from the straight line method to the interest method of amortization.

Cause: Prior to July 1, 2015, the internal controls in place did not ensure that the amortization of bond premiums and discounts was calculated using the interest method.

Effect: In prior years, net position in the governmental activities of the government wide financial statements was understated by approximately \$37,069,000 and net position in the business-type activities was understated by approximately \$11,411,000. The Unemployment Compensation Fund was understated by \$10,434,000 while the Water Projects Loans was understated by \$977,000.

Recommendation: We recommend the State of Nevada enhance internal controls to ensure the interest method is used when calculating and recording amortization of bond premiums and discounts.

Views of Responsible Officials: Management agrees with this finding.

**STATE OF NEVADA
SCHEDULE OF FINDINGS AND RESPONSES
FOR THE YEAR ENDED JUNE 30, 2016**

Findings Relating to the Financial Statements Reported in Accordance with GAGAS:

**2016-B Allocation of Investment Losses
Material Weakness**

Criteria: Management is responsible for establishing and maintaining an effective system of internal control over financial reporting. Properly allocating investment losses among the various funds is a key component of effective internal control over financial reporting.

Condition: A prior period adjustment of \$4,085,616 was required to correct a journal entry made in 2014-15 allocating a portion of an investment loss to the Highway Fund.

Cause: The internal controls in place did not ensure that the allocation of an investment loss among the funds was accurate.

Effect: In 2014-15, fund balance in the Highway Fund was understated and fund balance in the General Fund was overstated by \$4,085,616.

Recommendation: We recommend the State of Nevada enhance internal controls to ensure the allocation of investment losses among the various funds is accurate.

Views of Responsible Officials: Management agrees with this finding.

**STATE OF NEVADA
SCHEDULE OF FINDINGS AND RESPONSES
FOR THE YEAR ENDED JUNE 30, 2016**

Findings Relating to the Financial Statements Reported in Accordance with GAGAS:

2016-C Highway Fund - Accounts Payable, Deferred Inflow of Resources, and Inventory Material Weakness

Criteria: Management is responsible for establishing and maintaining an effective system of internal control over financial reporting. Proper reporting of accounts payable, deferred inflow of resources, and inventory is a key aspect of a strong system of internal control.

Condition: During our audit procedures, we became aware of several transactions in the Highway Fund that were not recorded in the appropriate accounting period under the modified accrual basis of accounting. We also became aware of a transaction that was posted incorrectly due to a formula error on an inventory spreadsheet.

Cause: The internal controls in place did not ensure that receipts and payments after year end were recorded in the accounting period in which the goods or services were received or provided. In addition, the internal controls in place did not ensure that inventory was accurately reported.

Effect: Prior to adjustment, fund balance in the Highway Fund was overstated by \$17,190,328 as a result of unrecorded contracts payable and understated by \$1,012,347 due to unrecorded revenues. In addition, inventory was overstated by \$3,410,142.

Recommendation: We recommend the State of Nevada enhance internal controls to ensure deferred inflow of resources and accounts payable are recorded in the accounting period in which the goods or services are received or provided. We also recommend the State of Nevada enhance internal controls to ensure inventory is accurately reported.

Views of Responsible Officials: Management agrees with this finding.

OFFICE OF THE
STATE CONTROLLER

CORRECTIVE ACTION PLAN FOR AUDIT FINDING

Audit Finding 2016-A

Finding: A prior period adjustment of approximately \$48,480,000 was required to correct the amortization of bond premiums and discounts when the State of Nevada converted from the straight line method to the interest method of amortization.

Recommendation: The State of Nevada enhance internal controls to ensure the interest method is used when calculating and recording amortization of bond premiums and discounts.

Agency Response

Does the Agency Agree with Finding: Yes

Additional Comments: None

Corrective Action Taken or to be Taken

Action: The Controller's Office identified and corrected the error in fiscal year 2016. As a result, the Controller's Office purchased software for tracking long-term debt obligations, and the software calculates amortization using the interest method.

Date of Completion or Estimated Completion: Completed July 2016

Department or Agency Responsible for Corrective Action Plan

Agency: Controller's Office
Contact: Brenda Laird, CAFR Accountant II
101 N. Carson Street, Suite 5
Carson City, NV 89701
775-684-5621
blaird@controller.state.nv.us

**OFFICE OF THE
STATE CONTROLLER**

CORRECTIVE ACTION PLAN FOR AUDIT FINDING

Audit Finding 2016-B

Finding: A prior period adjustment of \$4,085,616 was required to correct a journal entry made in 2014-15 allocating a portion of an investment loss to the Highway Fund.

Recommendation: The State of Nevada enhance internal controls to ensure the allocation of investment losses among the various funds is accurate.

Agency Response

Does the Agency Agree with Finding: Yes

Additional Comments: This particular instance was unique in that the Treasurer's Office deferred recognition of an unusually large investment loss on a cash basis to the participating funds over a period of years, while the losses were recognized for financial reporting in accordance with Governmental GAAP. In the normal course of business, insignificant investment losses are allocated to the funds during the Treasurer's quarterly interest distribution, and not deferred.

Corrective Action Taken or to be Taken

Action: The Controller's Office identified and corrected the error in fiscal year 2016. In addition, a procedure will be established to ensure any future allocations of large and unusual investment losses, where the decision is made to defer recognition in the distribution process, are properly recorded among the various funds.

Date of Completion or Estimated Completion: Error corrected February 2016 and procedure estimated to be completed January 2017.

Department or Agency Responsible for Corrective Action Plan

Agency: Controller's Office

RUDY MALFABON, P.E., *Director*

CORRECTIVE ACTION PLAN FOR AUDIT FINDING

Audit Finding 2016-C1

Finding: Several transactions in the Highway Fund were not recorded in the appropriate accounting period under the modified accrual basis of accounting.

Recommendation: The State of Nevada enhances internal controls to ensure accounts receivable and accounts payable are recorded in the accounting period in which the goods or services were received or provided.

Agency Response

Does the Agency Agree with Finding: Yes

Additional Comments: None

Corrective Action Taken or to be Taken

Action: Nevada Department of Transportation (NDOT) will raise the awareness of the State's fiscal year cutoff for financial reporting purpose. NDOT Accounting Division will begin a log for the transactions posted to the new fiscal year that should post to the old fiscal year. Such information will be provided to the Controller's Office Financial Reporting to make an adjusting entry during the Highway Fund preparation.

Besides providing adequate training, an additional procedure will be added to cross check for payments received between July 1st and Aug 31st posted in the system against the Accounts Receivable report.

Date of Completion or Estimated Completion: By November 1st, 2017

Department or Agency Responsible for Corrective Action Plan

2015-A **Amortization of the Gain/Loss on Refunding
Significant Deficiency**

Initial Fiscal Year Finding Occurred: 2015

The State of Nevada's policy to refund debt on the first available call date, the State of Nevada calculated the life of the old debt as ending on the call date. The state of Nevada became aware of a recently issued Question and Answer that clarified that the life of the old debt should run through the original end date of the issue. In prior years, net position in the government wide financial statements was understated and amortization expense was overstated and required that a material prior period adjustment be made to report the correct amount of net position and amortization expense..

Status: Corrected

2015-B **Capital Assets
Significant Deficiency**

Initial Fiscal Year Finding Occurred: 2015

During our testing of capital assets, we identified a capital asset addition during fiscal year 2015 was recorded as an asset in 2012 and inadvertently recorded again in 2015 as part of the completed project. Thus capital assets were overstated and required that a material adjustment be made to report the correct amount of capital assets.

Status: Corrected
